Why McCormick Changed from the Left to the Right Hand Binder.

It has been said that the convenience of one age become the necessities of the next; but no ordinarily sane man will contend that the necessities of one age should become the inconveniences of the next. When binding was done by hand the left hand cut harvester was a necessity. The grain fell on the platform of the harvester and was delivered into the receiver with its heads towards the rear of the machine. The men stood in the receiver facing the grain. With the left hand machine the heads of the grain are at the left hand of the man doing the binding, so in taking out the bundle with the band around it, whether the man turned to the front table or to the back table he kept his position toward the bundle itself—that is, with the heads towards his left hand; hence, in making the tuck

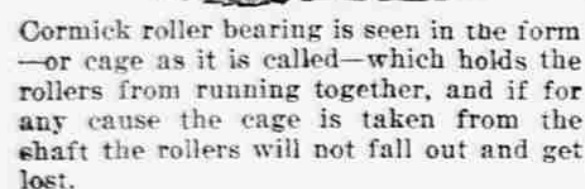

he shoved the ends under the band towards the heads. Grain is handled by the shocker by grasping into the heads, as shown in the illustration, and the tuck should therefore be toward the heads, so that it will not pull out.

The hand binding harvester with men to do the binding is out of date and so is the left hand machine, which has been superseded by the McCormick Right Hand Open Elevator. The success of which makes it seem highly probable that there will be no progressive manufacturer building left hand machines in three years.

The application of roller bearings to grain cutting machinery was made by J. G. Perry in 1890, and his patent, No. 86,584, for an improved reaper, showed and described various ways of using roller and ball bearings in harvesters.

Unquestionably the most practical and satisfactory application of roller bearings to binders and mowers has been made by the McCormick Harvesting Machine Company. The particular form used by them was patented in 1882 and is now to be found in all McCormick machines. The especially valuable feature of the Mc-

Cormick roller bearing is seen in the form—or cage as it is called—which holds the rollers from running together, and if for any cause the cage is taken from the shaft the rollers will not fall out and get lost.

The methods of the McCormick Company result in an annual saving of many thousands of dollars to the farming public. New devices are not embodied in their machines until long and oft repeated trials have shown them to be practical. It has been the same with roller bearings as with everything else—McCormick experimenting is done at McCormick expense, and not at the expense of the farmers, who are too often duped by manufacturers who rush into print for notoriety and bull the market with impractical forms.

THREE HAPPY WOMEN.
Each Relieved of Periodic Pain and Backache. A Trio of Fervent Letters.

Before using Lydia E. Pinkham's Vegetable Compound, my health was gradually being undermined. I suffered untold agony from painful menstruation, backache, pain on top of my head and ovarian trouble. I concluded to try Mrs. Pinkham's Compound, and found that it was all any woman needs who suffers with painful monthly periods. It entirely cured me.

Mrs. GEORGE WASS,
923 Bank St., Cincinnati, O.

For years I had suffered with painful menstruation every month. At the beginning of menstruation it was impossible for me to move for more than five minutes. I felt so miserable a little book of Mrs. Pinkham's was house, and I sat right down and read it. Lydia E. Pinkham's Vegetable Compound. I can heartily say that to-day I woman; my monthly suffering is a thing shall always praise the Vegetable Compound done for me.

Mrs. MARGARET ANDERSON, 363 Lisbon St., Lewiston, Me.

Lydia E. Pinkham's Vegetable Compound has cured me of painful menstruation and backache. The pain in my back was dreadful, and the agony I suffered during menstruation nearly drove me wild.

Now this is all over, thanks to Mrs. Pinkham's medicine and advice.—Mrs. CARBIE V. WILLIAMS, South Mills, N. C.

The great volume of testimony proves conclusively that Lydia E. Pinkham's Vegetable Compound is a safe, sure and almost infallible remedy in cases of irregularity, suppressed, excessive or painful monthly periods.

Veneering in Place of Paper.
Wood veneer is being used to some extent for doing up bundles instead of paper. Curtain pole manufacturers, for instance, when shipping or delivering poles in small lots wrap them up in veneer. It costs a little more than paper, not much, and it is much better for the purpose. Poles thus wrapped are less likely to be creased by the cords tied around them, and the veneer is a better protection from bruises in handling. The veneer used for this purpose is usually of elm wood and made in the same factories where the poles are made. Veneer is also used for wrapping up picture moldings.—Philadelphia Record.

PHYSICIANS BAFFLED.

Prof. R. S. Bowman, Instructor of Natural Science in Hartsville College, Cured of a Severe Illness by Dr. Williams' Pink Pills for Pale People After Physicians Failed.

From the Republican, Columbus, Ind.
Prof. R. S. Bowman, the able instructor of natural science in the famous Hartsville (Ind.) college, is well and favorably known not only as an educator, but also as a minister of the gospel, as for a number of years he was pastor of the United Brethren Church at Charlotte, Mich., before coming to Hartsville.

Some time ago he had a severe illness, which was cured almost miraculously. A reporter, hearing of this, interviewed him regarding his experience. Prof. Bowman was in the midst of his work when the reporter called, but he cheerfully gave him a hearing.

"A year ago last fall," said the Professor, "I broke down with nervous exhaustion, and was unable to properly attend to my duties. I tried different physicians, but with no relief, and also used many different proprietary medicines, spending almost fifty dollars for these medicines

PROF. R. S. BOWMAN.

alone. I then succumbed to a siege of the grip in the middle of winter, and was left in a much worse condition. My kidneys were fearfully disordered, and my digestion became very poor. I was indeed in a bad condition.

