Holmes, 315 Jackson St., St. Paul, Minn, and J. M. MacLachlan, Box 116, Watertown, So. Dakota Authorized Government Please say where you saw this advertisement.

TOILET ANTISEPTIC cleanses and heals mucous membrane affections such as nasal and pelvic catarrh, sore throat,

canker sores, inflamed eyes, and is a perfect dentifrice and mouth wash. Paxtine makes an economical medicinal wash of extraordinary cleansing and germicidal power, warm direct applications of which are soothing, healing and remarkably curative. At druggists or by mail, 50c. Sample free. The R. Paxton Company, Boston, Mass.

CARNEGIE'S TAX HEAVIEST.

Assessed on \$5,000,000 and Rockefeller on \$2,500,000.

The New York City personal tax list was opened for inspection Monday in the office of the tax commission. The estimutes of the personal property in the city of several of the more celebrated multimillionaires are considerably larger han last year. Andrew Carnegie heads the list with a valuation of \$5,000,000; John D. Rockefeller comes next with \$2,-500,000. The estate of the late Russell Sage is rated at \$2,000,000. John D. Rockefeller, Jr., escapes with a paltry 50,000. Mrs. Cornelius Vanderbilt, who on the tax list is mentioned as Alice G. Vanderbilt, is rated at a full million. The Russell Sage estate is assessed at \$50,-300,000 on personal property and real estate and the taxes on it amount to approximately \$735,000.

The commissioners apparently made a very close inventory of the personal holdings of Mrs. Hannah Elias, the negro enchantress who figured in the sensational lawsuit instituted by John R. Platt, the aged millionaire, for the recovery of hundreds of thousands of dollars. Her personal estate is valued at \$71,900.

Senator Depew escapes with a valuation of \$50,000 and August Belmont and Cornelius N. Bliss each with double that amount. J. Pierpont Morgan is listed at \$400,000. Following are some other es-

	Henry Clews	\$100,000

The total assessed value of real and personal property in the city, according to the assessor's report, is now \$8,805,-219,570, an increase of about \$405,000,-000 over that of last year.

Thirty thousand employes of the New York Central railroad will receive in-

President Hill of the Great Northern has announced definitely his purpose to retire from active business on July 1. Western lines met and refused to ex-

tend the selling dates of homeseekers' excursions to include the first and third Wednesdays in the month.

The Attorney General of the United States has issued an opinion that it is illegal for railroads to issue reduced transportation to men employed in the government work of reclamation.

Only one other big road has so far adopted the pension system. The Illinois Central has had such a plan in operation for more than five years and has found that it worked in every way for the betterment of the service.

An agreement fixing \$50,000,000 as the price to be paid for the properties of the Union Traction and Chicago City Railway companies, in case the city decides to purchase them, has been reached be tween the companies and the council's traction committee. The committee will recommend an ordinance for said purchase, and Mayor Dunne expressed his

E. H. Harriman, who is just now much in the limelight because of his financial coup in gaining control of the Illinois Central and thus becoming mas ter of 29,000 miles of railroads across the continent, representing a valuation of \$2,000,000,000, gave to a Chicago reporte: quite a remarkable interview. On being asked if he was ambitious to become a financial king, he said: "I would give it all up to-morrow if I could." Contrary to the opinion recently expressed by J J. Hill, Mr. Harriman said he thought we had enough railroads and what we ware ed was the development of the territory through which the railroads ran and improving the lines to the highest point of

Former President Fish of the Hilling: Central, writing for the New York Jour nal of Commerce, predicted a great indus trial crisis, and declared that Wall stree was now the plaything of cliques and

The Illinois traction system has an nounced its intention to compete with the Pullman Sleeping Car Company, an: has already placed in service on the line between Bloomington and St. Louis, via Decatur and Springfield, two trolley sleeping cars. There are twenty berths. ten on each side, and four chairs in the

Annual Losses Due to Insects. If the power of the mosquito had not been proved to us beyond a doubt, we would be inclined to regard the estimate of \$700,000,000 annual loss to our farming interests caused by insects, which has been made by the Dopartment of Agriculture as too startling to be true. The following table

	Annual		Amount
Products.	Value.	P. C.	of Loss.
Cereals \$2	000,000,000	10	\$200,000,000

they are vulnerable The work has been going on for some years and much progress has already been made. The cotton worm which formerly levied an annual tax of \$30,-000,000 on the cotton crop, is now controlled by sprays; it has been proven that the ravages of the Russian fly which sometimes have reduced the wheat acreage in Ohio 40 per cent and in Indiana 60 per cent besides greatly impairing the yield of the remaining acreage, can be considerably checked by planting wheat at seasons when the fly is not so rapacious; the coddling moth is controlled by arsenical sprays and \$20,000,000 worth of apples saved as a result.

The orange and lemon orchards of California have been relieved of the white scale which threatened to destroy them, by the importation from Australia of the ladybird, a natural enemy of the scale. Many other instances could be given of the wisdom of watching the insects.

Dry Earth as a Disinfectant. It is well known that fine, dry dirt is one of the best of absorbents and disinfectants. It is also plentiful, and costs nothing but the labor of handling. It makes excellent bedding, if covered over with a few inches of straw, and it really keeps the cows clean, even when used in the stalls without straw, as it is easily removed from the hair with a brush. A stall bedded with dry earth can be cleaned out in a much shorter time than when the earth is not used, and, as dirt absorbs the liquids and gases, quite a saving is effected in that manner. Its use goes beyond the stall. As the stable should be cleaned daily, quite a large quantity of dry earth will be used in the course of a year, and it will necessarily be added to the heap itself, yet its presence therein will double the value of the manure by preventing loss of fertilizing material. It is a better absorbent than straw or corn stalks, and is easily handled when the manure is hauled to the fields.

