Results of operations of The Lincoln Telephone and Telegraph Company were reported Feb. 5 at the annual stockholders meeting held at Lincoln.

President Thomas C. Woods, Jr. said operating revenues for 1962 were \$16,124,938, an increase of 5.36% over 1961. Operating expenses, excluding taxes, were \$10,620,887, an increase of 6.97%. Federal, state and local taxes for 1962 were \$2,695,374.

Total plant facilities in service at year-end had a value of \$63,695,451, Woods said. This is a net increase of \$4,701,790 over 1961. In addition, plant under construction amounted to \$519,463.

Operating income available for dividends was reported by Controller Bruce J. Sievers to be \$1,741,521 last year, an increase of \$48,387 over 1961. Earnings per share of common stock outstanding at year-end 1962 were \$4.95 compared with \$4.79 at year-end 1961.

Vice-President Merle M. Hale reported a net gain of 4,694 telephones during the year bringing the total at year-end to 158,988. Long distance calls totaled 6,990,338, an increase of 6.5%. 65 of the 126 exchanges are now equipped for Direct Distance Dialing and 92% of the telephones are dial operated.

Dial conversations were completed at Weeping Water, York, Alexandria, Shickley, Tobias and Guide Rock, and dial equipment was replaced at Table Rock and Garland. The company's first complete underground distribution system was installed at Shickley for both rural and long distance lines.

This involved 400,000 feet of underground wire and 30,000 feet of "plowed-in" cable and will eliminate service interruptions resulting from wind and sleet storms.

Additional switchboard positions were added at Lincoln, Hastings and Plattsmouth and additions to dial central office equipment were made at Lincoln, Ashland, Waverly, Syracuse and Milford. 133 toll circuits were added during the year. Additions to exchange buildings, preparatory to dial installations, were begun at Geneva and Nebraska City.

A new Lincoln-Hastings microwave system was cut into service in August with 56 channels in service. A Lincoln-Geneva system with 22 channels is also nearing completion. The company also has operating microwave systems between Lincoln, Hebron, Wahoo and David City. Several new services were added. These include Wide Area Telephone Service (WATS) which provides statewide (or up to nationwide) long distance service at a flat monthly rate; dial TWX service by which teletypewriters may be interconnected through the nationwide direct distance dialing system; data line teletypewriter service for data transmission at high speeds; and personal paging service by which individuals may receive messages from telephones on small radio receivers carried on the person.
