A shrewd electioneering plan i adopted by a Kansas candidate for county office. In his rounds he takes with him in his buggy a competent plowman. When he hails a farmer in the field the plowman takes the plow or cultivator and the work goes right on, while the farmer stands in the shade of the hedge row and contentedly listens to the tale the candidate tells.

A Catch in the Back. Grand View, Iowa, Sept. 29th .-- Mrs. Lydia Parker, of this place, says:

"I was troubled with backache all the time for years. When I would stoop over a catch would take me in the back and I could not straighten up for some time.

"I tried everything I could think of but got no relief till I sent and got Dodd's Kidney Pills.

"I used one box and part of another before the trouble all left me, but now I am well and strong and I have not been troubled with my back for some months.

"I believe my cure is a permanent one and I am very grateful indeed to Dodd's Kidney Pills for what they have done for me.

"I would most heartily recommend them to anyone suffering with lame back, for I believe they will cure any case of this kind.'

bed to set in the new one, wash all soil from their roots before they are set, to prevent carrying the pest to the new bed, and reject all that are not strong and vigorous.-American Cultivator.

Our Farmer Aristocrats.

Tales of sudden wealth are quite common in the famous Kansas and Oklahoma wheat belt; fine houses, modern every appointment, are the rule; rubber-tired buggies and automobiles are nothing to attract attention. In certain communities even the farmer has grown metropolitan to the extent of building an opera house on a school lot and securing some of the best attractions in the theatrical line. It was not until the present winter that Wichita in iron rod, pass it through the ends could afford a guarantee for certain notable singers. Among those occupying front seats were well-known wheat-

growers. Farmers' daughters and farmers' sons form a goodly part of the Kansas society element, while piano farmer to come to town and buy two to place an order for an automobile. vesting in an automobile. Many others are equally plutocratic.

The most objection to continuing keep the strawberry bed in one place for several years is not the exhaustion of the soil, because the fertility can be applied. It is not the matting of the row, because after runners have put out into the paths between them, if before seeding. This is an excellent they are worked mellow and enriched, plan and should be more generally practhe old row of plants can be cut out, ticed. The idea is to apply this top leaving the path there, and the new plants can be thinned, if too abundant, ing a manure spreader arranged so that and the weeds can be taken out, but insect pests are so numerous now that it may be easier to set a new bed than to try to kill them. There are more than a dozen that are well known, and the root borer, crown borer, stalk borer, leaf rollers, cutworms and grubs are probably those which do the most dam-
