#### Leaves All to His Widow.

Berlin, Nov. 26.-Emperor William will attend the funeral of Herr Krupp, which will take place from the little old house where his father lived poorly while striving to cast the first steel gun. The will of the deceased gunmaker, according to a semiauthoritative statement, provides that the wor's shall not be turned into a joint stock company, under twenty-five years, meantime the revenues of the whole property will go to the widow and after her death to the eldest daughter. The value of the estate, estimated by the bankers, who were connected with Herr Krupp is \$75,000,000. This does not include securities owned by the deceased outside his manufacturing plants which may possibly amount to as much more.

The suicide theory has not yet quieted. TheCologne Gazette says: "Whether he died of shock due to excitement and embitterment over the attack made upon bin or whether adjudging himself guilty, he took his own life are questions which have till 4 in the mornin' you'd be a dea not been answered and the accusation itself must halt at his death."

The physicians who were in attendance upon Herr Krupp have drawn up a statement which for the presthe people who take advantage of the ent is kept secret but it is understood that it declares he died of apoplexy. It appears that after Herr Krupp regained consciousness on Saturday he insisted on discussing with his solicitor, Herr Korn, the prosecution of 'That will do," interrupted the disa; the newspapers for publishing accupointed office-seeker. "In the firs sations against him and there upon

Secretary Moody Says Navy Is Short Handed. -Use of Liquid Fuel at Sea.

Washington, Nov. 29.-In his annual report to the president Secretary Moody of the navy says at the close of the last fiscal year there were utder construction for the navy, by contract the following vessels: Eigh battleships armored cruisers, nine protected cruisers, four monitors, thirteen torpedo boats. The general progress of work upon these vessels, particularly those of the larger cities, has not been found to be satisfactory. The battieships were, on the 30th of June, 1902, from ten to twenty-nine months behind contract time; the armored ceruisers from four to thirteen months; the protected .1 "isers from six to eight months, while the monitors were from sixteen to nineteen months in arrears. In the cases of the larger vessels

are the non-delivery of structural material, the inability of shipbuilders to obtain a sufficient supply of skilled labor, and in some cases, strikes Other causes have contributed to the result. The department trol, and has notified contractors that they will be held to accountability for failure to push forward the work near Lincoln last month, were the of construction with the diligence, if such failure shall occur, and particularly for any delays which may at any time be caused by preference being given to private over public we k. In the case of torpedo boats and the destroyers, the contractors have knights of the road who intercepted assigned as an additional reason for delay that the contract for their con struction were so exacting that compliance with them has been well nigh impossible.

Among the most important lessons that a modern navy cannot be imwas then expended in the purchase "We have given all our trainmen of ships. Many of them served use-
