

**FACTS GUARANTEED**

Neuralgia and Anemia are Cured by Dr. Williams' Pink Pills.

For nearly a generation the people of this country have known Dr. Williams' Pink Pills, during which time proof of thousands of cures by this remedy has been published and confirmed and not one person has been harmed in the slightest degree by their use. The pills contain no opiate, narcotic or stimulant, nor any drug which could injure the most delicate constitution.

"For over a year," says Miss Charlotte Van Salisbury, of Castleton, N. Y., "I suffered from neuralgia and palpitation of the heart. My skin was pale and sallow and I was troubled with dizziness, fainting spells and fits of indigestion. I was very nervous and would start at the slightest sound. At times a great weakness would come over me and on one occasion my limbs gave way under me and I fell to the sidewalk."

"Of course I was treated by our local physicians and also consulted a noted doctor at Albany, but nothing they gave me seemed to benefit me. One day I read in a newspaper about Dr. Williams' Pink Pills for Pale People and I immediately gave them a trial. I soon felt much better and my color had begun to return. I continued using the pills and by the time I had taken eight boxes I was entirely cured."

"My sister, Sarah Van Salisbury, suffered terribly from anemia. She was pale and thin and we feared that she would become a victim of consumption. She tried Dr. Williams' Pink Pills for Pale People and in a short time she began to gain in strength and weight. She is now strong and well and we both heartily recommend Dr. Williams' Pink Pills to all who are in ill health."

Dr. Williams' Pink Pills are sold by all druggists or sent, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Co., Schenectady, N. Y. Descriptive pamphlets free on request.

**Didn't Make Good.**

Tess—Don't you think Mr. Galley is awfully handsome?

Jess—Huh! "Handsome is as handsome does." He told me last evening that he was going to kiss me before he left.

Tess—The idea! Weren't you indignant?

Jess—I should say I was. When a man promises to do a thing he ought to keep his word.—Philadelphia Press.

**Money—Money—3,000 ways to make money with little or no capital.** Any one will make you wealthy. Our book, 368 pages, tells you just how to do it in that many different ways. Grasp this opportunity. Price 50c postpaid. Central Supply Co., 67 Clark St., Chicago, Ill.

**Pardoned.**

"Who is that distinguished-looking man?" asked the stranger.

"Dat man save me a good deal of trouble one," replied the man on the corner. "He interrupted me in de middle of a sentence and—"

"Ah, I see. You were going to say something improper and—"

"Naw! I wuz in de penitentiary an' he wuz Governor of de State at de time."—Philadelphia Ledger.

**Chautauqua Lake, N. Y.**

Two special excursions from Chicago, \$14.00 round trip, on July 6th and 27th. Limit 30 days. Particulars and reservations, City Ticket Office, 234 Clark street, Chicago.

**Afraid to Ask Too Much.**

"St Legislator—I see a Kansas man has de-lared 'a pass is a bribe, and any man out 't to be too big to accept such a small br.'"

Second La-gislator—Well, of course, that's true, but 't it would look kinder small fer us to 'o fer ridin' and ask the 'waggards to pay de 'fer ridin', wouldn't it?—Kansas City Times.

**POTTED MEAT NOT PRESERVED.**

**Manufacturers' Association and Sanitary Inspector So Report.**

The following extracts from a report of the National Manufacturers' Association and Inspector Hedrick, Sanitary Inspector of the City of Chicago, refute the sensational charges made against the canned meat packers:

Our investigation of the Canned and Potted Meat part of the packing industry showed that the methods used make the use of preservatives unnecessary, and indicated that no preservatives or artificial coloring is now used by the Canned Meat packer.

The meat is first partially cooked in large kettles, then the fat and bone is trimmed off and the meat packed into tins. The air is then withdrawn with vacuum pumps and the cans sealed in vacuum. Next they are put into large cookers, where the cooking process is finished. In the packing of some products it is necessary that the cans be reopened and the steam allowed to escape, the vent hole being immediately resealed while the goods are hot, so as to retain the vacuum.

The entire process is quite similar to that used by the family cook when putting up fruits and vegetables, except that meats are sealed in tin cans instead of being put in glass jars. We found that the solder in making the cans and in sealing them is all placed on the outside of the can and does not come in contact with the contents.

We were informed that much of the cause for complaint in canned meats was because of the mistaken idea that the goods would keep in perfect condition after they had been opened. This would be the fact if they were preserved with chemicals, but as they are only kept in condition because of being sealed in vacuum tins they spoil just as readily as fresh meats do after they have been opened and exposed to the air, but will keep indefinitely if the can is not punctured. It is also a well-known scientific fact that decaying meat generates a gas which will explode any package which is hermetically sealed.

