Plain talk to the man who thinks "all cars are built alike today"

J. EMMET JUDGE

"The one thing we know car buyers want above all in an automobile is quality. Yet many people assume that all cars today are pretty much the same in this respect.

This is far from being the case. I can name at least 30 basic differences in the design of our '59 Mercury. Naturally, we feel these differences make Mercury a better car. For example:

EXTRA STRENGTH STARTS WITH THE FRAME

The backbone of every Mercury is the frame. We use a heavy box-type construction—the heaviest in the industry. Competitors use frames that are up to 125 pounds lighter.

WE BUILD QUALITY YOU CAN SEE

Compare the way Mercury builds engine hoods. Most competitive cars use what is known as a single-panel construction. This type of hood can be twisted and turned with the slightest pressure—often flutters and vibrates when the car is in motion. At Mercury, on the other hand, we use a double-panel construction—two layers of steel with the insulation sandwiched in between. Not only is Mercury's hood more rigid, but it looks better.

YOU FEEL THE QUALITY WITH EVERY STOP... Mercury brakes are the largest in the field—with up to 22% more brake lining than competitive cars. And only Mercury in its field has brakes that adjust themselves mechanically. You save money by eliminating periodic adjustments. And you are safer because Mercury brakes stay properly adjusted for the life of the linings.

...AND EVERY TIME YOU TAKE THE WHEEL

All 1959 Mercurys have a flexible coupling installed in the steering system.

This acts as an insulator—absorbs road shocks that would otherwise travel up to the steering wheel. Mercury, unlike some cars, gives you this with either manual or power steering.

WE HAVE PLENTY OF PROOF THAT THIS IS THE BEST-BUILT CAR IN AMERICA TODAY

We know it is the greatest Mercury ever designed and built. Never in Mercury's 29-year history have we had so much value in the product itself. Mercury has advantages everywhere over competition. The four described on this page are only typical. In future messages I'll tell you about dozens more—in styling, comfort, in everything you want in a car."
