Starting a new lawn this spring?

Here are the facts you need

1. Don't worry about poor soil. You don't need to go to the trouble and expense of bringing in topsoil. Any soil—even subsoil—can give a satisfying lawn with regular feedings of Scotts protein-building **TURF BUILDER**®.
2. Don't be taken in by seed "bargains." You want a good lawn, not a hayfield. Cheap mixtures contain wild grasses that will plague you for the life of your lawn. Scotts seed is all good grass, perennial and weed-free.
3. Don't plant the wrong kind of lawn. Be realistic. If you need a lawn that stands up to the punishment of children and weather, choose Scotts **PLAY** seed. If appearance is paramount, Scotts **FAMILY**® or **CLASSIC**®.
