OPERATIONS AVOIDED

Two Grateful Letters from Women Who Avoided Serious Operations.-Many Women Suffering from Like Conditions Will Be Interested.

fering from ovarian or womb trouble, Compound had saved other women from that an operation is necessary it, of course, frightens her.

The very thought of the operating table and the knife strikes terror to her heart. As one woman expressed It, when told by her physician that she must undergo an operation, she felt

operations!

It is quite true that these troubles may reach a stage where an operation is the only resource, but such cases are E. Pinkham's Vegetable Compound. much rarer than is generally supposed, much rarer than is generally supposed, because a great many women have the bad symptoms disappeared, and I am once had said an operation must be performed. In fact, up to the point where the knife must be used to secure instant relief, this medicine is certain to help.

The strongest and most grateful statements possible to make come from women who, by taking Lydia E. Pinkham's Vegetable Compound, have escaped serious operations.

Margrite Ryan, Treasurer of St. Andrew's Society, Hotel English, Indian-

Dear Mrs. Pinkham:-

When a physician tells a woman, suf- | Hearing how Lydia E. Pinkham's Vegetable serious operations I decided to try it, and in less than four months I was entirely cured; and words fail to express my thankfulness."

Miss Margret Merkley of 275 3d Street, Milwaukee, Wis., writes: Dear Mrs. Pinkham:-

"Loss of strength, extreme nervousness. that her death knell had sounded.

Our hospitals are full of women who are there for ovarian or womb

severe shooting pains through the pelvic organs, cramps, bearing down pains, and extreme irritation compelled me to seek medical advice. The doctor, after making an examination, said that I had ovarian trouble and ulceration, and advised an operation as my only hope. To this I strongly objected —and I decided as a last resort to try Lydia

been cured by Lydia E. Pinkham's more strong, vigorous and well; and I can-Vegetable Compound after the doctors not express my thanks for what it has done

Ovarian and womb troubles are steadily on the increase among women -and before submitting to an operation every woman should try Lydia E. Pinkham's Vegetable Compound, and write Mrs. Pinkham at Lynn, Mass. for advice.

For thirty years Lydia E. Pinkham's Vegetable Compound has been curing the worst forms of female complaints, apolis, Ind., writes of her cure as follows: all ovarian troubles, inflammation, ulceration, falling and displacement of the womb, leucorrhœa, irregularities, "I cannot find words to express my thanks indigestion and nervous prostration. for the good Lydia E. Pinkham's Vegetable Any woman who could read the many not get well unless I had an operation for grateful letters on file in Mrs. Pinkovarian and female troubles. I knew I could ham's office would be convinced of the not stand the strain of an operation and made up my mind I would be an invalid for life. Pinkham's Vegetable Compound.

The Money Lenders.

There are many examples of Lord Palmerston's ready wit in Sir M. E. Grant Duff's recent book, "Notes from a Diary."

In a debate about the Jews an orator rather bored the House by enumerating many of the things which the English owed to Hebrew initiative. Lord Palmerston in reply gave the

discussion a sprightlier turn. "I quite agree with the honorable gentleman," he remarked. "Many of us owe a great deal to the Jews."

Strenuous Life.

"Say," roared the irate citizen as he rushed into the office of the village weekly, "where's the editor?" "Want to see him personally?" queried

the office boy. "You bet I do," answered the i. c. "I'm going to thrash him within an inch of

his life. See?" "Oh, all right," answered the boy. "Just have a seat, please. There are

packing thousands of hogs every day. were marketed as heavy-weights, but

LIGHT AND HEAVY HOGS.

so great as formerly. This can be consumption of fresh pork and most of the fresh meat cuts can only be obtained from the lighter grades of hogs. Beginning about April 1st the light hog sells on a par with the grades and a month or so later the

every market. There is one system of hog management quite prevalent among farmers that seems to be in direct opposition to these market demands. Many hog raisers, and good ones at that, sell their eight-months-old pigs in the winter at a weight of 250 pounds and then dispose of the old

light-weights command a premium at

sows in the summer when they weigh around 400 pounds, thus bringing their light hogs on a heavy hog market and vice versa. However, the loss in such a system is rapidly becoming less as the demand for the extremely heavy hogs grow smaller.

A prime, well-finished hog weighing about 250 pounds will generally land nearer the top and this may be more cheerfully and gracefully. To said to be somewhere near the ideal | control a herse perfectly, the one domarket weight. We don't mean that | ing it must be master of the situaon that class will average the best faint one would fail. When a horse during a whole year.-Indiana Far-

LARGE RETURNS FROM POUL-TRY.

Upon a recent visit to Inndiana cur attention was called very forcibly to the immense sums received by the Indiana farmers for their poultry product. One establishment at Waterloo handles about three-fourths of the poultry and eggs marketed by the farms in De Kalb County. The establishment is taking in eggs at the rate of 1,000 cases per week, gathered from the various stores throughout the country. Last Fall it bought and packed over fifty carloads of dressed poultry, averaging 18,000 pounds to the car. The poultry is picked and dressed before shipment to the Eastern markets. More than \$200,000 dollishment to the farmers of one coun-

Wisconsin is practically as well located for poultry raising as any portion of Indiana, particularly this section of it. It is a business which cows alike, the one cow from a milkrequires no little time and attention, but it yields large returns. When Jackson county farmers raise as many chickens and market as many eggs as the farmers of De Kalb County ance of food, and she will not take are now doing they will receive a larger sum from their poultry product labor and her calves will be more than they now receive for their valuable. It does not pay the farmer dairy product. The Jackson County to keep a poor animal when the same farmer can well afford to go more extensively into poultry raising. No branch of farming offers better inducements.—Black River Falls Journal.

ty for their poultry products every

THE RICHEST MILK.

