**building a Brighter Future...Electrically**

As a new year dawns, continuing progress in Nebraska is reflected by new and expanding business and industry, streamlined farming methods, and more comforts and conveniences in the home.

The importance of low-cost electricity to this progress is demonstrated by the ever-growing use of power by Consumers' customers. Here is part of the record for 1956 as compared with 1955.

	1956*	1955
Customers served	117,762	116,066
Total kilowatt-hours used	834,058,000	782,676,940
Kilowatt-hours used by residential customers	237,830,000	218,428,227
Average KW/H use by residential customers	2,796	2,611
Average cost per KWH for residential customers	2.60 cents	2.64 cents

Meanwhile, Consumers has charted definite, long-range plans for additions and improvements to its system so that its customers can continue to count on an ample and dependable supply of low-cost electricity for an ever-brighter future.

\*1956 figures estimated on December 11
