GREEK CAMP SHELLED

INSURGENTS ARE BOMBARDED BY FOREIGN FLEETS.

Some of the Shells Fall Into the City of Canea, and a Number are Said to Have Been Killed-Flag of Greece Still Flies Over the Place.

Greek Camp Is Shelled.

Later reports as to the bombardment by the foreign fleets of the insurgent camp near Crete are to the effect that the English men of war opened the bombardment and the others followed. The Kaiserin Augusta fired mellinite shells. The commander of the Greek man of war Hydra cleared for action in case the necessity should arise. Some of the shells fell in the town of Canea, raising clouds of dust. It is rumored that several persons were killed and wounded. When the firing ceased the Greek flag was flying over the insurgent camp.

News of the bombardment of the insurgent camp near Canea by the warships Sunday caused tremendous excitement in Athens. It is said great damage was done the Christian camp and that several were killed and wounded by the shells.

A Paris dispatch states that the powers have accepted the proposal to grant autonomy to Crete. Even if this is true it would naturally at once be followed by an ultimatum to Greece. This probably accounts for the rumors on the bourse regarding an ultimatum.

MAY BE A BIG STRIKE.

Would Involve Fifty Thousand Men

In Chicago Building Trades. Paralysis of building operations for an indefinite period this spring in Chicago and Cook County and an immense strike in the building trades, involving 50,000 men are not improbable contingencies. Unless a disagreement is settled which sprang up recently between the Masons' and Builders' Association and the Bricklayers' union. members of both organizations believe Chicago will witness a greater labor conflict than that which was waged in the building trades for nine weeks of 1887. That strike, which affected thousands of workmen in a dozen of the building trades, was the result of a quarrel between the Masons' and Builders' Association and the Bricklayers' union.

The question of a general strike has been discussed at the last two meetings of the union. Some members advocated it. If the 4,000 union bricklayers engage in a strike it will force into idleness all other building crafts. Plasterers, hod carriers, lathers, carpenters and the rest can do nothing while the bricklayers and stonemasons refuse to work, and will not try under the present system. If the present differences are unsettled by April 1 arbitration will be suspended and strikes which must become general, will follow.

RAIN CAUSES FLOODS.

Rivers in Kentucky, West Virginia

and Ohio Are on the Rampage. Reports received at Cincinnati Monday show that as a result of thirty-six to fortyeight hours' rain the rivers are on a rampage all through eastern Kentucky, West Virginia and eastern Ohio. Great quantities of logs, ties and many hogs and cattle have been carried down on the currents.

Considerable anxiety is felt over the rapid rise in the Ohio River. The stage is forty-five feet and indicates the danger point. The river reached forty-five feet shortly after noon Monday and was rising seven inches an hour. Residents along the river front were moving out. Reports from all tributaries tell of flood.

WILL QUIT L. A. W.

Cyclists of Western States Are Forming a New League.

The bicycle men of Butte and other points in Montana have determined to join with Colorado and far western states in secession from the L. A. W. A meeting will be held in Butte shortly to form the Montana branch of the new organization. The cause of the secession is the refusal of the older body to allow divisional option as to Sunday racing, as only that kind can be made to pay in these states. Colorado, Utah, Wyoming, Idaho, Montana, Nevada, Washington, Oregon, California, Arizona and New Mexico are expected to join the new league.

Smoking Is a Bar.

Mrs. Louise Pitt Yocum, Dolores County (Kansas) superintendent of schools, has refused a teachers' certificate to Prof. Victor C. McGirr, principal of the Rico public schools, because he smokes. Mrs. Yokum takes the ground that a person who smokes is disqualified to teach in public schools because the teachers in that state are required by law to instruct children against the use of tobacco.

Great Chess Man Dead.

A dispatch from Paris says that Dr. Steinitz is dead at Moscow. Wm. Steinitz was born at Prague in 1836. He won the chess championship of the world in 1866, and since then he has won and lost it sevveral times, last month being defeated by Lasker, losing the championship for the last time.

Catholic Preaches at Harvard. Rev. Father Fidelis (James Kent Stone), of St. Joseph's monastery, Baltimore, preached in Appleton Chapel at Harvard Sunday evening, in response to an invitamion from the university faculty. This is The third time that a Roman Catholic has

preached in the Harvard chapel. Judge Seymour Dead. Augustus Seymour of Newbern, N. C., judge of the United States district court of the eastern district of North Carolina, died in New York Friday of cancer of the stomNO WARSHIPS TO GO TO CUBA.