"A minister in conference learning of my condition advised me to try Dr. Williams' Pink Pills for Pale People. I had heard much about the wonderful curative powers of this medicine, but it was with reluctance that I was finally persuaded to try it, as it seemed that nothing could do me any good. However, I procured three boxes of pills and took them strictly according to directions. By the time the last dose was taken I was almost cured, and in better health than I had been for years. I continued using the pills awhile longer and was entirely cured. I can heartily recommend Dr. Williams' Pink Pills for Pale People."

Such was Prof. Bowman's wonderful story, which was further indorsed by the following affidavit:

Hartsville, Ind., March 16, 1897.
I affirm that the above accords with the facts in my case. R. S. BOWMAN.

Subscribed and sworn to before me this 16th day of March, 1897.

LYMAN J. SCUDDER, Notary Public, State of Indiana, ss.

Dr. Williams' Pink Pills for Pale People contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are sold in boxes (never in loose form), by the dozen or hundred at 50 cents a box, or six boxes for \$2.50, and may be had of all druggists or directly by mail from Dr. Williams' Medicine Co., Schenectady, N. Y.

Dishonored Drafts.
When the stomach dishonors the drafts made upon it by the rest of the system, it is necessarily because its fund of strength is very low. Toned with Hostetter's Stomach Bitters, it soon begins to pay out vigor in the shape of pure, rich blood, containing the elements of muscle, bone and brain. As a consequence of the new vigor afforded the stomach, the bowels perform their functions regularly, and the liver works like clock work. Malaria has no effect upon a system thus re-energized.

Balks Telegraph Operators.
Chinese cannot be telegraphed, and to meet this difficulty a cipher system has been invented by which messages in that language can be transmitted over the wires. The sender of the message has no need to trouble himself about the meaning, and, in fact, may be telegraphing all day without the slightest idea of the information he is sending, for he transmits only numerals. It is very different, however, with the receiver of the message at the other end, as he must have a code dictionary, and after each message is received must translate it, writing each literary character in the place of the numeral that stands for it. Only about an eighth of the words in the written language of China appear in the code, but that has been found sufficient for all practical purposes.—Philadelphia Ledger.

Life of an Ant.
Sir John Lubbock, the naturalist, has been experimenting to find out how long the common ant would live if kept out of harm's way. On Aug. 8, 1888, an ant which had been thus kept and tenderly cared for died at the age of 15 years, which is the greatest age any species of ant has yet been known to attain. Another individual of the same species of ant (formica ruginosa) lived to the advanced age of 13 years, and the queen of another kind (Lasius niger) laid fertile eggs after she had passed the age of 9 years.

Footgear in Japan.
One of the most striking sights that takes the attention of the traveler in Japan is that of the wooden sandals worn by the 35,000,000 people. These sandals have a separate compartment for the great toe and make a clanking noise on the street. Straw slippers are also worn, and a traveler starting out on a journey will strap a supply of them on his back, that he may put on a new pair when the old is worn out. They cost but a cent and a half a pair. They are rights and lefts and leave the foot free to the air. We never see those deformities of the foot in Japan which are so frequent in this country. They are never worn in the house, but left outside the door. Passing down the street you may see long rows of them at the doors, old and new, large and small.

A Famous Circus Rider.
James Robinson, the famous bare-back rider, who began his career in 1845, is still living in Mexico, Mo., with his wife. The feat which won him fame was performed in 1849. This was turning a back somersault while riding backward on a running horse. He did the same trick afterward before half the sovereigns of Europe, and won especial praise for his daring from the Queen of England.

Engineers in Railroad Accidents.
A man in Washington who has for years been collecting newspaper accounts of railway accidents declares that no locomotive engineer ever came out alive from his third disaster. He does not insist that engineers are never killed in their first or second accidents, but he maintains that after a man has had two "close calls" he will, if wise, abandon railroading.

Drunk for Twenty Years.
A correspondent writes: "I was drunk on and off for over twenty years, drunk when I had money, sober when I had none. Many dear friends I lost, and numbers gave me good advice to no purpose; but, thank God, an angel hand came at last in the form of my poor wife, who administered your marvelous remedy, 'Anti-Jag,' to me without my knowledge or consent. I am now saved and completely transformed from a worthless fellow to a sober and respected citizen."

If "Anti-Jag" cannot be had at your druggist, it will be mailed in plain wrapper with full directions how to give secretly, or receipt of One Dollar, by the Renova Chemical Co., 66 Broadway, New York, or they will gladly mail full particulars free.

Some Water Uses Well to Remember.

The "Phrenological Journal" gives the following useful hints on the applications of water in severe attacks of illness. The adult members of a family should keep them in mind for an emergency:

A strip of flannel or a soft napkin, folded lengthwise and dipped into hot water and wrung out, and then applied around the neck of a child that has the croup, will usually bring relief in a few minutes.

A proper towel folded several times, and dipped into hot water, quickly wrung and applied over the site of toothache or neuralgia, will generally afford prompt relief.

This treatment for colic has been found to work like magic.

Nothing so promptly cuts short a congestion of the lungs, sore throat or rheumatism as hot water when applied early in the case, and thoroughly.

Hot water taken freely half an hour before bedtime is an excellent cathartic in the case of constipation, while it has a soothing effect upon the stomach and bowels.

This treatment continued a few months, with the addition of a cupful of hot water slowly sipped half an hour before each meal, with proper attention to diet, will cure most cases of dyspepsia.

Ordinary headaches almost always yield to the simultaneous application of hot water to the feet and back of the neck.

It is estimated that there are 1,300,000 Irish people in Australia.
