Natural GAS Clothes Drying SAVES \$24.00 OR MORE PER YEAR*

Talk about economy... Natural GAS has got it. Just think— a Natural GAS Dryer dries an entire load of clothes for about 1c per load... that's 1/6 as much as non-flame dryers... and facts show that the average family dries 40 loads or more each month. This means a GAS Clothes Dryer will save you at least \$24.00 per year. Think of the savings year after year with Natural GAS.

Natural GAS is clean, too—lets you dry clothes as clean as you wash them. White clothes stay whiter... colored clothes stay brighter... and they all stay soft and fluffy. Is it any wonder that today more people than ever dry clothes with GAS?

Ask the commercial and the self service laundries, or ask your friends why they dry clothes with Natural GAS. They'll tell you GAS does it better for less.

See the big selection of work saving GAS Dryers at The Gas Company or your GAS Dryer Dealer, and you, too, will say, "The nicest thing that could happen to me is to own an automatic GAS Clothes Dryer."

*Based on prevailing rates in Lincoln, Nebraska.

Only GAS does so much... yet costs so little
