It Pays In Many Ways

Keep your Pilot on this Summer

- It keeps your furnace dry... reduces rusting**
The small amount of heat from the gas pilot keeps your heating equipment dry through the summer... prevents rusting.
- Helps prevent dampness and mustiness in your basement**
The gas pilot generating just enough heat to maintain the draft up the chimney. This helps ventilate the basement, reduces dampness and mustiness.
- Your furnace is ready for occasional damp, chilly days**
Your furnace is ready to be turned on for those occasional days when you need it.
- When winter comes, you just turn up your thermostat to get heat.**
At the first sign of cold weather, so many people want their pilot lighted that it is impossible for heating contractors to service them. You'll be sure your pilot will be lit when you want it. You keep your pilot on.
- The cost is slight**
The cost is so little to keep your pilot on that you'll scarcely notice the difference in your summer gas bills.

Only Gas does so much... yet costs so little

South Ashland Extension Club Attend Homemakers Day Here

Mrs. Ivan Armstrong, Phone 1502. Representatives of the Jolly Fairlanders Extension Club and the Junior Fairlanders Club attended Homemakers Day at Plattsmouth Tuesday and were guests of the Chamber of Commerce.