Sanitary Inspector Hedrick submitted to Commissioner Whalen his analysis of conditions in the Libby, McNeill & Libby plant. He found "with reference to general conditions, that the floors, halls, stairs, tables, etc., are kept clean," and "that the entire department—viewed from our standpoint—was in a satisfactory condition. All workrooms are light, and have good ventilation."

**PAPERS BY THE PEOPLE**

**ERA OF EQUAL RIGHTS IS AT HAND.**

By Joseph W. Folk.

JOS. W. FOLK.

Political revival is going on all over the land to-day on the subject of the rule of the people. The people of Philadelphia, Cincinnati, Pittsburgh, Pennsylvania, and Ohio have been fighting to regain the government they had lost. The people are beginning to awaken to a realization of the fact that the government of the city, State and nation belongs to them, and they can take the government into their own hands whenever they wish.

We need more respect for existing laws rather than more laws. The only way the people can rule is through the laws made by their representatives. If these laws are not obeyed, then, instead of a government by the people, there is a government by those with wealth or influence enough to obtain official nullification of the laws. Had Providence ordained that Adam, the first man, should have life eternal here, and as the ruler of his millions of descendants he had received a salary of \$175 a day, his 6,000 years' savings would not bring his fortune up to that of Mr. Carnegie. Yet the wages of the average man is nearer \$1.75 a day than \$175, and instead of living 6,000 years the span of his life hardly reaches 40 years. If a man were to receive a salary of \$10,000 a year, and save every cent of it he would have to live 5,000 years before he could match his fortune with that of the prince of oils, acquired through the system of special privileges. How is it that men can accumulate in a few years as much as under normal conditions it would take tens of thousands of years to obtain? This could not have been done if the doctrine of equal rights prevailed; it is done because of the rule of the special privilege.

**MAN SHOULD LIVE A CENTURY.**

By Sir Samuel Wilks.

It is remarkable why a dog should be worn out and old after his ten revolutions, a horse after twenty, and man when he has had his three score and ten. According to one scientist an animal's age is five times that of the period taken to reach maturity. In the case of the elephant, which the zoological society sold to Barnum, and which was shortly afterward killed by accident, the skeleton and which was shortly afterward killed by accident, the was again brought to England in a show, and it was then seen that the long bones were still distinct and separate. This accorded with its supposed age of 22 years when it was sold. According, therefore, to the authority referred to man ought to live to be 160 years old.

There seems nothing opposed to the possibility of the age of man having been greater than now in the time of the patriarchs. There is a doctrine as old as Aristotle that asserts that the function comes first and then the organ. I may remind the reader of the large muscles of the blacksmith's arm or the dancer's leg, and that they are therefore proportionately strong, and that this increased development came in consequence of their being put to greater use when they were of normal size.

Just as we use our muscles if we wish to retain their strength, so likewise must we continue to use the brain in order to preserve it in working order. Use brings

**MODERN HAYMAKING.**

Work in the Hayfield Not the Laborious Process of the Past.

Haymaking is not the laborious process that it was fifty years ago, or even ten years ago. Every step can now be accomplished by machinery, from the cutting to the final storing in the mow or stack, except the arranging of the hay on the wagons. These conveniences permit rapid handling and enable the farmer to make the best use of every dry day or half day. The side delivery rake combines the work of the dump rake and feeder, leaving continuous windrows that can be taken up by the loader. The curing of timothy is a comparatively simple matter if rains can be avoided and there are no coarse weed stalks mixed with it. Clover hay is more difficult

leaves remain green and strong, the work of pumping the stems goes on until the whole plant is dried out.—Montreal Star.

**In the Meerschmum Mines.**

Few of the smokers to whose hearts a meerschmum pipe is dear know anything of the history of the material. Some interesting particulars of its source and treatment are given in the Board of Trade Journal. The district of Bessischehr, Asia Minor, supplies the whole of the meerschmum used throughout the world and the industry gives employment to about 4,000 persons, mainly Kurds and Persians. The best yield is obtained from mines, but supplies are also still obtained from the sea.

The methods of working are primi-

porary home of Major I. H. Tomlinson, who has lived since the recent unpleasantness in a cistern at the corner of Broadway and Jones street.

The cistern is in the summit of a hill on the Demarest estate and is reached through a short tunnel. A rough opening has been made in the wall, and in this primitive doorway the occupant may be seen smoking the pipe of contentment, as indifferent to earthquakes as were his ancestors of the stone age.

