

DON'T MISS THIS.

A Cure for Stomach Trouble — A New Method, by Absorption — No Drugs.

Do You Belch?

It means a diseased stomach. Are you afflicted with Short Breath, Gas, Sour Eructations, Heart Pains, Indigestion, Dyspepsia, Burning Pains and Lead Weight in Pit of Stomach, Acid Stomach, Distended Abdomen, Dizziness, Colic?

Bad Breath or Any Other Stomach Troubles?

Let us send you a box of Mull's Anti-Belch Wafers free to convince you that it cures.

Nothing else like it known. It's sure and very pleasant. Cures by absorption. Harassless. No drugs. Stomach Trouble can't be cured otherwise—so says Medical Science. Drugs won't do—they eat up the stomach and make you worse.

We know Mull's Anti-Belch Wafers cure and we want you to know it, hence this offer.

SPECIAL OFFER.—The regular price of Mull's Anti-Belch Wafers is 50c a box, but to introduce it to thousands of sufferers we will send you two (2) boxes upon receipt of 75c and this advertisement, or we will send you a sample free for this coupon.

A FREE BOX 114

Send this coupon with your name and address and druggist's name who does not sell it for a free box of Mull's Anti-Belch Wafers to
MULL'S GRAPE TONIC CO., Third Ave. Rock Island, Ill.

Give Full Address and Write Plainly

Sold at all druggists, 50c per box.

Logic

Mistress—Mary Ann, you have a new bean in the kitchen every week. Now, this must stop.

Maid—Well, mum, if y'd buy a better quality of food I could keep 'em longer than a week 'n' wouldn't have to gettin' new ones all th' time.—Cleveland Leader.

Mrs. Winslow's Boonaroo Syrup for Children

Soothing, softens the gums, reduces inflammation, allays pain, cures wind colic. 25 cents a bottle.

He Had Enough.

Enpeck was dining at the home of a friend.

"Will you have some of the tongue?" asked the hostess.

"No, thank you," replied Enpeck, "I get too much of that at home."

Positive, Comparative, Superlative.

"I have used one of your Fish Brand Slickers for five years, and now want a new one, also one for a friend. I would not be without one for twice the cost. They are just as far ahead of a common coat as a common one is ahead of nothing."

(Name on application.)

Millions

To know the great merits of Alabastine, the Sanitary Wall Coating—Not a hot or cold water disease-breeding kalamine, bearing a fanciful name.

LET US HELP YOU.

Write for our artists' free color plates—different effects for different rooms—in white, delicate grays, greens, pinks, blues, and yellows, using

Alabastine

THE SANITARY WALL COATING

A Rock Cement Destroys disease germs and vermin; does not rub or scale. No washing of walls after once applied. You can brush it on—mix with cold water. Other finishes, mixed with either hot or cold water, do not have the cementing property of Alabastine. They are stuck on with glue, or other animal matter which rots, feeding disease germs, rubbing, scaling and spalling walls, clothing, etc. Such finishes must be washed of every year—costly, dirty work.

Buy Alabastine only in 5 lb. pk'gs, properly labeled. Prefer the original design. "Hints on Decorating" and tint card, free.

ALABASTINE CO.,
Grand Rapids, Mich., or 105 Water St., N. Y.

HAVE YOU COWS?

If you have cream to separate a good Cream Separator is the most profitable investment you can possibly make. Delay means milk and waste of time, labor and product.

DE LAVAL CREAM SEPARATORS save \$10.- per cow per year every year of use over all gravity setting systems and \$5.- per cow over all imitating separators. They received the Grand Prize or Highest Award at St. Louis.

Buying trashy cash-in-advance separators is penny wise, dollar foolish. Such machines quickly lose their cost instead of saving it.

If you haven't the ready cash DE LAVAL machines may be bought on such liberal terms that they actually pay for themselves.

Send today for new catalogue and name of nearest local agent.

THE DE LAVAL SEPARATOR CO.,
Randolph & Canal Sts. 74 Cortlandt Street CHICAGO NEW YORK

SICK HEADACHE

FEVER'S AFTER EFFECTS

Did Not Disappear Until the Blood Was Renewed by Dr. Williams' Pink Pills.