Has Called for Them. It can be stated on the best authority that so far, at least, there is no reason for ap-Ruiz, who was found dead in his cell in the jail at Guanabacoa, Cuba, will lead to an international complication. The matter was brought to the attention of the state department in the latter part of the past week through complaint of some of the friends of the doctor in this country. The allegation was that the man had been imprisioned beyond the period allowed by the treaty for an American citizen to be kept in jail without the lodgment of charges and that he had been murdered by his jailers.

Consul General Lee was immediately directed by cable to investigate the affair, although it appeared from his dispatches that he had already had his attention directed to the case. The official reports of the Spanish officers are said to show that Ruiz committed suicide while in jail, but this has not yet been communicated to the department of state. Meanwhile Consul General Lee is investigating the matter and the state department is awaiting his

In the absence of this, the department officials feel no apprehension of any complications and all stories that warships have been called for by Gen. Lee, or that this government is making ready to take forcible measures in the case are without foundation.

Dr. Ruiz was a naturalized American citizen. He studied and practiced dentistry in Philadelphia for some time and returned to Cuba about the beginning of the present insurrection. The charge upon which he was arrested was conspiracy in having participated in the derailing of a train carrying Spanish troops as a result of which three Spanish officers were captured by the insurgents.

MET A HORRIBLE DEATH.

Grip of a Cable Car Catches a Work-

man in a Conduit. John Lagalle, 26 years old, a track re pairer for the Brooklyn Avenue Cable work in a cable conduit. Lagalle was replacing a broken pulley wheel and was busily engaged when surprised by the approach of a grip. Catching Lagalle's clothes the grip doubled him up and hurried him along through the narrow conduit. Thumping against the sides his body cable. The car passed on with the gripman innocent of what had happened. cut open and his body was horribly mutilated. He lived but a short time.

WILL APPOINT HANNA.

Gov. Bushnell Settles the Ohio Senatorial Matter.

Gov. Bushnell of Ohio gave out the folowing statement to the press Sunday night: "When Senator Sherman resigns to enter the cabinet of President McKinley I will appoint to succeed him Hon. Marcus' A. Hanna of Cuyahoga County to serve until his successor is chosen by the Seventy-third general assembly of the state. I trust this will meet with the approval of the people."

A NEW HARRISON BABY.

An 8 1-2 Pound Girl Arrives in the Ex-President's Family.

A baby girl weighing 81/4 pounds wa born to Mr. and Mrs. Benjamin Harrison at Indianapolis on Sunday morning. Mother and child are doing well. Mr. and Mrs. Harrison were married in St. Thomas church, New York, April 6, 1896. The expresident is in his 64th year.

An Iron Mountain Holdup. News has been received at the marshal's office in Muskogee, I. T., of an attempt to hold up a train on the Iron Mountain road at Watova. When the north bound accommodation train took the siding at Wa-

tova, two masked men entered the coach and compelled Conductor Wallace to hand over the few dollars in silver that he carried. At this juncture the regular passenger train pulled in. It had been the intention of the robbers apparently to hold up this train, but the alarm had been given, and a crowd of armed citizens gathered so quickly that the outlaws sought safety in flight.

New Scheme of Huntington's.

It is stated that Collis P. Huntington has a corps of engineers in the field making a preliminary survey for a railway from the port of Alvarado, south of Vera Cruz Mexico, to the port of Salina Cruz, on the Pacific coast, and that if he can secure an advantageous route he will ask the government for a concession for operating the line in connection with the Pacific Mail steamers, thus doing away with the Panama route.

Double Connecticut Tragedy.

When he awoke Sunday morning the 10 year-old son of Postmaster Chapin of Falls Village, Conn., found the corpse of his mother in the dining room, and near by the body of Charles Mead, son of Rev. H. H. Mead. Near by was a discharged revolver. wheat, No. 2, 89c to 91c; corn. No. 2 The supposition is that Mead killed Mrs. Chapin and then himself.

Roloff Flees to Cuba.

It is reported Gen. Roloff, the Cuban against whom an indictment was recently secured in New York for his alleged connection with a filibustering expedition, and whose bail bond of \$2,500 was forfeited by his non-appearance when his trial was called in Baltimore last week, has gone to Cuba.

Leaves a Big Fortune,

A dispatch from Rome says that Mrs. Hickson Field of New York, mother of Frincess Brancacco, the queen's lady in waiting, died Thursday night. She leaves prime natives, \$3,00 to \$4,50; lambs, fair an immense fortune.

