

Scout Week Anniversary

The 17,474 Cub Scouts, and Explorers of the Covered Wagon Council, Boy Scouts of America, will observe the 53rd anniversary of the Scouting movement during Scout Week, Feb. 7 to 13, with the theme, "Strengthen America... Be Prepared, Be Fit."

They will join nearly 5,200,000 other Scouts and leaders in every part of the nation in rededicating themselves to the Scout Oath on Friday, February 8, the actual birthday of the movement in America.

Scout Week will be observed nationally by over 130,000 Scouting units in every city and town and in thousands of villages and hamlets as well including the 17,474 in the Covered Wagon district.

This year the Scout Week observance will be conducted at the unit level. In this way we believe a boy's membership in the movement is more meaningful and colorful to him. We also like to have every member invite another boy of his own age to attend the Scout Week meeting so that he may share the excitement of the program.

The district's 239 Cub Scout packs with 9,445 members will each conduct a "Blue and Gold Open House," a "potluck dinner" with prospective members and their parents as guests. Newly-qualified Cub Scouts will be inducted. A skill, "How Scouting Began," will be put on by most packs.

Parents' night meetings will be held by nearly all of the district's Boy Scout troops. Displays of Scout hobbies will be shown, and those who have progressed in rank will be honored at formal courts of honor. Emergency preparedness skills will be demonstrated by patrols, and patrol stunts, songs, and games will precede a closing ceremony.

Explorers from the 74 Explorer units will address boy and adult groups at high school assemblies, service clubs, church groups, PTA's, and Boy Scout troops. They will collect pledge cards indicating interest in joining an Explorer unit, helping to form a new unit, or offering to serve as a consultant in a specialized field. Prospective Explorers will be invited to a Valentine's Day party.

State's Midwinter Waterfowl Count Above Last Year's

LINCOLN — Nebraska is wintering considerably more ducks and geese this year than in 1962, according to a recent aerial survey by members of the Game Commission and U. S. Fish and Wildlife Service.

This higher number does not reflect an increase in total waterfowl population, the technicians advised, since flyway and national population trends will not be known until counts from all sources are tabulated.

A virtually simultaneous count was made in the other states wintering birds to determine their waterfowl populations. Nebraska is part of the Central Flyway.

In the 1963 midwinter count, a grand total of 147,731 ducks and geese were counted as compared to 134,292 in 1962.

Mallards increased from 120,684 to 145,516 and the number of mergansers rose from 8,252 to 13,390. The number of Canada geese both large and small this year was 2,191 as compared to 2,448 in 1962.

Species observed in small numbers included 5 gadwalls, 42 green-winged teal, 14 pintails, and 579 goldeneye. In 1962, 200 green-winged teal, 530 scaup, 4 goldeneye, and 73 unidentified species were observed. Last year 28 snow geese and 11 blue geese were also counted.

Cold Storage Permit Required for Game

LINCOLN — Persons keeping game in cold storage are required to have a cold-storage permit, the Game Commission reminds Nebraska sportsmen.

The permit is easily obtained from conservation officers, Game Commission offices, and at most storage locker plants.

Game cannot legally be kept longer than 90 days after the close of the respective seasons. Exceptions are deer and antelope which may be kept until Dec. 31 of the year following that in which the animal was bagged.

Cold-storage deadlines are: grouse, Jan. 29; Wilson's snipe, Feb. 2; ducks, mergansers, and coots, Feb. 11; rails and gallinules, Feb. 22; geese, March 14; quail (north area) March 2 and (south area) March 25; squirrels, April 15; and pheasants and cottontails, April 20.

PHS 2-0 in Twin Rivers after 55-48 Conquest of Pioneers

HITS 20—Dan Schultz, Plattsmouth's 6-4 forward, led his team's scoring Tuesday night getting 20 in a 55-48 Twin Rivers Conference victory at Nebraska City.

Plattsmouth High, 2-0 in second place in the Twin Rivers Conference behind Falls City's 4-0, gets one of its toughest tests of the season Saturday night at Crete.

Crete is 2-1 in the conference, after a 53-49 loss to Falls City last week, and 6-2 overall.

The metropolitan newspapers have rated Crete in the top 10, sometimes in the top 5, among Class B teams this season.

Plattsmouth reached its 2-0 conference mark and 4-4 for the season Tuesday night by whipping Nebraska City, 55-48, on the latter's home court.

Dan Schultz paced Plattsmouth in the foulful game with 20 points, eight on free throws.

Roger Beverage contributed 12. Both fouled out in the last quarter.