A cat shares the subterranean apartment and pictures from the magazines have been pasted upon its walls. It had been the intention of the owners of the property to make a curio room of the cistern, which is about ten feet across, and its walls had been covered with whitewash. The smoke of the

MODERN HAYMAKING WITH SIDE DELIVERY RAKE AND LOADER.

to dry out and on this account its quality is often impaired, bringing its market price considerably below what it should be. Sun and wind both play a part in the curing process, though the wind is the more important factor of the two. Indeed the sun alone is likely to bleach and discolor the clover after it has been cut. The hot rays of the sun withers up the leaves, preventing the natural escape of the water from the stems. To illustrate this more clearly by an example, take two trees that are cut down in June, when the leaves are in full vigor. Have the limbs removed from one so that no leaves remain. Allow the other to lie just as it fell. Examine the trees two or three weeks later, and you will find that one trunk contains far more water than the other. One tree was sucked dry by the leaves, the other was trimmed of leaves, and no pumps were at work to drain the trunk dry. When clover hay is spread out to the sun the leaves which contain these little pumps are put out of action, because they are shriveled and dried up, and cannot do their duty. If, soon after cutting, the clover is piled in fair-sized windrows, and left fairly open to the wind, the

great conflagration, however, converted this to black.

Major Tomlinson has found the solid bedrock in which his abode is surken an admirable seismograph, and says that he has detected more than 100 tremors since the great earthquake. But neither fire nor seismic disturbance has terrors in the cistern, which would withstand a Kansas cyclone.—San Francisco Chronicle.

**No Harm Done.**

Judge—Here are three witnesses who heard you call this man a liar. Have you any excuse to offer?

Prisoner—Why, your honor, they were all good friends of his; they knew it already.—Translated for Tales from Famille-Journal.

**The Best Method.**

Medical Professor (to student)—Give me the best method for re-establishing the circulation.

Student—Call a cop.—Translated for Tales from Le Rire.

Unfortunately a man with an easy going disposition is apt to be "no account."

**PULSE of the PRESS**

Life insurance, Standard Oil, coal road stock, deviled ham. What next?—Milwaukee Sentinel.

The anarchist is an enemy of the human race, and should be dealt with as such.—Philadelphia Press.

San Francisco school children are to go to school in tents. Will they ever be able to enjoy a circus in after years?—New York Commercial.

No doubt the Pullman porters running on the Pennsylvania lines are now jealous of the higher officials, who enjoyed the coal stock graft.—Houston Post.

Mr. Rockefeller goes abroad in a \$700 state room, but then it must be remembered that he is taking a specialist physician along.—New York World.

President Baer now takes up the muck rake. If the practice spreads professional wielders of that implement will find their occupation gone.—New York World.

It is reported from Washington that Senator Beveridge is troubled with indigestion. Been reading the beef commissioners' report, eh?—Philadelphia North American.

Some old letters of Rockefeller have just come to light, and show that he was in favor of the simple spelling before Carnegie ever thought of it.—Philadelphia Ledger.

That old, old joke about the sausage jumping from the butcher's hook when whistled for and called Fido proves to have been grossly flattering to the sausage.—New York Press.

Trust magnates may be very smart men in their own offices, but on the witness stand they do not appear to have any more sense than ordinary men.—Washington Star.

A Salt Lake woman who was compelled to choose between her husband and her dog stood by the latter. It's not an easy matter to get a really good dog.—New York Herald.

The business talent of some of those railroad clerks was so pronounced that if they had not been found out they might have owned the road in a short time.—Philadelphia Press.

Mr. Cassatt is reported to be perturbed over that railroad graft business. This is disheartening, as folks believed that he would be at least agitated.—New York World.

Jesse E. James of Missouri, son of the notorious Jesse James, seems to be of quite a different sort. He has just been admitted to the bar. Outlaw and in law!—New York Commercial.

The Anthracite Trust has put the price of coal up 15 cents just to show that the miners aren't the only persons who can be magnanimous to the public.—Philadelphia North American.

Why should there be sympathy for a railroad clerk who is dismissed for accepting coal stock? Such gifts are the inalienable prerogatives of the "men higher up."—New York Herald.

San Francisco makes the sinister announcement that its marriage license bureau and the detention ward for those suspected of insanity are in the same building.—New York Herald.

J. Pierpont Morgan has purchased the noted art collection of Rudolphe Kann for five and a fifth millions. Which reminds us that some Kann and some can't.—New York Commercial.

We have not been able to decide whether the conviction of the packers on the charge of rebating is anarchy in the courts or a blow at our agricultural interests and foreign trade.—Philadelphia North American.

If the Panama Canal is really to be dug to music, there ought to be a splendid chance down there for some leather-runged band to put the finishing touches to "Everybody Works But Father."—Washington Post.

Sarah Bernhardt took a day off at Coney Island to shoot the chutes and do other girlish stunts. It gives us hope that there are many, many positively farewell tours yet in store for the country.—Philadelphia North American.

**OLD WORLD NOTABLES**

The Sultan of Turkey is a great collector of canaries.

The King of Bavaria receives \$1,350,000 a year for his royal services.

Sir Charles Wyndham and his company will make a tour of this country next year.

