Plattsmouth's Blue Devils at 8 p. m. Tuesday will attempt to regain victory road when they meet Bellevue in the Bellevue High School gym.

The Blue Devils, after turning in a "shabby" performance against Falls City Saturday night should be ready to go full tilt against their bitter rivals to the north.

Plattsmouth coach John Adkins labeled the Devils perform-

mance against Falls City their "poorest" of the year and said the shorter Falls City quint controlled the rebounds and took a majority of the tips as Plattsmouth appeared glued to the floor.

BUTTON-SIZE NUCLEAR BATTERY—Five years of research has resulted in an atomic-powered battery which utilizes what was once considered a nuclear waste product as its power source. The tiny battery will deliver power over at least a five-year period. It is the forerunner, supposedly, of batteries for use in radios, guided missiles, hearing aids and even wrist watches. Joint developers Walter Kilde Laboratories and the Elgin National Watch Company stress that more research will be necessary before something like an atomic watch will be possible. Promethium 147, the power source, emits fast-moving rays which are trapped in a specially designed phosphor, converting them to "atomic light". The light is captured by a photo-cell and automatically transformed into energy.
