A happy New Year to all our readers

There is a newspaper in Kansas whose motto is "Lie steal, drink and swear," and it is explained by the editor: "When you lie, let it be down to pleasant dreams: when you steal, let it be away from immoral associates; when you drink, let it be pure water; when you swear, let it be that you will patronize your home paper, pay your subscription and not send your job work away from home."—Ulysses Dispatch.

The following is the best part of the president's message and also the very part which the republican majority in congress will ignore, or try to. "The western half of the United States would sustain a population greater than that of our whole country today if the waters that now run to waste were saved and used for irrigation." "The man who advocates anarchy, directly or indirectly in any shape or fashion, or the man who apologizes for Anarchists and their deeds makes himself morally accessory to murder before the fact." "Great corporations exist only because they are created and safeguarded by our institutions and it is, therefore, right and our duty to see that they work in harmony with these institutions." "The men who are idle or credulous, the men who seek gains not by genuine work with their head or hand, but by gambling in any form, are always a source of menace, not only to themselves, but to others." "It is right for the national government to make the streams and rivers of the arid region useful by engineering works for water storage as to make useful the rivers and harbors of a humid region by engineering works of another kind."
