Gasoline Tax Produces Huge Sum Of Cash

Somewhere in Nebraska a service station pump on Thursday, Jan. 24, will register the fraction of a gallon of gasoline that will bring to \$3,040,000 the amount Nebraska motorists will have paid in gasoline taxes just since the beginning of 1957.

This, it was pointed out today by C. Russell Lockwood, executive secretary of the Nebraska Petroleum Industries committee, is as much tax money, in 24 days as the Nebraska State tax produced in a whole year, following its original enactment in 1925. And there was no federal tax on gasoline then, or until 1932.

Lockwood noted that the present 6-cent state gasoline tax is expected to take in an estimated \$31.5 million this year, while the 3-cent federal tax will bring total motor fuel tax collections in this state to an estimated \$47.4 million.

This, he pointed out, means that gas tax revenues are now being collected from Nebraska highway users at a rate of \$1 million every eight days, or as much money within 24 days as the 2-cent 1925 tax produced in a whole year.

"It is true," Lockwood said, "that there is now 94 per cent more motor vehicles in use in Nebraska than there were in 1925, and that many of these vehicles are receiving greater use, but this only partially explains the fact that gas tax revenues are now running 16 times as high."

The big factor, he added, is the present combined state and federal tax rate of 9 cents a gallon, which he said is equivalent to a 41.1 per cent "sales tax" on gasoline.

Specifications may be obtained from the Office of the Cass County Surveyor at Plattsmouth, Nebraska.

All bids received will be publicly opened and read aloud in the Court House at Plattsmouth, Nebraska on February 5, 1957 at 2:00 o'clock p. m.
