**HEALTH NOTE**

Read carefully the dosage directions on a prescription label—and follow them exactly. They are your doctor's orders and are based on his best professional judgment of how much medication you need—and how often.

One tablet three times a day is not the same as three tablets once a day. When the former is prescribed, the latter could be a dangerous over-dose.

Only when you take your medicine when and how the doctor directs—and for as long as he directs—can it deliver full therapeutic benefit.

The label is a Health Note—read it!
