Making Life a Success

Practically every person in Cass County, whether man or woman boy or girl, regardless of age and circumstances, hope and intends to make life a success.

Stated in general terms, this ambition is common to all of us. It is only when we attempt to define the meaning of "success" that differences of opinion develop. Consequently, it might be a good idea for the individual to stop long enough to ponder the question and answer it.

The individual, in his or her zeal to be successful, often accepts a popular definition of the term, and thereby loses sight of the real goal. One's success is not be measured by the wealth accumlated, the worldly honors received, or the fickle acclamation of so-called public opinion.

So, today, when there are so many ideas about success, we suggest that the individual reader analyze his or her conception, it should be obvious, we think, that one can be successful only when life is in harmony with our inner convictions. Yet, if our principles be wrong, life must be imperfect.

To those who read this article, and. particularly to the young people, we suggest the effort to outline definite principles which are considered acceptable guides. As a start, one might try to discover a definite principle upon which one can base daily activity and to which one is willing to be loyal under all crcumstances. This might sound easy, but test it for yourself.
