HOSPITAL BIRTHDAY — David Ellingson, 11, son of Mr. and Mrs. Lawrence Ellingson of Plattsmouth, is faced with the probability of spending his birthday, Dec. 12, in Lincoln Orthopedic Hospital where he has been a patient since mid-October when he had surgery on both legs. He is a 6th Grader at Central School.

Sure Ain't

A colored boy was strolling through a cemetery (in the daytime, of course) reading the inscriptions on the tombstones. He came to one which read:
 "Not dead, but sleeping."
 Scratching his head, he remarked "He sure ain't foolin nobody but himself."

Easy

"Pop, how do they catch crazy men?"
 "It's easy. A little rouge and lipstick, a new hair-do and a pretty dress."

Inch-Square Bits of Paper Save Lives

By State of Nebraska Department of Health

The germs that cause tuberculosis are disappearing under a swarm of Christmas seals, thanks to your donation and your neighbors.

This little inch-square piece of colored paper has helped save millions of lives. It all began in Denmark, back in 1903, on Christmas Eve, when a weary Danish post office clerk, Einar Holboell, saw two shivering, coughing, poorly dressed children out in the snow.

The idea of a stamp to raise money to help sick people came into his mind, a stamp to be offered at Christmas time when people's hearts are open.

Mr. Holboell took his idea to the king, who approved it, so the next Christmas time the first seals went on sale at a half cent each.

The Danes bought 3,350,000 of them, or one for every person in the country, and the first money from this source was on hand to open the battle against tuberculosis.

Danes naturally sent letters to friends in other lands, and the seal caught the fancy of people all over the world.

The seal sale first came to the United States in 1907, when a determined group of women volunteers opened the drive, selling them for a penny each. The seal was designed by Emily Bissell, a simple garland of holly around a red cross, and the words Merry Christmas.

The purpose of this sale was to raise money to help keep in operation an open-air tuberculosis shack which was about to close for lack of finances.

Unless money could be secured, its eight patients would have to leave, and lose their chance of recovery. The goal was \$300.00. With the support of the leading newspaper in Philadelphia, the "North America," the 1907 drive brought \$3000.00.

In 1950 the drive collected \$21,000,000.00. From an unknown menace, tuberculosis has become a well understood disease. From a public terror, it is now a disease that can be discovered early, and fought. All the work of the tuberculosis associations is supported from the sale of the Christmas seals.

Of the total raised, a high percentage remains in the state where the seals were sold, and the rest is allocated to the national fund.

Tuberculosis can and will be eradicated if people continue to support the campaign against it.
