**WHAT WILL TOMORROW BRING?**

At this very moment, some research scientists may be viewing the birth of a new and wonderful drug. His laboratory production of the drug is a preview of a miracle of commercial production performed by the pharmaceutical industry—a miracle that will produce ample quantities of the new drug so that its benefits will be available to all—at a cost within the means of all. We have seen this miracle performed with penicillin, sulfa drugs, aureomycin, terramycin and others — rare and costly when first discovered . . . plentiful and inexpensive today.