Typhoid fever is sometimes called nervous fever. During the course of the fever the nerves are always profoundly disturbed, and when it is over they are left so sensitive that the patient has to be guarded against all excitement. In the tonic treatment then demanded, regard must be paid not only to building up flesh but also to strengthening the nerves. A remedy that will do both, make sound flesh to repair waste and give new vigor to feeble nerves, is the most convenient and economical. Such a remedy is Dr. Williams' Pink Pills for Pale People.

One proof of this is the experience of Mr. Charles Worth, of East Vassalboro, Maine. He says: "I had a severe attack of typhoid fever late in the fall which left me very weak and debilitated. My heart palpitated, my breathing became difficult after the least exertion and there was numbness in both hands. I suffered in that way for fully six months. As I did not grow out of it, did not in fact see the slightest improvement as time passed, I decided to use Dr. Williams' Pink Pills as I knew of some cures they had effected in cases like mine.

"Almost as soon as I began taking them I could see decided improvement and after keeping on with them for several weeks I was completely well. I consider Dr. Williams' Pink Pills a most valuable remedy, and I am in the habit of recommending them to others afflicted as I was."

When the nerves ache and tremble it means that they are starving. The only way to feed them is through the blood, and the best food is Dr. Williams' Pink Pills. They are absolutely guaranteed to be free from opiates or other harmful drugs. They are sold by all druggists, or may be obtained directly from the Dr. Williams Medicine Co., Schenectady, N. Y.

Once on Boarding House.

"I once knew a man," said the humorous boarder, "who kept a diary for fifteen years."

"And why did he stop keeping it?" inquired the serious boarder.

"Oh, somebody came in and bought it. You see, he was a stationer."

Then the serious boarder murmured something about "smart Alecks" and glumly applied himself to the hash.—Louisville Courier-Journal.

ACTIVE KANSAS WOMEN.

Five of Them Do All the Work on a 160-Acre Farm.

At Solomon, Kan., a farm of 160 acres is operated entirely by five women—a mother and five grown daughters—and a boy of twelve years. Each of the women has her own department. The labor is distributed equally among them. The mother looks after the house, does the cooking for the family without any help, and takes care of about 500 chickens and other poultry. One of the daughters attends to the dairy and milks fifteen cows. They have eighteen horses for farming and driving purposes, a small bunch of steers and a hog pen that brings them from \$500 to \$800 clear profit every year.

Theirs is one of the best farms in that neighborhood. Most of it is planted in corn and wheat, but they are raising all of the ordinary crops. The young women do all of the field work—plow, sow and reap; put up their own fences, dig their own drains, repair their own machinery and employ no men hands, except occasionally at harvest. Most of their farming is done with machinery of the most improved, up-to-date character, and their crops are equal to any raised in the neighborhood. For convenience they dress in men's clothing while in the fields, but when the day's work is over they resume their petticoats. They are good looking and well educated, take daily newspapers and the leading magazines, and two of them are graduates of the agricultural college at Manhattan.

Several other farms in this neighborhood are managed by women, and women are engaged in other kinds of business. A real estate firm of women at Cottonwood, Kan., recently negotiated the sale of 50,000 acres of land in the western part of the state. This firm is very enterprising and is well known throughout Kansas, Oklahoma and Indian Territory. It has done a good deal of real estate business for the railroad companies. One of the firms is vice-president of the Kansas Women's Suffrage Association.—Wm. E. Curtis in Chicago Record-Herald.

SENATOR SULLIVAN

Says He Has Found Doan's Kidney Pills Invaluable in Treating Sick Kidneys.

Hon. Timothy D. Sullivan of New York, Member of Congress from the Eighth New York District and one of the Democratic leaders of New York State, strongly recommends Doan's Kidney Pills.

Senator Sullivan writes: "It is a pleasure to endorse a remedy like Doan's Kidney Pills, having found them of greatest value in eliminating the distress caused by sick kidneys, and in restoring those organs to a condition of health. My experience with your valuable remedy was equally as gratifying as that of several of my friends.

"Yours truly, (Signed) "TIMOTHY D. SULLIVAN," Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists. Price 50 cents per box.

Got Back at Him.

"What?" exclaimed Groucherly. "You want a new bonnet? Why, I think the one you have is very becoming."

