Mrs. Larry Carmicle spent Wednesday afternoon with Mrs. Glen Kuhn.

Mr. and Mrs. Edward Kelly were Sunday guests of Mrs. Sadie Shrader and Gerald at Nehawka.

Mr. and Mrs. Ples Proctor of Ashland were Sunday guests of Mr. and Mrs. Glen Thiessen.

When Should Winter Wheat Get Nitrogen?

LINCOLN—There is likely to be little difference in results when nitrogen fertilizer is applied to winter wheat in either the fall or early spring, a University of Nebraska specialist said this week.

Clinton Hoover, Extension agronomist at the College of Agriculture, noted that many farmers prefer early spring treatment with nitrogen over application in the fall.

"The wheat grower can better estimate in the spring the need for nitrogen fertilizer based on nitrogen deficiency symptoms and the moisture supply after the crop has started to grow in the spring. In addition, high protein is more likely to result from spring treatment than from fall treatment," the University soils specialist explained.

However, Hoover continued, there are certain advantages in applying nitrogen fertilizer in the fall. They include:

—A generally greater supply of fertilizer in the fall, making better buys possible.

—More time available to apply fertilizer plus generally favorable soil conditions for application.

—On soils of very low fertility, fall-applied nitrogen will usually improve stands, stooling and early growth.

"When all nitrogen is applied in the fall, it should be applied either before or after the drill not placed with the seed," Hoover advised.

This is desirable because too much nitrogen placed in contact with wheat seed can seriously reduce germination if dry soil conditions prevail for some time after seeding, he concluded.

Naturally
A congressman naturally spends lots of time fixing his fences, because that's where he sits most of the time.—Southern Lumberman.

PERU—Barbara Behns, freshman from Nehawka, and Dwight Anderson, Ceresco senior, have been named recipients of Ak-Sar-Ben scholarships for the 1961-62 academic year at Nebraska State Teachers College. The scholarships, in the amount of \$150 for the year, are given annually by the Knights of Ak-Sar-Ben to Nebraska residents who plan to carry on their careers in their home state. Miss Behns, a 1961 graduate of Nehawka High School, is the daughter of Mr. and Mrs. Leslie Behns of Nehawka. She has selected elementary education as her field of concentration. While a student at Nehawka High School, Miss Behns served as president of the Student Council, as vice-president and president of Future Homemakers of America, the Junior class president and two terms as secretary-treasurer of the pep club. She was active in band and chorus.

Cattle Grub Control Can Be Applied Now

LINCOLN — Cattlemen can treat livestock for the control of cattle grubs between now and Nov. 1, but early treatments likely will be most effective.

Robert E. Roselle, University of Nebraska Extension entomologist, says cattle grubs can be controlled with trolene boluses or coral sprays. If sprays are used, it is essential that a thorough application be made at high pressure with the nozzle close of the animals. If the spray does not reach the skin, it will not be effective, Roselle points out.

Feed containing ronnel additive is on the market and is registered for use against cattle grubs. If this is used, cattlemen should follow the directions on the label.

Roselle says that pour-on treatments with ruelene were registered this past summer. This material will be available in a few counties of northwestern Nebraska this fall. If this treatment is used, the manufacturer's recommendations must be followed closely. Ruelene also is registered as a spray.
