Dec. 7 Weigh-in Date For 1964 'Gain' Contest

By CLARENCE SCHMADEKE
County Extension Agent

Saturday, Dec. 7, is weigh in date for 4-H calves to be entered in the 1964, 4-H Beef Rate of Gain and Carcass contest.

This information is to let all interested youth to make their plans for 1964. For more information in detail contact the County Extension office.

The 1963 program created much interest.

Twenty-five calves entered in the 1963 program by Cass County 4-Hers were weighed in at the finale of the contest at the County Fair. Calves were scored on rate of gain, live placing at the fair, selling price at Omaha, and carcass placing in the cooler of the packing house.

The steer winning the contest scored 93.1 points out of a possible 100 total. This steer gained 594 pounds for 2nd in rate of gain, placed 3rd in live rating, brought the top selling price along with a few other steers and its carcass was judged.

Search Begins for 11,000 Undiscovered Nebraska Diabetics

The search for 11,000 undiscovered diabetics in Nebraska began Sunday, November 17, with the start of the 1963 Diabetes Detection and Education Drive of the Nebraska State Medical Association.

Announcement of the 15th annual Drive on November 17-23, aimed at controlling diabetes - one of the nation's seven top killers - was made by Morris Margolin, M.D., Omaha, chairman of the Nebraska State Medical Association's Diabetes Committee.

He urged everyone in Nebraska to take advantage of the free urine sugar tests offered by physician members of the Nebraska State Medical Association throughout the state.

Early detection, the key to mastery of this dread disease, is the goal of Diabetes Week, which has been officially proclaimed in Nebraska by Governor Frank Morrison.

This unique non-fund raising drive, sponsored by the Nebraska State Medical Association in cooperation with the American Diabetes Association, has led to the discovery of more than 1,000 diabetics in Nebraska since its inception fifteen years ago.

Power Usage Up, Consumers Reports

COLUMBUS — An analysis of operations report for Consumers Public Power District was released today. The report covers a 12-month period ending Sept. 30, 1963, and shows increases in kilowatt-hour sales, operating revenues, expenses, and customer count.

The report, prepared by R. W. Beck and Associates, utility analysts and engineers, listed operating revenues of Consumers consolidated Eastern and Western systems amounting to \$24,519,863, a 5.6 per cent increase over the same period last year. Operating expenses amounted to \$16,322,032, increase of 2.1 per cent.

Net capital additions in the consolidated systems necessary to improve service to the growing demand of customers totaled \$7,658,542 during the 12-month period.

The sale of electricity by Consumers' Eastern system increased 20,993,962 kilowatt-hours, or 8 per cent over the same 12-month period of last year. This increase is due primarily to more use of electricity by residential, commercial, industrial, and municipal customers. The same added use of electricity along with sales to the U.S. Bureau of Reclamation increased energy sales in the Western system to 14,398,987 kilowatt-hours or 10.2 per cent.

The combined average customer count for Consumers two systems showed an increase of 1,464 over the same 12-month period a year ago.

The report also presented payments "in lieu of taxes" made by Consumers for the 12-months ending Sept. 30, 1963, totaling \$1,082,926.

Payment to the Plattsmouth (Cass County) district totaled \$2,190,750.

Bow Season on Fish Ends Dec. 1

LINCOLN — Bow and arrow and spear fishing seasons will close Dec. 1, the Game Commission reports.

Both game and non-game fish were legal for archery anglers. Only non-game species were open to spear fishing. The season

opened April 1 and hours are sunrise to sunset.

Forty ships from some 20 nations are currently engaged in the International Indian Ocean Expedition. Of major importance will be studies in marine biology, for although this ocean contains the world's most productive fishing grounds, it has an unusually high fish mortality rate.
