Just What Is The Nebraska Public Power System?

Here is how NPPS helps supply Nebraskans with plenty of power at lower rates than neighboring states.

If you live in the eastern two-thirds of Nebraska (excluding Omaha and vicinity), the power you get from your local electrical distributor probably is supplied by the Nebraska Public Power System.

It is important to your pocketbook and future to know these facts.

NPPS is owned and jointly operated by the Loup River Public Power District and the Platte Valley Public Power and Irrigation District.

Here is how NPPS operates, what it has done for your area since 1940, and what plans NPPS has to make sure you will always have plenty of low-cost power.

HYDRO-ELECTRIC PLANTS like this one at Columbus are part of nearly 60 million dollars worth of power facilities operated by NPPS in the eastern two-thirds of Nebraska.

NEW KRAMER PLANT at Bellevue uses steam to generate electricity. It is more efficient than older steam plants—provides a major share of power to meet increasing needs.

TRANSMISSION LINES built and operated by NPPS deliver power to electric retailers such as rural districts (REA's), some city-owned systems and Consumers Public Power District.

What Is Your Stake in the Future of NPPS?

Since World War II, NPPS has kept pace with growing power needs with an expansion program averaging approximately \$4,000,000 a year.

Further expansion will soon be necessary. Power use in Nebraska has doubled since 1950 and is expected to continue to increase at this rate. Although some NPPS expansion plans have been temporarily delayed by circumstances beyond our control, NPPS is moving forward with new construction — to provide you with plenty of low-cost power.

For more facts on public power, write for the NPPS Question and Answer booklet, Nebraska Public Power System, Dept. CY, Columbus, Nebraska.

MORE IRRIGATION is possible because of water and low-cost power supplied by NPPS. Nebraska now has more than 1,500,000 irrigated acres, a 60% increase in the past five years.