Plattsmouth led at all stops, 13-7, 29-19 and 45-37.

But for trouble at the free-throw line, the Blue Devils would have won more comfortably. They hit only 13 out of 30 on free throws while outscoring the Pioneers 21-16 from the field.

Nebraska City converted 16 out of 29 free throws, little better.

Reserves Take 62-28 Loss at Nebraska City

Plattsmouth High's Reserves took it on the chin, 62-28, Tuesday night at Nebraska City, falling behind, 36-20, at the half and managing only four points in each of the last two quarters.

Bob McClanahan got all his leading 10 points for Plattsmouth the first half. He did not appear the second half.

'Gravy, Not Tater, Is Calorie Villain'

SCOTTSDALE, Ariz.—It's not the potato that adds calories, it's the fixings you put on potatoes.

"A half cup of cubed potatoes contains only 45 calories, but when you add fixings, the same 'potato' serving may contain up to 250 calories," says Kathryn Cooley, University of Nebraska Extension foods and nutrition specialist.

Miss Cooley spoke at the 1963 Nebraska State Potato Show here Thursday afternoon which included special sessions for men and women as well as judging of entries in the potato show.

"There is no need to shy away from potatoes if you are counting calories," Miss Cooley said. "But you need to cut down on the various fixings added to potatoes. Methods of cooking potatoes such as frying also can add calories."

While women attending heard the facts on the caloric content of potatoes and various methods of preparation, men in the audience heard latest developments in growing the crop.

Dr. John Wehling, University Extension plant pathologist at Lincoln, discussed late blight of potatoes. "The year 1951 was one of great shock in western

Nebraska," he said. "That was the year the impossible happened to potato farmers. They lost thousands of dollars to an epidemic of late blight of potatoes, a disease to which the area had seemed immune during the previous 30 years.

"Several more years of severe loss were to follow before a system of potato late blight forecasting enabled farmers to whip the problem by spraying at a critical time.

"Late blight is not new to the world, just to western Nebraska," Dr. Wehling said. "It was blight which sent large numbers of the Irish fleeing to the U.S. So dependent were the Irish on the potato for food that when the blight hit in 1845, thousands starved.

"Much has been learned about late blight since then. The classification of infection potential of various potato varieties has made the late blight forecasting system more efficient. Growers of the high rated varieties—Dance and Excel—must have a regular spray program regardless of the warning system because once the blight starts in these varieties, spraying cannot save them.

"Growers of the moderate

rated varieties—Progress, Navajo, Norland, Red Pontiac, Red Lasoda, Haig and Triumph—can wait until warned that conditions are right for development of the blight and then spray. Growers of the low rated varieties—Kennebec, Bounty and Bianca—can wait until the fungus actually appears before spraying, Dr. Wehling said.

E. L. Atkinson, Federal Food Drug Administration, Kansas City, Mo., said that "those who recommend and use agricultural chemicals should have the responsibility to use them wisely. Growers and applicators must understand that they should use the pesticides according to the directions on the label—in the amount specified, and at the time specified."

"Wise use of chemicals also is important from the standpoint of the person who is applying these chemicals," said Robert E. Roselle, University Extension entomologist, Lincoln. "Some chemicals are more hazardous than others, so it is important to handle them according to directions on the package."

Birth Defects Clinic Continues Under Grant

The March of Dimes sponsored Special Birth Defects Clinic and Treatment Center at Childrens Memorial Hospital in Omaha will continue this year under a renewal grant of \$21,369 from Nebraska county chapters of The National Foundation — March of Dimes.

Announcement of the continuing grant was made jointly by Mr. Ward Stoddard, Administrator for the hospital and Bob Corn, Papillion, State March of Dimes Chairman.

The special project under a team of specialists from Childrens Memorial Hospital medical staff, representing faculty members from both Creighton and Nebraska University medical schools was inaugurated just a year ago.

It is one of a growing network of special centers across the nation designed to bring a medical team approach to the problems of birth defects and deformities in children, said Dr. Theodore R. Pfundt, Medical Director of the project.

A similar network of March of Dimes special center projects to serve children crippled by rheumatoid arthritis has also been established. State March of Dimes Chairman Corn reported. In Nebraska the special center for children with arthritis is located at Creighton Memorial St. Joseph's Hospital in Omaha and is likewise supported by Nebraska March of Dimes Chapters, Corn said.

J. F. Kennedy, President: "It is a paradoxical truth that tax rates are too high today and tax revenues are too low—and the soundest way to raise revenues in the long run is to cut tax rates now."
