WANTED TO BUY! HIGH WHITE EGGS.

As the tractor took over horse farming so is the quality egg market replacing the current receipt eggs. Get in on the extra profits! It costs no more to produce a good egg than a poor one.

If you had sold us ALL of the eggs (medium & large) from 100 hens and they had not averaged over 65% production from Sept. 1st to Dec. 31st, 1957, you would have grossed \$317.94. The production of a thousand hens at the same rate of lay would have realized for the producer checks in the month of Sept. of \$795.05; in Oct. of \$812.98; in Nov. of \$780.30; and in Dec. of \$691.13. These figures are inclusive, complete, and not averages. This is one way of having a steady pay check on the farm.

Sample daily price per dozen quotations: July 23rd - 39c, Aug. 23rd - 44c, Sept. 23rd - 46c, Oct. 23rd - 51c, Nov. 23rd - 48c, Dec. 23rd - 47c.

There are three (3) requirements for this kind of production:

1. White eggs from a quality chicken, standard or hybrid.
2. Care of the hen so that she will lay a good-sized well-formed egg.
3. Care of the new-laid egg as a perishable food. The care the first six hours after an egg is laid determines its real quality. Housing, chicks, and feed financing available if needed.
