Opinions of Great Papers on Important Subjects.

The Methodists and Amusements.

in manners and customs-and the inevitable change as to how they are viewed-is as active in the churches as anywhere else. It is to this steady shifting of ideals and opinions that the question remains perennial with the Methodists.

In the early Discipline of the Methodist Episcopal Church in America, the whole matter was dismissed in a prohibition to members against "taking such diversions as cannot be used in the name of the Lord Jesus." But along in the decades about the middle of the last century the inevitable broadening of ideas due to the rapid increase in population, the change from solitary rural life to the hurry and bustle of the city-all were liberalizing tendencies. Especially in the cities, Methodists in good standing indulged in amusements, etc., which were looked upon with horror by the more conservative, and hence more strict members in the country, especially the elder generation. But the liberals argued that they were well within the prohibition of the Discipline, and that there was no loss of true religion to themselves.

It became evident that the clause in the Discipline needed amendment; that the church must authoritatively specify what things could not be permitted to the Methodist laity. The change was made by the General Con-Serence of 1872. The paragraph which has stood since then The law has been strictly construed by the Attorney-Gendeals with conduct, and expressly forbids among other eral, who ruled that not all Chinese persons might enter But this juggling with words that gave ocrats want-full and free discussion things, "the buying, selling or using intoxicating liquors | the country who were not specifically forbidden, but that es a beverage," and "dancing, playing at games of chance, attending theaters, horse races, circuses, dancing parties or patronizing dancing schools, or taking such other amusements as are obviously of misleading or questionable moral interpreters, physicians and agents. Persons falling within tendency," etc.

But this did not end the controversy. In very many the exclusion law was particularly directed. churches, this regulation has become a dead letter. Methodist members attend theaters, visit circuses, send their has a right to prohibit any line of conduct that is not sinful; and feeling that these things are not, they ignore the precept. The matter was all threshed over again at the recent General Conference in Los Angeles.—Toledo Blade.

The Question of the Battleship.

ERETOFORE, when the public spoke of batleships, the breath was bated and there was a gleam in the eye that boded the kindling of destructive pride. Some spirited souls even went so far as to lift the hat when one of our havy's ornaments was named, but something has happened. It has become dangerous to

without sympathetic shudders. The reason is as follows. Cesarevitch, 13,110 tons, disabled by torpedo and beached, Feb. 8, at Port Arthur; Retvizan, 12,700 tons, disabled by torpede and beached at Port Arthur, Feb. 8; Poltava, 10,960 tons, disabled at Port Arthur; Sevastapol, 10,960 tons, disabled Feb. 9; Pobieda. 12 54 tons, damager by mine at Port Arthur, April 13; Arthur, April 13. now squatting drunkenly in the mud, their huge guns raking the affrighted stars. They have felt a shudder along their keels, and their glory has dwindled like a leaking balloon.

The American people are prone to ask questions when er. "Times change, and men's manners and things happen. Something has happened. The colored pictures of our navy are singularly uninspiring just at present, and we desire to know why. If we cannot find out why, we, at least, wish to be sure that something was really wrong. So there is the question in the air. How much is a \$6,000,000 battleship worth? If a Japanese corporal's guard (or the naval equivalent of the body) can take a rowboat, a cap pistol, and a torpedo and sink battleships, we desire to be allowed to look on, and possibly make a small bet on our own prospects. Further, some would like to know just how we are going to keep the upper hand if our battleships won't battle against the enemy's torpedoes. We are in a state of doubt .- San Francisco Argonaut.

Chinese Exclusion.

T is expected that the new treaty regulating the admission of Chinese into the United States, now in preparation, will permit certain Chinamen, not of the coolie class, who are now excluded, to enter the country. Under the existing exclusion law, Chinese laborers are prohibited from coming to or remaining in the

The Price of Fame.

HEN one considers how much the people love to be humbugged, it is surprising that there are not more people engaged professionally in the business. A man with a very brilliant mind may make a brilliant address before a brilliant audience, and there the brilliancy stops; but a man with a mind about the size of

a shriveled walnut, may talk a lot of nonsense to an audieace of no-or of average or unusual-intelligence, and immediately he becomes famous. Yet the fact remains that the protectionists and trust interests will write the platform and also control the action of the Republican national convention, and as every revision of the tariff by the Republicans has resulted in increasing duties, it is certain that if the Republican party wins the election it will not be considered necessary to revise the tariff, and more certain that if any revision is attempted the protection the trusts now enjoy will be maintained. Dun's Index figures for May show that high prices for all the necessaries of life are still maintained and yet wages are declining, with a vast number of workers unemployed and many imported industries running on short time, and yet the high tariff, which the Republicans declare produces prosperity, is in full working order. The price of many farm products is falling and yet the cost of living shows but little, if any, decrease. The beef trust, the coal trust, the salt trust, the oil trust, the sugar trust. and the minor combinations are paying large dividends, fostered in most cases

It would seem, therefore, Senator Aldrich to the contrary notwithstanding, the Republican national platform should declare when the tariff will be revised and if the revision shall provide for higher or lower duties, especially on trust products.

Big events at present scarcely grant us an interval in which to notice minor episodes. But there is often profit in small things and it may pay us to consider for a moment the adjourngress sought to sneak out unobserved while great wars, the World's Fair and other tremendous concerns occupied the fore; and the attempt was well-nigh successful. The difference between Congress in session and out of session is imperceptible anyhow, and except for the empty felicitations and formalities in both houses there was nothing unusual to signify the

Incidentally we may inquire; Where s the boasted benefit of Dingley "protection" to the people, the taxpayers? The taxpayers are \$77,000,000 "in the hole." Dingley "protection" has done better by the trusts. To be sure, they are not "out" \$77,000,000 on account of it. Our political economists, and especially those who are both political and partisan, might not support the proposition; but a court of equity sitting upon the question of adjustments would require the privileged monopolies to pay over the sum of the deficit into the treasury and make up the people's losses. Robbing the people to enrich the trusts is good economy from the Republicon standpoint, but it is decidedly inequitable and uncomfortably burdensome to the country as a whole.

Travel for Health vs. Dieting. A man who was sent to Europe for his health and finally found cure in a little change in his diet says:

"I was troubled with dyspepsia for five years, and two doctors here in Kenosha that treated me for over a year both told me there was no help for me. Then I had an expert from Chicago but still received no relief; then followed another expert from Chicago who came to our house two times a month for four months. He gave me up like all the others and told me to take a trip across the ocean, which I did in the year 1899 and came home about as bad as when I started, The doctors told me my stomach lining was full of sores. Then I began to study my own case and learned of the diet recommended by the Postum Cereal Co., so I gave up coffee, pork and all greasy foods and began using Postum Food Coffee, Gradually I got better and better until I am well now as I ever was in my younger days, have no trouble and eat anything fit to eat.

"Sometimes away from home I am persuaded to drink coffee, but I only take a sip of it, for it tastes bitter and disagreeable to me, but the longer I use Postum the better I like it and the better I feel. I could say a great deal more of my experience with Postum. but think this will give every one a good idea of what leaving off coffee and using Postum can do."