"Yes," replied Mrs. Groucherly, "and so do all the neighbors; they think it is becoming very ancient and decrepit."

FARM AND GARDEN

Shade for Small Stock.

Most farmers make some attempt to provide shade in the pasture for their horses and cows, but let the swine, sheep and poultry go without it, which is certainly a mistake, for all animals and birds like shade in summer. It is an easy matter to erect a number of small shade places on the pasture, and at small expense, if one is willing to invest the small amount of labor necessary. If there is a wood lot on the farm what is easier than to cut a number of poles to use for posts, and then a number of lighter branches to use as the foundation for the roof. Set the poles firmly in the ground, making four posts for the corners, then, with the branches and a lot of waste hay or straw, a thatched roof is easily constructed.

Spend enough time on the work to make it strong enough so that the wind will not blow it over. When you finish

Feeding Too Many Fowls.

When the hatching season is over there is no necessity for retaining the roosters, as the hens will lay without their presence, and their room is valuable, while they cost more for food than they are worth, says Farm and Fireside. It is well to retain the best of the early pullets, but all pullets that do not show evidence of thrift or of reaching maturity before winter should be disposed of. The young cockerels should be disposed of just as soon as they are large enough for market or the table. It is better to give the growing stock plenty of room than to crowd them. The poultry house is usually a warm place in summer when well filled with birds, and the animal heat of the bodies, and the flock should consequently be reduced to the lowest number consistent with the facilities.

Potato Quality.

The quality of potatoes is the subject of interesting tests by the New York Experiment Station. There is reason to believe that good quality is developed in a soil temperature of 65 degrees to 75 degrees, and the tubers growing from one and two to five inches below the surface are subject to these conditions. Great fluctuation in the soil temperature is detrimental to the best development of potatoes, and tubers growing too near the surface are subject to this fluctuation. A too low temperature also injures the development of ripening and the soil texture probably has something to do with ripening and flavor. Hence, if potatoes are planted shallower than three inches or deeper than six inches the conditions are unfavorable.

Shropshire Ram.

THE CHAMPION SHROPSHIRE.

This champion Shropshire ram is owned by George Allen, of Vermillion County, Illinois.

Treatment for Fence Posts.

A cheap and effectual method of preventing the rotting of fence posts is said to be practiced by French farmers. The posts are piled in a tank and the whole thickly covered with a quicklime, which is gradually slacked with water. Another plan, used in this country, is to char the posts to the depth of half an inch, and then dip them in coal tar, but the coal tar should be so used as to extend above the surface of the ground, when the posts are in place. While this may not prevent decay, yet it will prolong the period of durability of the posts.

Borrowed Troubles.

There are people who have genuine troubles, but the woe of genuine trouble is nothing compared to troubles which are expected and which never come. Too many farmers borrow trouble when it rains, because of the fear that the rain will continue too long—the downfall will be too great. When it discontinues for a few days the fear and the prediction is that a drought is in prospect that will destroy the crops. All this borrowed trouble is wholly unnecessary, and if it affects the general result at all, it affects it for the worst. It is better to be cheerful and make the most of conditions as they arise and take chances for the future without worry.—Journal of Agriculture.

Working in the Wheatfield.

Most people are probably familiar in a general way with the principles and methods used in wheat shocking. Yet there are details the conformation to or neglect of which makes all the difference between a first-class job and a poor one. I wish to show here some of the details which make for convenience and excellence in the work, says a Rural New Yorker writer.

I find the following plan of setting up a shock most satisfactory: Set down four bundles in a row and follow with one in the middle on each side. Now place a bundle in each of the four vacant places and put on two caps. For caps select bundles with long straw above the bands. They will cover the shock better and will not fall off so easily. Place the heads of the caps in the direction from which the strongest winds blow. If the heads face the wind the caps will not blow off as readily as they will if the butts face it.

Here are a few general suggestions: If the shock has been set up as here directed it will contain twelve bundles. Experience teaches that this is very nearly the right number. Some little variation, of course, is allowable. But if a shock is much smaller it lacks stability, and the same is true if the shock is much larger, especially if the wheat is dead ripe. When the wheat is dead ripe the heads stand out, and, especially in a large shock, the bundles are liable to fall down. If the heads stand out it is a good plan to hug the shock tightly before capping. In a large shock slightly green wheat is apt to mold. When starting a shock if convenient start it in the middle of the bunch of bundles. This will save the time and labor involved in carrying bundles around the shock.

