## Tinkering with tools

in a basement workshop

is lots of fun—BUT

it can be dangerous

without proper eye protection!

Chances are your everyday glasses fill most of your basic vision needs satisfactorily. With them, you're able to read, write, drive and do sundry other chores at the office or around the house. BUT, when it comes to working with tools, indoors or out, your eyes need the added protection of hardened lenses—the one safety measure specifically designed to keep your eyes out of unforeseen trouble! To play it safe...

Consult your Ophthalmologist or Optometrist regularly and see better.
