### Assessments Adjusted by **Board Here**

The Cass County Board of Commissioners met Tuesday and Wednesday at the Courthouse here. Included in business transacted was:

-Sitting as a Board of Equalization, the Board adjusted assessments against Western Sand and Gravel Co. from \$19,851 to \$37,000 for its Cedar Creek installation and from \$8,180 to \$23,000 for its South Bend installation.

-Also in its equalization work, the Board decided that no adjustment should be made in the assessment against Mc-

Donald Store, Avoca. -The Board of Commissioners instructed the County Highway Superintendent to engage Boyd Patras of Plattsmouth to sand blast, lead and paint the bridge across Weeping Water Creek southeast of Union. The bridge is a steel structure recently purchased as a used bridge from the State Dept. of Roads. The blasting and painting is an experiment to determine whether other county bridges should be so-treated.

-The Board gave instructions for three-quarters mile of new gravel application and spot rocking in School District No. 9. The work is made necessary by the district's consolidation with the Louisville district, a move

which is in progress. -The Board and Roads Dept. re experimenting with all-steel back walls for bridges, constructing them out of sheet steel obtained when a metal works here went out of business. The Board hopes the walls will have longer life and cost less to maintain and repair than conventional walls.

-The Board said Wednesday that the county's road resurfacing program outlined for this fall is about 90 per cent com-