Weather Fakes.

The United States Weather Bureau takes no stock in the monthly and seasonal forecasts by the so-called "weather prophets" whose predictions are based upon signs of the moon, conjunctions of planets, and other astronomical phenomena which, as far as scientific men can learn, have no appreciable influence upon our atmosphere. Frequently, of course, they hit a snow storm or cold wave in winter and thunder and wind storms in the summer, as all are liable to occur in their respective seasons, but to predict the nature of the weather more than three days is not possible by the National Weather Bureau, even with constant connection with hundreds of observing stations in all parts of the continent. All forecasts sent out by the Weather Bureau are based upon actual conditions at the time, but the unexpected often happens to upset what seems likely to occur.

Low-Down Rack for Corn.

Whoever raises sorghum for any purpose but grazing and cuts corn stalks whole will need a low-down rack for this sort of work. No job on

DISHONESTY AT THE CIRCUS;

Crookedness in the Air, as the Experienced Showman Proved.

"When the circus comes to town everybody goes crooked," observed a side-show orator out of the wealth of his experience. And just before the performance in the big tent he proved it to me—in a way. He told me beforehand what he was going to do, and it was a test. A stranger gave him a \$5 bill in payment for seven side-show tickets. The man in the "pulpit" thrust at him the tickets and a handful of silver. He had purposely "short-changed" him to the extent of \$1. By the time the stranger had reached the side-show entrance he discovered the shortage. In two strides he was in front of the ticket seller's "pulpit" clamoring "fraud."

"Yew've swindled me outen a dollar," he shouted. The ticket seller heard him through, apologized and gave him two fresh, clean \$1 bills, one of which lay evenly upon the other. Without a word the man seized them and dashed into the tent. I followed him, knowing precisely what had been done. Joining his friends, he told them of the mistake the ticket seller had made and laughed over the ease with which the circus had defrauded itself for his benefit. The shoe had slipped to the other foot, you see. He had "beat a circus"; it was the sum of his ambition; his wildest hopes had been realized.

He was watching the "Mexican knife thrower" when a hand touched his shoulder. He looked up into the eyes of the ticket seller.

"Come out here a minute," said the latter, and drew him to one side.

Then he explained in an undertone: "My friend, I thought I'd test you. I did 'short-change' you a dollar. Oh, I knew you'd be back. I gave you your dollar. You were entitled to it. But in addition I gave you another dollar—a bill—a fresh, clean \$1 bill, I waited a while, but I couldn't see you tearin' a hole in that canvas to get to me with it. Now, my friend, shell out that dollar before I knock your bloomin' head off."

He shelled.

"Didn't I tell you?" observed the side-show man to me as he mounted his "pulpit" and cleared his throat.

And I was compelled to nod agreement.—Pilgrim.

A CLEAR COMPLEXION.

A Simple Home Treatment for Blackheads, Red, Rough and Oily Skin and Disfiguring Humors.

If you are afflicted with pimples, blackheads, red, rough or oily skin, or disfiguring humors, you will find this simple home treatment most agreeable, speedily effective and economical. Gently smear the face with the great emollient skin cure, Cuticura Ointment, but do not rub. Wash off the ointment in five minutes with Cuticura Soap and hot water, and bathe freely. Repeat this morning and evening and you will soon be rewarded with a skin soft, white and clear. Cuticura Soap, the best toilet and complexion soap in the world, assisted by Cuticura Ointment, will preserve, purify and beautify the complexion and keep the skin in a healthy condition, preventing blackheads, pimples, eruptions or the return of eczema and other skin troubles. Used as a shampoo it cleanses the scalp of crusts and scales, removing dandruff and promoting the growth of the hair. For red rough hands, itching palms and painful finger ends, Cuticura Soap and Ointment achieve marvelous results, often in a single night.

Man's Inhumanity.

Mrs. Naggsby—Oh, dear! I feel perfectly miserable this morning.

Naggsby—I'm glad to hear it, my dear.

Mrs. Naggsby—What! Do you mean to say you are glad that I am miserable?

