a west wing, 20 by 28, was added.

In 1914, the northwest room was started by the Men's Class and completed by the Women's Service Class. Mrs. J. R. Stine taught this class for 25 years.

In 1924, the men of the Church installed the metal ceiling.

In 1930, Rev. G. W. Gregory led the men in excavating the basement. This was abandoned until 1936 when, under the leadership of R. F. Allen, the work was completed at a cost of \$640.

In 1945 and 1946, under the leadership of the minister, J. W. Taenzler, an addition of 16 feet was added to the north, the sanctuary rearranged, and new furnishing purchased. The men of the Church did most of the carpenter work. The project cost approximately \$4,000.

In 1916 during the ministry of Rev. Perlee, the parsonage was built just north of the Church at a cost of \$1,900.

During the past 100 years, we have been served by 48 different ministers, most of them staying only one year. Seven have returned a second or third time — Michael Combs, two one-year terms; J. K. Reed, three one-year terms; A. Galloway, a one-year and a two-year ministry; D. A. Youtz, a two-year and a three-year ministry; A. L. Zink, two one-year ministries; A. G. Hollowell, a two-year and three-year ministry; J. W. Taenzler, a 5-year a 3-year and now in the 4th year of his 3rd ministry with this Church.

Many times we have been small in numbers. Also there have been happy fruitful years when we have ranked 3rd in attendance among the Protestant Churches of our city. We are grateful to the faithful folk who through the years have kept the doors open and the Gospel proclaimed from the little white Church on the corner of North 8th and Ave. C.

Many years ago the Church sent out two ministers, Guy Wingate and L. M. Wiles.

Industry: Here's Chance for Listing In Facilities Book

Central Electric and Gas Co. urged manufacturers in and around Plattsmouth today to take advantage of an advertising campaign which is putting the industrial potential of this area and the rest of the Northern Plains region in the national spotlight.

W. T. Gleason District Manager here, said area industries still have time to list their plant facilities in the Industrial Facilities Register, which is being compiled by Northern Natural Gas Company of Omaha in co-operation with Central Electric and Gas and other utilities in Northern's service area.

The register is a file of electronically tabulated information on the manufacturing capacities of thousands of manufacturers in Iowa, Minnesota, Nebraska, South Dakota and Kansas.

Central Electric and Gas, Northern, and other Northern

utility customers are currently sponsoring an advertising program to offer the services of the facilities register to industrial purchasers throughout the country.

Gleason said the utility or Northern, upon inquiry, will furnish to any prospective purchaser without obligation a list of all manufacturing suppliers in any line who have production facilities in the five-state area.

"We feel that the facilities register can be a great help in bringing new production orders to the existing industry in this area," Mr. Gleason said, "and we would like to have every plant in the area — small or large — listed in the register."

"We would also like to invite those companies which have previously listed their plant equipment in the facilities register and have since acquired new production equipment to add this information to the file."