Daniel McCarthy Hanged. Daniel McCarthy, a printing house employe, was hanged in Chicago Friday for

jealousy. He was strangled to death.

RURAL FREE DELIVERY.

State Department Denies Gen. Lee Experiments Demonstrate It would

Cost \$40,000,000 a Year. The postmasters and patrons at every one of the forty-four postoffices where prehension that the case of Dr. Richard rural free delivery has been in operation declare in favor of the plan. The sentiment in favor of the adoption of the comprehensive scheme is unanimous, representing opinions given both by the head of each postoffice and patrons. The obstacle, however is the tremendous cost involved. When the experiment was first contemplated it was roughly estimated rural free delivery to cover the whole country would involve an annual expenditure of over \$20,000,000, but experience already had shows \$40,000,000 is a conservative figure.

The cost was found, of course, to vary with the character of the country where it was formed, sparsly settled regions naturally heavily increasing the expense. The maximum cost of delivering each piece of mail matter was between 9 and 7 cents at Hartsville, Ind., and less than 7 mills at Greenfield, Franklin County, Mass. The average cost per letter is a little over 3 cents in these rural deliveries.

There are many places, however, where the delivery of mail is impossible, and these aggregate a large portion of the country. The least difficulty in the general adoption of the scheme is in the eastern states, though a number of western points, like the country adjacent to Denver, Colo. show comparatively small cost. The officials believe the service can be advantageously established in a number of well settled regions. Postmaster General Wilson has not yet drafted his report, but it is believed he will demonstrate the value of the continuance of the experiment for a year.

NEW BREED OF CATTLE.

Kansas Stock Raiser Develops the "Dream" of Cattlemen.

Gen. W. W. Guthrie of Atchison, Kansas, owner of a large ranch in Chase County, and a stock farm in Atchison County, has just made public the result of an experiment in stock breeding, covering a period of eight years. He claims to have developed an entirely new breed of cattle, which has been the dream of stock raisers Railway Company, Kansas City, met a for years, and which for the present he has horrible death Sunday while engaged in named polled Herefords. He has succeeded in developing an animal with all the main markings of a Hereford, but which is without horns. He began his experiments with the belief that a strain of cattle could be developed from the Hereford that would meet more satisfactorily the requirements for beef and milk, and he is confident that smashed three large pulleys before he was his experiments have been successful. He finally dislodged and wedged beneath the never abandoned the idea that horns could be bred out of the Hereford strain, and now, after years of experimenting, he When Lagalle was removed his head was has a herd of twenty-seven heifers and two bulls that are polled Herefords. The new breed is somewhat larger than the Hereford and with sparer hips, but retains the natural markings. Gen. Guthrie believes that the new breed is superior to the Hereford as to beef quality, and is convinced that they will meet his expectations as to milking qualities.

NUN IN A TRYING PLACE.

To Become an Heiress She Must Renounce Her Vows.

Miss Carrie Taylor Jewell, a young and beautiful nun, who was for two years an inmate of the Convent of the Sacred Heart at the corner of Taylor and Maryland Avenues, St. Louis, has been placed in a trying position by the will of her late uncle, who died in New York a short time ago, leaving an estate of \$200,000. The young woman is made a beneficiary to the amount of \$25,000, provided she will renounce her vows and leave the Catholic church.

The will was made seven years ago, and at that time the girl had not taken the vows of a "religious," as the nuns of the Sacred Heart order are known.

Woman Suffrage Killed.

After four hours of sharp and sometimes pitter debate the woman suffrage bill was killed in the lower house of the territorial legislature at Guthrie, O. T. The measure was defeated by a vote of 11 to 13. A majority of the Populists opposed the

Fatal Gasoline Explosion. Eight people were terribly burned in the

Polish quarter in Cleveland by an explosion of gasoline. Five will die.

STATE OF NEBRASKA

NEWS OF THE WEEK IN A CON-DENSED FORM.

University of Nebraska Observes the Charter Under Which that Great Institution Is Conducted.

Charter Day Exercises.

