

Plattsmouth Loses Final In PVL, 8-6

Plattsmouth closed out its regular Platte Valley League schedule Sunday at Elkhorn, bowing 8-6 in a well-played game. Young Tom Winscot, Plattsmouth High athlete, pitched the whole game for Plattsmouth, scattering 15 hits well-enough to escape several bad situations. Winscot had compiled a good record with Metz Junior Legion team in Omaha earlier this summer.

Sunday, Elkhorn's lineup of sluggers got only two extrabases hits off Winscot, one a two-run triple in the 4th.

Plattsmouth got three runs in the third for a 4-1 lead on singles by Carl Heath, Ed Blair and Chuck Bjork, the latter plating two runs. Bjork scored when a fly ball was dropped.

Blair with three singles and Bjork with a double and two singles led Plattsmouth.

Manager Don Wall today said he was pleased with the kind of baseball his team had played the last part of the season. The team wound up with a 2-13 record in fifth place in the South Division of the league but played much better in late games than earlier in the season.

Papillon leads the South with 11-2 to 10-3 for Millard. Elkhorn is tops in the North with 11-3 while Treynor, Iowa, has 11-4.

The full schedule is 16 games per team. Plattsmouth's rained-out game with Gretna will probably not be played since it has

no bearing on the standings.

U. S. Records Wettest July In Many Years

The July record is complete and countrywide was probably the wettest in history.

Ohio reports say "Wettest in 71 years"; Nebraska — "80 year rainfall record broken." Southwest Iowa — "Rainfall five times normal."

Reports on rainfall by areas compared with normals computed on 30-year averages are as follows:

Southwest Mo.	15	4.2
Lincoln, Nebr.	11.5	3.5
Kearney, Nebr.	7.49	2.7
Southwest Iowa	16-20	3.8
Central Ill.	10-15	3.5
Central Indiana	12	3.4
Central Ohio	10-12	3.3

Since moisture is usually the limiting factor in crop production, this year's production may be phenomenal. Oats and wheat are already showing high yields. Oats yields of up to 120 bushels per acre have been reported in west central Illinois. In Indiana an 8.2 acre field of wheat was weighed in at 92.5 bushels per acre. It was of the new La Porte variety. Soybean harvest is already being predicted to be above the half billion bushel mark, which would be the largest on record.

The Corn Belt, which usually has had a few tremendous dry areas each year, this year has only a very few. Central and southern Wisconsin have experienced short pastures and hay crops due to dry weather. Central Michigan has also been quite dry with only 4 or 5 inches of rain since crops were planted in some sections. Some parts of South Dakota have been a little short on needed moisture.

A fantastic wet season development is the drilling of drainage wells in southern Nebraska. These wells are put down in the lowest spot on the farm and during wet spells are used as a well to drain the surface water down to the subsoil water supply. In dry seasons, the well can be used to pump water for irrigation.
