Minimum Tillage Meet 30th

What does a corn field look like with but one cultivation? Better than one might expect. But as the saying goes, "Seeing is believing." A field meeting will be held Monday afternoon, July 20, at 1:30. The site is the Eldon Mendenhall farm which is located on Highway 34, two and one-fourth miles east of the Elmwood corner or four and three-fourths miles west of the intersection of Highways 34 and 50.

A pre-emergence spray was applied at planting time. Other plots with various pre-emergence chemicals used on corn, milo and soybeans will be open for inspection. These plots can be viewed following the discussions at the Mendenhall farm.

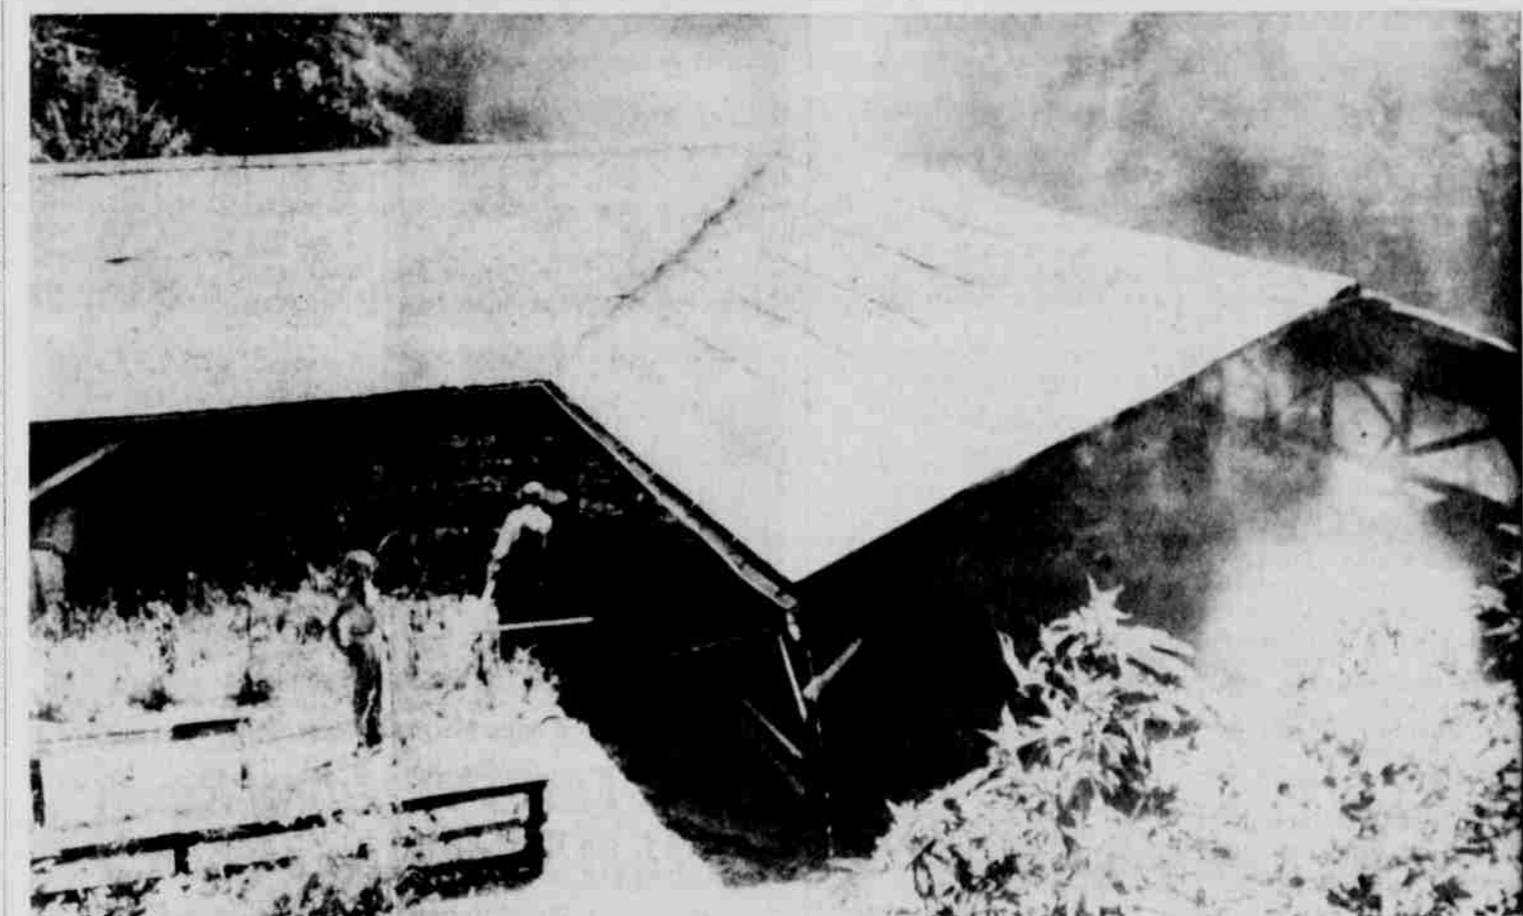

Ewe distribution day—1,800 excellent quality yearling ewes were distributed to Eastern Nebraska farms July 7. Of the number shipped to Lincoln fewer than 100 ewes came to Cass County farms but it is very likely they will prove a sound investment.

4-H Home Economics members will have an opportunity to brush up on judging work July 16. A practice judging workout will be held on foods, clothing and home living.

Tomato Spray Program—Septoria leaf spot of "blight" is the most common foliage disease of tomatoes. The disease may occur on plants any age but most often occur when the fruit is setting on the plants.

The lower leaves are affected first. A spray program at this time is important. A copper-containing fungicide is recommended. By adding a teaspoon of common household detergent to the copper spray solution a better job of thoroughly wetting all the foliage is possible.

The spray should be repeated every 7 to 10 days. Some of the better copper fungicides are known as Zineb, Maneb and Nabam, plus zinc sulfate. — Clarence Schmadeke, County Agent.

CALF BARN DAMAGED—This was the scene of a fire Friday which did about \$1,500 damage to the King Korn Klub's calf barn near the high school athletic field. Much of the interior of half the building was burned out.

Fire Damages Cattle Shed of King Korn Committee Friday

Friday morning shortly after 11, the fire department was called to the Plattsmouth school property between Main and Washington Avenue and 9th and 10th Streets.

The alarm was occasioned by the burning of the shed, the property owned by the King Korn Klub, used for holding the calf show each fall.

The building was badly damaged and the loss is estimated at \$1,500, with no insurance. The frame structure burned rapidly and the firemen had to string more than 2,000 feet of hose to reach the blaze. Hose was strung from 10th street and from across Washington avenue.

Residents in the locality reported a number of boys had been playing around the structure. It is thought the fire began from matches dropped on the floor which was covered with hay and straw.

Mr. Orent said he did not see the person who fired the shot or who set fire to the back porch of the cabin.

A family camping about 100 feet away from the place where the shooting occurred took Mr. Orent to Plattsmouth. Solomon took him to the Omaha city limit where Omaha police relayed him to the hospital.
