Weeping Water Tears Flow at Volleyball Loss

If there appear to be unhappy faces among the girls shown in the accompanying picture, that is exactly right.

The picture was taken just after Weeping Water's volleyball team had lost to Plattview of Springfield in the championship match of the Southeast Conference Meet at Louisville last week.

In fact, the tears were flowing freely just a moment before and there were a few around at the time the picture was snapped. Weeping Water once had left the court in the belief it had won the match, only to be called back to play again.

The final game was 14-12 for Plattview in several overtimes after a 6-6 tie at the end of regulation time. Weeping Water had rallied to take the second game 9-6 after dropping the opener 4-6.

Coch Truman Lytle's team advanced to the finals by beating Millard and then ousting Syracuse in two straight games in the semifinals.

Early in the season, the Weeping Water girls placed fourth in the Syracuse Invitational Tournament. They also took second in the new Eastern Nebraska Conference Tourney at Millard last month.

The current record is 13-6 with the Peru State College Tournament the finale.

Five out of six Cass County families have television and one out of five has two or more automobiles, the U.S. Dept. of Commerce said in reviewing information gathered in the 1960 census.

Census figures show Cass County had 5,963 housing units and 4,989 households had television sets. There were 994 families with two automobiles and 137 with three or more cars.

Other figures in the report: —4,118 of the housing units "were in sound condition with all plumbing"; 5,450 were occupied, 3,589 of them by owners; the "median value" of owner-occupied places was \$6,500. —1,861 units were occupied by renters, with \$71 a month the median gross rent of rented places.

—There were 165 trailer homes, the Census showed. —1,267 households had air conditioning; 5,042 had radio and 4,528 had telephones. —There were 4,730 households with washing machines, 1,363 with clothes dryers and 1,884 with one or more home freezers. —3,485 households claimed one automobile.

The conclusion: there are more of us, driving more cars, watching more television and eating more TV dinners than ever before.
