Visits Moon

A farmer in Arkansas, Buck Nelson, is writing a book about his trip to Mars, Venus and the Moon. Buck says space ships began hovering over his farm back in 1954.

On April 24, 1955, he says, a space ship landed on his farm and took him aboard for three days he traveled about with the space people. He visited the three mentioned and talked to the space people and saw them living on the planet—he says.

Buck is giving lectures and apparently is sincere about his adventure. He says the people on other planets dress more simply, and that disease is rare among them. They live by the laws of God, he asserts.

The space ships they fly are round and about fifty feet in diameter by eight feet thick. The ship travel on magnetic currents in the air and need no fuel. Homes on the planets are made from rock—often obtained on the moon.

We have no idea what our space scientists would do with, and say about, Buck. It certainly is an interesting story he tells. Perhaps he is a heavy dreamer. And maybe he really believes he went to Mars, etc.—it would seem he is sincere about this and not just spoofing us.

The space ship rumors and reports have certainly come thick and fast in recent years. Maybe they are up there, some nights, after all. If they are, we hope they'll look out for Santa Claus come Christmas Eve night. He has to move pretty fast — just like Buck did, back in 1955.
