Now! Bleach safely, automatically in the new MAYTAG AUTOMATIC WASHER with BLEACH DISPENSER

No waiting or diluting. Maytag does both jobs for you. Just add concentrated bleach through dispenser opening; bleach remains in dispenser until washer has filled and washing action starts, and is automatically diluted before being introduced into the wash water. After washing action starts, bleach is added slowly to provide uniform bleaching action. Only Maytag provides this automatic delay and pre-dilution.

No bleach damage to clothes. By providing automatic dilution and properly timed injection, Maytag prevents heavy concentrations of bleach from coming in contact with clothes. Gone forever are the holes in clover, the weakened fibres, the uneven bleaching associated with strong liquid bleaches.

No half-hearted detergents. Modern detergents contain brightening agents which are destroyed by liquid bleach when bleach and detergents are added to wash water at the same time. By delaying the introduction of bleach until after the washing action has started, Maytag preserves the full effectiveness of your detergent and clothes come out sparkling clean, white, and color bright, wash after wash after wash.