The University of Nebraska celebrates in a more striking way each year the anniversary of the granting of the charter under which that great institution is conducted. This year, as usual, on February 16, the buildings were all thrown open and the public invited to come and get acquainted with what is going on every day in the way of work and to see the apparatus and appliances in its prosecution. In the forenoon occurred a reception to the orator of the day, Dr. Carter, at the residence of the chancellor. In the afternoon the gymnasium exhibit by the young women of the University was gone through with. The drill of the university battalion on the campus was as great a success as could be asked, the evolutions being gone through in a creditable manner. The governor and his staff received the cadets and expressed themselves as being greatly pleased with their work. The charter day exercises ended with the evening gathering at the Lansing theater to hear the address of Franklin Carter, Ph. D., LL. D., president of Williams College. Chancellor MacLean announced that at the meeting of the board of regents on February 15, such action had been taken as would make it the custom in the future once, as has always been done in the past. Those students who complete their work in such time as to make it more convenient will hereafter be able to graduate and receive their degrees at the charter day celebration, instead of at the regular commencement time in June. Such action has been contemplated for some time and is intended to do away with the hardship that has made it necessary for students who do outside work in order to make their ex-A letter was read from ex-Regent Victor one dollar's worth of insurance on it. Rosewater, expressing regret that he was unable to be present. Dr. Carter addressed | Industrial School Boys Give Trouble the assemblage on "Thoughts on University Work," and was well received.

Woman Fails to Hold. on account of the killing of John Ricker for some time to get away. last November in a house of ill-fame kept by her, has come to an end. It took the jury thirty minutes to bring in a verdict of acquittal. Ricker with two companions attempted to enter the house forcibly after being denied admittance, when several shots were fired on them from an upper and there is a good prospect of his coming window, one of which struck Ricker, killing him instantly. The Sopher woman The skins bring a fair average price and and a piano player named Spencer were immediately arrested and narrowly escaped lynching at the hands of Ricker's ailments. friends the following night. Spencer was tried for murder at the December term of court and convicted of manslaughter. He is now serving a ten-year term in the penitentiary,

Accommodation Train Wrecked, The regular train of the Chicago, St. Paul, Minneapolis and Omaha Railway met with an accident between Ponca and Newcastle Saturday, the passenger car

and one empty box car being wrecked and burned. Seven passengers were on board, but all escaped injury excepting Mike captured, Waters, a traveling man, whose feet and hands were badly burned. Burglars Take Clothing. Burglars broke the glass front door to P

G. Shanstroin's clothing store at St. Paul and stole a lot of ready-made clothing, underwear and fancy articles. The loss is estimated at from \$200 to \$300. The rob- Norfolk Cold Storage Company on claim bers got onto a hand car with their booty and escaped over the Union Pacific tracks, pany will settle up and continue n busi The men have not been traced.

Twenty-Two Cars of Corn. By far the largest shipment of grain from that section of the country went out of St. Edward one day last week. It was a special train of twenty-two cars. Not-

withstanding this shipment, from six to

ten cars are also shipped daily. Sullivan Gets the Judgeship. Governor Holcomb has appointed H. M. Sullivan of Broken Bow to succeed William L. Green as judge of the Twelfth judicial district of Nebraska. One of the strongest competers of Sullivan was W. D. Oldham of Kearley. Important Case Decided.

The supreme court has handed down an opinion in the case of William J. Bryan and others, appellees, against Elmer B. Stephenson and others, appellants. This is the celebrated "gold bond" case, which was won by Bryan in the district court of Lancaster County, and appealed to the supreme court by Stephenson. The appellees, Bryan and others, as residents and Anniversary of the Granting of the taxpayers of the city of Lincoln, instituted this action to restrain or enjoin the execution and delivery by the city, mayor and city council, of certain funding bonds, amounting to \$534,500 to Stephenson. The trial resulted in a judgment in favor of Bryan, and the sale of the bonds were perpetually enjoined. One of the main points contended for by Bryan was that it was stipulated that these bonds should be made payable in gold. This was the principal ground upon which he brought his action in the lower court.

Following is the syllabus: "The clause, when the same shall have been authorized by a vote of the people" contained in section 66, subdivision xxi, article i, chapter xiii-a Compiled Statutes, under heading "Cities of the First Class," means authorized by a majority of the voters of the city.

"A proposition to authorize the issuance of funding bonds was submitted to the electors of a city pursuant to the provisions of such section of the statutes at the same time and place as the general city election. Held: Under the facts shown, to be but one election; that the presumption is that all the electors voted at such election and the proposition to work its adoption must have received a majority of all the votes cast at said election.