Four-Row Corn Marker. The following suggestion, which

seems a good one, comes from a farmer who has built and used one. He says: "This will make four marks at a time on ridges or in furrows. To turn at the end of rows, pull gang pole out of hole, lay it back, fold up outside runners, and you have just two runners to turn. the same as an ordinary sled. The sketch will clearly show the construction of the marker. On stumpy ground,

raise the outside runners as when turning, and go right along.

Dissolved Bone Black.

When bone black is treated with sulphuric acid the insoluble phosphate which it contains is converted into soluble phosphate, says a Virginia bulletin. Dissolved bone black contains from 15 to 25 per cent of available phosphoric acid. In this form it is one of the most valuable phosphatic fertilizers. The question is often asked, is available phosphate from dissolved bone better than that from dissolved rock? It would be well, therefore, to state in this connection that available phosphoric acid has the same value regardless of its source.

Milk Fat.

Of 319 samples of whole milk analyzed by a Canadian station, forty-five were pronounced adulterated and

unfavorable than the results obtained in previous years. Twenty-nine samples of cream examined showed percentages of fat ranging from 12.63 to 33.51. The author believes that the following standard should be established in Canada: Whipping cream not less than 25 per cent fat, and table cream not less than 17.5 per cent.

Alfalfa as a Weed Killer. Probably no other crop, without a single exception, presents so many characteristics of value. As it is studied more and more, and as new experiments are made with it in different capacities, its wonderful capacities become more and more manifest. A very eminent authority has discovered that it is a weed eradicator of unfailing power. This will seem like contradiction to readers who have been cautioned about weeds, and which will prove more destructive to alfalfa than any combatable influence. Nevertheless it is strictly true that the plant is the greatest destroyer of weeds known. This comes not so much from any quality contained in the alfalfa plant, but from the inability of the weeds to endure having their heads cut off so many times in summer close to their feet. The most strenuous weed soon will succumb to this harsh treatment, while the alfalfa plant will thrive all the better the more it is cut. If weeds can be kept back from choking the young alfalfa plants until they, the alfalfa plants, are tall enough to be mowed, the question of weeds in the particular parcel of ground is settled. Therefore, it is wise to select a weedy piece of ground for the alfalfa field, but before sowing the seed every precaution should be taken to kill as many weeds as possible. This can best be done by simply following the oft-repeated injunction to thoroughly prepare the seed bed before sowing the seed. If this be done, and the tract

Testing Individual Cows.

A circular by the Illinois Station emphasizing the importance of studying the production of individual cows contains records for one year of eighteen dairy herds in Illinois, including 221 cows. The average production was 5,-616.99 pounds of milk and 226.63 pounds of butter fat. The best herd averaged 350.17 pounds of butter fat and the poorest 142.05 pounds. The best ten cows averaged 388.75 pounds of butter fat and the poorest 10,109.42 pounds. It is believed that at least one-third of the cows in the ordinary herds are practically unprofitable. A marked improvement was observed in herds where grading had been practiced. It was found possible to remove five cows from a herd of ten and thereby increase the profit \$7.62 per head.

Farm Notes. There is no sensible reason why half A Positive as much wheat again may not be had from an acre within less than a gener-

One-fourth of the dairy cows of the country do not pay for their feed, and more than half of them do not return any profit.

ation of time.

In nine months 4,184,181 dozen eggs, valued at \$865,437, were exported from the United States, double the number sent out during the same period last

The Agricultural Department's annual report says the corn crop can be increased by one-half within a quarter of a century, and without any pretense that the limit has been reached.

Equally feasible is a 50 per cent in crease in the crops per acre of oats, barley, rye, buckwheat. Potatoes, instead of growing less than 100 bushels per acre, should double their produc-

The cotton farmer and planter could double the present crop of two-fifths of a bale per acre, and the feat would need nothing more than demonstrated and well-understood principles of farm

Many women suffer in silence and drift along from bad to worse, knowing well that they ought to have immediate assistance.

How many women do you know who are perfectly well and strong?
The cause may be easily traced to some feminine derangement which manifests itself in depression of spirits, reluctance to go arywhere or do anything, backache, dragging sensations, flatulency, nervoushes, and sleeplessness.

These symptoms are but warnings that there is danger ahead, and unless heeded, a life of suffering or a serious operation is the inevitable result. The best remedy for all these symptoms is

Lydia E. Pinkham's Vegetable Compound made from native roots and herbs. No other medicine in the country bas received such widespread and unqualified endorsement. No other medi-

cine has such a record of cures of female ills. Miss J. F. Walsh, of 328 W. 36th St., New York City, writes:-"Lydia E. Pinkham's Vegetable Compound has been of inestimable value in restoring my health. I suffered from female illness which caused dreadful headaches, dizziness, and dull pains in my back, but your medicine soon brought about a change in my general condition, built

me up and made me perfectly well." Lydia E. Pinkham's Vegetable Compound cures Female Complaints, such as Backache, Falling and Displacements, Inflammation and Ulceration, and organic diseases. It is invaluable in preparing for child-birth and during the Change of Life. It cures Nervous Prostration, Headache, General Debility, and invigorates the whole system.

Mrs. Pinkham's Standing Invitation to Women Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.
