Better yet are those towns where the street sign is on a post six or eight feet high, right out for all the world to see. And some of the more progressive cities have signs especially made to be seen after dark. These signs can be read long before you get to the corner and give you plenty of time to locate your turn. There is no dangerous hesitating in intersections, no backing, no house-to-house inquiring—the new signs that can be read both day and night make visiting easier and safer.

History and local commerce are fine—but the street name signs should also tell us where to go.

**SEAL ACCORD**  
The United States, the Soviet Union, Canada and Japan recently signed a new agreement for conserving the fur seals of the North Pacific. It sets rules for the number of seals to be killed and included compensation for Japan and Canada, which do not control fur seal breeding grounds as the United States and Soviet Union do. The fur seals breed on the Pribilof Islands, off Alaska, which are controlled by the United States, and on the Komandorski Islands, off Siberia and Robben Island, north of Japan, which are controlled by the Soviet Union.

One of the most prosaic yet telltale bits of our Americana is the simple street name sign. History, hopes for the future, the arts, leading citizens—these are but a few of the many points of character a town is apt to wear on its sleeve for all to see.

In many towns, a schoolboy could learn the names of the nation's presidents by simply repeating the names of the streets. Lincoln, Washington, Madison, Jefferson, Harrison, names and a little more. Nor are local heroes and heroines forgotten. In Madison, Wis., the streets Clyde Gallagher Avenue, Hilda Lonnquist Drive and Esther Beach Road pass on the names of these local greats to posterity.

Perhaps your town tells something of its industry or boasts of a local characteristic on its street signs. Is there a town in the state of Washington's apple empire that doesn't have its Apple Street? Southern California's fruit belt towns are dotted with Orange Streets and Grape Boulevards. In the mid-west, you're likely to find Corn Avenue, Wheat Street and Alfalfa Drive with some regularity.

But for all the information the names of streets pass on, it is a rare town, indeed, that has signs that serve the basic function of location. In fact, most street signs are tucked away where they can't be seen at all.

Many towns paint street names on curbstones. In the fall, leaves hide the name; in the winter, there is snow; spring's rains do the damage in their own season, and the summer is spent repainting. Other cities rely on concrete posts two or three feet high to act as cornerstones of information.