The rule is that the richer milk is given at the milking that occurs after the shorter number of hours between milkings. If the milking is done in the winter at 7 in the morning and 5 in the evening, the evening's milk will be the richer, for there is only ten hours between the morning and evening milkings. In the summer when the hours of milking are reversed, the morning milk will be richer. After allowance has been made for all the above mentioned causes, there is still a daily and weekly fluctuation in the richness of the milk due to causes as yet unknown. But the fact of this variation is certain. I have found it in single cows and in large herds, when there was no assignable cause. I have isolated a fine, healthy, vigorous cow and treated her with exceptional care and regularity, and yet she has varied in a whole per cent in the richness of her milk during a single week. This phase of the subject needs to be made prominent because a lack of knowledge of the fact has led to many a wrang'e and much hard feeling at creame iss that pay by test. Because your test one week is diffeffrent from the week before do not jump at once to the conclus'on that the creamery man has made a mistake or is trying to theat you. Either may be true, but the variation in the test is not proof of either .- Prof. W. W. Coole in the Indiana Farmer.

THE VALUE OF SAWDUST.

A good abser out to use in the be disappointed any longer"

dairy stable is always desiral e, and It is very well-known that the mar- for this purpose there are few things ket demands and prices vary for the that excel sawdust. It is really the different weights of hogs. Explain only way that it can be profitably ing this a commission man who has utilized, anyhow. It does not contain long handled fat hogs in the market | fertilizing matter enough to justify says that beginning in September the its application to the soil, unless heavy hog comes more into evidence mixed with other materials. Applied and commands a premium over light- alone in large quantities when fresh er ones. The height of the demand and green, its elect upon the soil for fat-backs is reached in Decem- would, in all probability, be detriber, January and February, for in mental. Spread very sparingly, it these months the great slaughter might occasionally result in some houses at every market center are good, but hardly enough so to make it pay. And as to using it for mulch The time was when nearly all hogs around fruit trees, that is simply out of the question. It makes excellent now even in the winter months, the bedding for cows, since, owing to its demand for extreme weights is not absorbent qualities, it keeps them almost perfectly clean. Dry sawdust, largely attributed to an increasing in fact, will absorb about three times its weight of liquid manure, and when thus enriched it constitutes, along with the solids, a first-class fertilizer, being easily shoveled and readily spread when hauled to the field. Horse manure, on the other hand, needs complete saturation and compactness to keep well, and for this reason very little sawdust should be mixed with it. Another reason why horses should not be bedded with sawdust is that it is liable to make their hoofs dry and brittle.-F. O. S. in the Epitomist.

MANAGEMENT OF OUR HORSES Firmness, kindness and patience are three of the essential elements in the make-up of any one who is a success in handling horses. Without the first, a man would naturally be a failure. The condition of the horse when under the subjection of man is unnatural, although no domestic animal submits to its surroundings is to be brought under subjection it must be done by conquering his will and not his strength. It would indeed be a dismal failure if the reverse were true; now as to kindness, the more of this the better, no horse or any animal was ever spoiled or injured by kind treatment. There is no animal upon the mind of which kindness will make a greater impression than upon that of the horse. Now in regard to patience; no man without patience can hope for success in handling horses. The man who can patiently develop the good traits of an animal and discourage the vicious ones has it within his power to change the horse of bad habits into one that will be valuable. These points are certainly apparent to every thinking man and should be acquired, if not already possessed, by lars is paid through this one estab- all who have the management of horses to look after.-Louis Campbell in the Epitomist.

DOES NOT DEPEND UPON FEED. That all does not depend upon the feed may be tested by feeding two producing breed and the other cow (bought to replace a dry cow, per haps), and the well-bred cow will give much more on the same allowup more room, will not enta'l greater food required for her support will keep a better one. A good cow should also have a good appetite, for the more food she eats the greater

her yield of milk .- Home and Farm.

Take a snap ring, attach a half inch cord about a dozen feet in length, put the snap in the kicker's nose and draw the cord around her, letting it rest on her gambrel joints or below. Let a person stand at her shoulder and hold the cord just tight enough so that it shall not slip down to the floor. Any person can then proceed to milk her without trouble -E. L. Bates, in the Epitomist.

To Satisfy His Wife.

"John." exclaimed the nervous woman, according to an exchange, "there's a burglar in the house. I'm sure of it."

John rubbed his eyes and protested mildly that it was imagination. "No, it isn't. I heard a man down-

stairs." So John took a box of matches and went down. To his surprise his wife's suspicions were correct. Seeing that he was unarmed, the burglar covered him with a revolver and became quite

"Isn't it rather late to be out of bel?" he remarked.

"A-er-a-little bit," replied John "You're too late, aryhow, because I've drouped everything out of the window, and my pals have carrie them of."

"O, that's all right. I'd lke to ask and favor of you, though.' "What is it?"

"Stay here until my wife can core down and see you. She has been looking for you every night for the list twelve veers, and I den't want her to