The decision of the lower court is affirmed. The important feature of this opinion is that it lays down a line of judicial finding that plainly foreshadows to confer degrees twice a year instead of the opinion of the supreme court on the vote for the constitutional amendments last fall. The decision distinctly holds, in opposition to Judge Maxwell, that a proposition must receive more than onehalf of the votes cast for any candidate at said election.

Planing Mill Burns.

The large planing mill of F. L. Pade & Son at Hastings, burned to the ground. It is not known how the fire originated, but it penses while in the university, to stay for is thought there must have been some fire several months, waiting for the regular in the engine room and as there were commencement day, when they must be always plenty of soft wood shavings present in order to receive their diplomas around it is quite likely that the fire started and degrees. Mrs. A. L. Goodrich of Oakland dropped a hot iron with which she was curling he hair and it struck her eye. It is feared she will lose the sight of the eye.

A second raid was made on the place in Gering which was supposed to keep intox icating liquors. This time the officers found nothing of a contraband nature.

Munn Davis, a former resident of Wahoo was recently murdered in California by couple of half-breed Indians who took hin out to show him a mining claim.

Never go from a warm atmosphere into a cooler one without keeping the mouth closed, so that the air may be warmed in its passage through the nose before it reaches the lungs.

Never strain the voice in the effort to speak while hoarse. Wait until the hoarseness is recovered from, or the voice may be permaneutly injured or difficulties of the throat produced. Never stand still in cold weather for any length of time in the outdoor air,

especially after having taken active ex-

ercise; and never stand long on the ice or snow, or where the person is exposed to cold wind. Many believe in withholding salt, pepper, etc., from the sick. This is wrong. Whatever is done toward making the

diet desired and appreciated promotes its digestion. Water and air are food-stuffs. Water acts as a carrying agent to transport foods to the different tissues. The oxygen of the air is need for the tissues and fluids of all forms of animal

The food of a person doing ordinary work should be proportioned as follows: Four ounces of proteids or albuminoids, four or five ounces of fats (increase this as the necessity for work or heat increases), eighteen to twenty ounces of starches, and one ounce of

A mustard-plaster ought never to blister the skin. If it burns too much an extra piece of muslin can be placed between it and the body, and can be removed when the patient becomes accustomed to the heat. Mix the mustard with equal quantities of flour and ground ginger.

It has been found by experiment that tea retards digestion. An infusion of 1 per cent. of tea causes a perceptible delay; a 3 per cent, infusion will delay the digestion, sometimes, as much as twelve times the normal period; a 10 per cent, decoction arrests the digestion of all starchy foods.

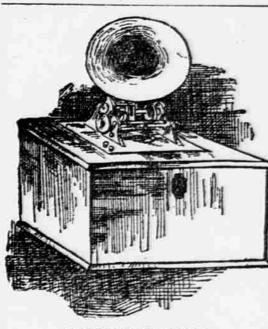

The eyball rests in a cushion of fat, by which it is surrounded on every side. When the system becomes greatly emaciated through diseases, this fat is absorbed, and the eye sinks further into the head, thus giving the sunken appearance so common in disease.

Butter is highly recommended as a food for pulmonary and other invalids. Therefore, if butter is agreeable to the individual, and occasion no gastric or intestinal disorders, it would seem an important adjunct to the present dietetic treatment. Then, too, if it is an advantage in this condition, why not in other were facts are indicated?

THE SCENTOGRAPH.

The Smelling Machine Is One of the Wonders of the Moment.

A machine which he claims will take its place by the side of the phonograph has been invented by Louis Kramer, a Missourian, who moved to Binghamton, N. Y., about a year ago. It is used to receive and magnify odors of all kinds and is called a scentograph. A patent is to be applied for, but it has been already practically tested. It will take a liquid heretofore regarded as odorless and distill the most delicate perfume. A drop of perfumery or essence placed on the receiver will produce an odor that would in a very short time cause symptoms of suffoca-

SMELLING MACHINE.

tion. The grocer might utilize it in detecting adulteration in goods, while it has been suggested that bank paper can be tinctured with a special scent, imperceptible to the ordinary sense of smell, but which could be easily detected when placed in the scentograph, lessening liability of counterfeiting. It is also claimed that the machine will be popular in homes, hospitals, sick rooms, where the air can be kept permeated by most delightful fragrance. The machine is about twelve inches square and eight high. Mr. Kramer says it can be manufactured for \$50. It is thought he will have no trouble in obtaining financial aid for organizing a company to place is on the market as soon as the patent is granted.

At Long Range.
