Fruit Cake Time

October is an excellent time to prepare the fruit cakes that your family and friends will enjoy during the Christmas holiday season. A well "ripened" fruit cake is far superior in flavor to those made in the last minute rush just before Christmas Day.

A good fruit cake takes several hours to make so don't try to do all your preparation and baking in one day. The next time you go to the store buy the fruits and nutmeats you will need and check your supply of staples. When you have time, cut up the fruits and nutmeats and store them in screw-top jars. The day before baking, prepare the pans and measure the ingredients. Your task will be simple on the big day when you put your cakes together, bake and cool them. The day after baking, wrap and store the cakes.

A variety of containers can be used for fruit cakes. Try tube or loaf pans, coffee cans, ring molds, casseroles or freezing containers. Grease the pan well and then line smoothly with heavy paper, grease and flour well. Let the paper extend up along the sides to protect cake edges from over-baking. Small cakes can be baked in muffin cups lined with paper.

Mixing is easy once the fruit is cut and ingredients assembled. Measure prepared fruit and nutmeats into a flat pan; sift dry ingredients over top, then toss lightly to coat well. Add to creamed shortening, sugar and egg mixture alternately with liquid. Spoon batter into pans; push gently into corners to level.

For a deliciously moist fruit cake place a shallow pan of water on the lowest rack of the oven and let steam work its magic while the cake bakes. Baking time will vary for the fruit cake, depending on size, but the temperature is the same for all, a slow oven of 300 degrees Fahrenheit.

Fruit cake must be completely cooled before wrapping and storing. Remove the baked cake from the pan, place on a rack and pull paper down from the sides. Cool, then replace paper and wrap in cellophane or cellophane. Overwrap with aluminum foil, molding it to the cake. Wrap cupcakes in groups. Store fruit cakes in tightly covered containers in a cool place.

Well wrapped fruit cakes may be kept in the freezer for a period of one year. When ready to use, remove the cake from the freezer and let it defrost, still wrapped.

Try this rich Chocolate Fruit Cake as a special treat for your family this coming holiday season. This recipe makes a loaf (9x5x3 inches) or batter for 3 aluminum freezing containers (3 1/2" by 4 1/2" by 1 3/4" inches). 4 (one oz.) cakes unsweetened chocolate

- 3 cups seedless raisins
- 1 cup broken walnut meats
- 2 cups sifted all-purpose flour
- 3 teaspoons baking powder
- 1 teaspoon salt
- 1 teaspoon cinnamon
- 2 3/4 cup shortening
- 1 cup white sugar
- 3 eggs

Where Do "MIRACLE DRUGS" Come From?

They don't come out of a magician's hat but they sometimes do come from strange places. An East Indian snake root called Rauwolfia was once used widely in India for everything from treating epilepsy to making sleeping pills. Modern chemists then discovered its true therapeutic effectiveness. Now called Reserpine, it is widely used in lowering high blood pressure.