Naggsby—Yes; a woman, you know, is never happy unless she is miserable.

Production of Hogs.

There is little danger of an overproduction of hogs. The difficulty is to get enough of them. Curtailing the production will not send up the price correspondingly, as people will pay only just about so much for any one kind of meat, and then will turn to something else. There should be millions more hogs produced every year than are. With an animal as prolific as the hog there is no reason why the supply should not be adequate to meet the demand. It is doubtful if the farmer can raise any animal that is more profitable than the hog.

Farm Notes.

Poor food for the cow and poor treatment effect the milk supply.

Cows in the stable can be protected from flies; nets and screens are both used.

Sponge off the horse thoroughly and dry him well before putting him in his stall.

New York City consumes on an average about 35,000 sheep and lambs weekly.

Do not use any preservative to prevent milk from souring; keep it cool and clean.

Pick tomatoes as soon as they begin to turn color and spread them out under glass. This will help them to ripen quickly.

Pull up onions as soon as the bulbs are well formed and leave them on the ground until cured. Then spread them thinly under cover until wanted.

Try five or six moth balls in each nest, but be careful that they do not touch the eggs. Persian insect powder scattered under the hay helps much.

Keep outside leaves of grape vines cut off, also weak shoots. This will let the sun ripen the grapes and throw the strength of the vine into the fruit instead of the foliage.

STOP, WOMAN!

AND CONSIDER THE ALL-IMPORTANT FACT

That in addressing Mrs. Pinkham you are confiding your private ills to a woman—a woman whose experience with women's diseases covers a great many years.

You can talk freely to a woman when it is revolting to relate your private troubles to a man besides, a man does not understand—simply because he is a man.

Many women suffer in silence and drift along from bad to worse, knowing full well that

ance, but a natural modesty impels them to shrink from exposing themselves to the questions and probably examinations of even their family physician. It is unnecessary. Without money or price you can consult a woman whose knowledge from actual experience is great.

Mrs. Pinkham's Standing Invitation.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of her private ills to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America which has never been broken. Out of the vast volume of experience which she has to draw from, it is more than possible that she has gained the very knowledge that will help your case. She asks nothing in return except your good-will and her advice has relieved thousands. Surely any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.

If you are ill, don't hesitate to get a bottle of Lydia E. Pinkham's Vegetable Compound at once, and write Mrs. Pinkham, Lynn, Mass., for special advice.

When a medicine has been successful in restoring to health so many women, you cannot well say, without trying it, "I do not believe it will help me."

W. L. DOUGLAS

\$3.50 & \$3.00 SHOES FOR MEN

W. L. Douglas \$4.00 Gilt Edge Line cannot be equaled at any price.

\$10,000 REWARD to anyone who can disprove this statement.

W. L. Douglas \$3.50 shoes have by their excellent style, easy fitting, and superior wearing qualities, achieved the largest sale of any \$3.50 shoe in the world. They are just as good as those that cost you \$5.00 to \$7.00—the only difference is the price. If I could take you into my factory at Brockton, Mass., the largest in the world under one roof making men's fine shoes, and show you the care with which every pair of Douglas shoes is made, you would realize why W. L. Douglas \$3.50 shoes are the best shoes produced in the world.

If I could show you the difference between the shoes made in my factory and those of other makes, you would understand why Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer and are of greater intrinsic value than any other \$3.50 shoe on the market to-day.

W. L. Douglas Strong Made Shoes for Men: \$2.50, \$2.00, Boys' School Dress Shoes, \$2.50, \$2.00, \$1.75, \$1.50

CAUTION—Insist upon having W. L. Douglas shoes. Take no substitute. None genuine without his name and price stamped on bottom.

WANTED. A shoe dealer in every town where W. L. Douglas Shoes are not sold. Full line of samples sent free for inspection upon request. *Fast Color Effects used; they will not wear fading.* Write for Illustrated Catalog of Fall Styles.

W. L. DOUGLAS, Brockton, Mass.

PAXTINE TOILET ANTISEPTIC

FOR WOMEN

troubled with its peculiar to their sex, used as a douche is marvellously successful. Thoroughly cleanses, kills disease germs, stops discharges, heals inflammation and local soreness.