London's lord mayors have, during the last decade, collected more than \$100,000,000 for charity.

The Duke of Bedford is the premier peer of Scotland and hereditary keeper of Holyrood castle.

Prince Louis Napoleon is a general in the Russian army. This is not a reminder of Moscow, 1812.

The Czar of Russia is paid \$6,750,000 a year for his private use, while each grand duke receives \$1,000,000 a year.

Emperor William's latest fad is photography in three colors. He has a studio in his palace of Monbijou, where he works.

**"IT SAVED MY LIFE"**  
PRAISE FOR A FAMOUS MEDICINE

Mrs. Willadsen Tells How She Tried Lydia E. Pinkham's Vegetable Compound Just in Time.

Mrs. T. C. Willadsen, of Manning, Iowa, writes to Mrs. Pinkham: Dear Mrs. Pinkham—

"I can truly say that you have saved my life, and I cannot express my gratitude to you in words."

"Before I wrote to you, telling you how I felt, I had doctored for over two years steady and spent lots of money on medicines besides, but it all failed to help me. My monthly periods had ceased and I suffered much pain with fainting spells, headache, backache and bearing-down pains, and I was so weak I could hardly keep around. As a last resort I decided to write you and try Lydia E. Pinkham's Vegetable Compound, and I am so thankful that I did, for after following your instructions, which you sent me free of all charge, I became regular and in perfect health. Had it not been for you I would be in my grave to-day."

"I sincerely trust that this letter may lead every suffering woman in the country to write you for help as I did."

When women are troubled with irregular or painful periods, weakness, displacement or ulceration of an organ, that bearing-down feeling, inflammation, backache, flatulence, general debility, indigestion or nervous prostration, they should remember there is one tried and true remedy. Lydia E. Pinkham's Vegetable Compound once removes such troubles.

No other female medicine in the world has received such widespread and unqualified endorsement. Refuse all substitutes.

For 25 years Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, has under her direction, and since her decease, been advising sick women free of charge. Address, Lynn, Mass.

Nothing Done! The hobo approached the pompous citizen and asked for alms. "Go to the ant, thou sluggard," quoted the p. c.

"Tain't no 'ese, mister," answered the hobo. "Me aunt's jist as tight-fisted as me uncle an' all de rest uv me relashuns."

**BOY'S TERRIBLE ECZEMA.**

Mouth and Eyes Covered with Crusts—Hands Pinned Down—Miraculous Cure by Cuticura.

"When my little boy was six months old, he had eczema. The sores extended so quickly over the whole body, that we at once called in the doctor. We then went to another doctor, but he could not help him, and in our despair we went to a third one. Matters became so bad that he had regular holes in his cheeks, large enough to put a finger into. The food had to be given with a spoon, for his mouth was covered with crusts as thick as a finger, and whenever he opened the mouth they began to bleed and suppurate, as did also his eyes. Hands, arms, chest and back, in short the whole body, was covered over and over. We had no rest by day or night. Whenever he was laid in his bed, we had to pin his hands down; otherwise he would scratch his face, and make an open sore. I think his face must have itched most fearfully."

"We finally thought nothing could help, and I had made up my mind to send my wife with the child to Europe, hoping that the sea air might cure him, otherwise he was to be put under good medical care there. But, Lord be blessed, matters came differently, and we soon saw a miracle. A friend of ours spoke about Cuticura. We made a trial with Cuticura Soap, Ointment and Resolvent, and within ten days or two weeks we noticed a decided improvement. Just as quickly as the sickness had appeared it also began to disappear, and within ten weeks the child was absolutely well, and his skin was smooth and white as never before. F. Hohrath, President of the C. L. Hohrath Company, Manufacturers of Silk Ribbons, 4 to 20 Rink Alley, South Bethlehem, Pa., June 5, 1905."

Poor Financing. "Maria, we'll have to give up this summer trip. My account at the bank is already overdrawn."

"O, John, you are such a wretched financier! Why didn't you put your account in a bank that had plenty of money?"

**SOMETHING NEW.**

Daily Through Sleeper to Dayton, O. Route, Erie R. R. to Lima, C. H. & D. to Dayton, commencing June 24th, leaving Dearborn Station 9:30 p. m., arriving Dayton 7:55 a. m., direct line to Wapakoneta, Sidney, Lima and Troy, serving breakfast on cafe car before arrival if desired. Particulars and reservations, Erie Ticket Office, 234 Clark street, Chicago.

An Englishman was successfully tested the vitality of some wheat which was grown in 1823 and carefully preserved since.

Mrs. Wigdower's Soreness Gravy for Children: Relieves the cough, relieves inflammation, soothes the throat, cures whooping cough.

Juvenile crime in France has decreased by 30 per cent among boys and 42 per cent among girls since 1881.
