CLASH OVER UNION LABEL

FEDERATION REFERS MATTER TO NEXT CONVENTION.

GOMPERS' POLICY IS SANCTIONED

Plan of Creating Political Power Out of Union Labor Votes is Approved by Minneapolis Convention—To Form Labor Press Association.

Minneapolis, Nov. 14.—The second day's session of the twenty-sixth annual convention of the American Federation of Labor in this city was full of interest, the most important action being regarding the adoption of a universal label design, referring the matter to the convention of 1907. This action, however, was not taken until after a lively discussion. The cigar-makers, printers and hat-ters led the opposition in regard to adopting a general label, claiming they have spent much money in advertising their respective labels, and are deriving much benefit as a result, which would be lost were the federation to adopt a general label.

President Gompers' plan of creating a political power out of combined union strength was indorsed by the convention, when it approved the report of Vice President James Duncan, in which he sanctioned the policy of Mr. Gompers. Mr. Duncan's report showed that the federation's campaign fund amounted to \$8,956.89.

One of the lively tilts of the day came when the committee on rules recommended that the convention adjourn at noon Saturday until Monday morning. Delegate D. D. Driscoll of Boston energetically started an opposition discussion.

"We are here to transact business and not to attend football games," said Mr. Driscoll.

The recommendation to adjourn Saturday noon was carried. A mass meeting was held at the Auditorium, at which addresses were made by Samuel Gompers, John Mitchell, president of the mine workers, and John Duncan.

While the convention is in session, an effort will be made to form a national labor press association.

EAST LOOKS FOR NO STRIKE

No Trouble in Reaching Agreement With Railway Employes.

New York, Nov. 14.—There no longer appears to be any danger of a strike of railroad employes in the east, as the situation with reference to the demands of members of certain organizations has considerably cleared. The New York, New Haven and Hartford and the New York Central railroads came to an agreement with committees representing the firemen of the two roads affecting the status of the men on the new electric locomotives and the adjustment committee of the Erie locomotive engineers announced it had come to an agreement with the officials of that system.

It was stated at the offices of the Erie system that there will be no trouble in reaching an agreement with the firemen at the present time, as President Underwood's letter to Chief Hanrahan was not a refusal to grant concessions to the dissatisfied men, but simply a request to hold off until settlements could be made with yard men, switchmen, brakemen and other employes of the company. It was said that when these adjustments shall have been made the demands of the firemen will be taken up and those considered reasonable be granted.

The Food Value of a Soda Cracker

You have heard that some foods furnish fat, other foods make muscle, and still others are tissue building and heat forming.

You know that most foods have one or more of these elements, but do you know that no food contains them all in such properly balanced proportions as a good soda cracker?

The United States Government report shows that soda crackers contain less water, are richer in the muscle and fat elements, and have a much higher per cent of the tissue building and heat forming properties than any article of food made from flour.

That is why **Uneda Biscuit** should form an important part of every meal. They represent the superlative of the soda cracker, all their goodness and nourishment being brought from the oven to you in a package that is proof against air, moisture and dust—the price being too small to mention.

Things You Ought to Know.

That you are respected by your friends as your character merits;

That a man's true worth is not measured by the size of his clothes;

That the marriage relation was instituted of God under holy laws;

That the most profitable mining business is to mind your own business;

That your best friends are not always those who pay you the highest compliments;

That a secret has become public property when confided in a friend, for he or she has confidants;

That married life is not all honey-moon, for honey will soon sour and the moon will grow old;

That a minister makes no charge for performing the marriage ceremony, but expects the usual \$5.00 or more,

That any minister authorized by the rules of the church is qualified to perform the marriage ceremony in Nebraska;

That strangers judge the moral tone of a community largely by the appearance of the churches and schools;

That you should always think you had the best woman in the world for your wife, even if you know you haven't;

That you should never interfere in other people's domestic troubles, unless you are prepared to fight both sides of the house;

That a quiet little home wedding is always in better taste than the extravagance often indulged in by those who can ill afford it;

That the estimate which you place on your own importance is vastly different from that which your neighbors see in you;

That you should always keep your window blinds raised on a stormy night, it may save the life of some one lost in the storm;

That your friends would appreciate a few kind words from you during life, rather than flowers upon their caskets when they are dead.

Recommendations of Committee Would Make Laws More Lenient.

Philadelphia, Nov. 14.—The national congress on uniform divorce laws held its second meeting in this city. The first meeting was held at Washington nine months ago, at which time an adjournment was taken to permit a committee to draft a bill on uniform divorce laws, to be presented to the legislatures of all the states. The bill drawn by the committee names six causes for which divorces can be granted. They are infidelity, felony, bigamy, desertion, habitual drunkenness and intolerable cruelty. The committee recommends that the various legislatures be asked to agree on a period of residence before application may be made for divorce. It is expected by the committee that this recommendation, if adopted by all the states will decrease the number of migratory divorces. Delegates from all sections of the country attended the session.
