

EVEN IF DISCOURAGED

TRY DR. WILLIAMS' PINK PILLS FOR YOUR RHEUMATISM.

The Pills Have Cured the Disease in Almost Every Form and Even in Advanced Stages.

Rheumatism is a painful inflammation of the muscles or of the coverings of the joints and is sometimes accompanied by swelling. The pain is sharp and shooting and does not confine itself to any one part of the body, but after settling in one joint or muscle for a time, leaves it and passes on to another. The most dangerous tendency of the disease is to attack the heart. External applications may give relief from pain for a time but the disease cannot be cured until the blood is purified. Dr. Williams' Pink Pills are the best medicine for this purpose as their action is directly on the blood, making it rich, red and healthy. When the blood is pure there can be no rheumatism.

Mrs. Ellen A. Russell, of South Goff St., Auburn, Me., says: "I had been sick for fifteen years from impure blood, brought on by overwork. My heart was weak and my hands colorless. I was troubled with indigestion and vomiting spells, which came on every few months. I had no appetite and used to have awful fainting spells, falling down when at my work. I frequently felt numb all over. My head ached continuously for five years.

"About two years ago I began to feel rheumatism in my joints, which became so lame I could hardly walk. My joints were swollen and pained me terribly. "Dr. Williams' Pink Pills were recommended to me by a friend, after I had failed to get well from the doctor's treatment. When I began taking the pills, the rheumatism was at its worst. I had taken only a few boxes, when the headaches stopped and not long afterward I felt the pain in my joints becoming less and less, until there was none at all. The stiffness was gone and I have never had any return of the rheumatism."

Dr. Williams' Pink Pills have cured such diseases as nervous and general debility, indigestion, nervous headache, neuralgia and even partial paralysis and locomotor ataxia. As a tonic for the blood and nerves they are unequalled.

A pamphlet on "Diseases of the Blood" and a copy of our diet book will be sent free on request to anyone interested.

Dr. Williams' Pink Pills are sold by all druggists, or sent, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

To ask a question that can't be answered is merely feminine.—Chimnie Fadden and Mr. Paul.

If a man could peruse his own biography it would probably surprise him more than any one else.

You Can Get Allen's Foot-Ease FREE Write to-day to Allen S. Olmsted, Le Roy, N. Y., for a FREE sample of Allen's Foot-Ease, a powder to shake into your shoes. It cures tired, sweating, hot, swollen, itching feet. It makes new or tight shoes easy. A certain cure for Corns and Bunions. All Druggists and Shoe Stores sell it. 25c.

SICK HEADACHE

Positively cured by these Little Pills. They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable. SMALL PILL. SMALL DOSE. SMALL PRICE.

Genuine Must Bear Fac-Simile Signature **Small Pills. Small Dose. Small Price.**

Help the Horse No article is more useful about the stable than Mica Axle Grease. Put a little on the axles before you "hook up"—it will help the horse, and bring the load home quicker.

MICA AXLE GREASE

works well—better than any other grease. Coats the axle with a hard, smooth surface of powdered mica which reduces friction. Ask the dealer for Mica Axle Grease. STANDARD OIL COMPANY

FARMS IN WESTERN CANADA FREE New Wheat Lands IN THE Canadian West

5000 additional miles of railway this year have opened up a largely increased territory to the progressive farmers of Western Canada, and the Government of the Dominion continues to give 160 Acres Free to Every Settler.

The Country Has No Superior

Coal, wood and water in abundance; churches and schools convenient; markets easy of access; taxes low; climate the best in the northern temperate zone. Law and order prevail everywhere. For advice and information address the Superintendent of Immigration, Ottawa, Canada, or the authorized Canadian Government Agent, W. D. Scott, Superintendent of Immigration, Ottawa, Canada, or E. T. Holmes, 315 Jackson St., St. Paul, Minn., and J. M. MacLachlan, Box 216, Watertown, So. Dakota. Authorized Government Agents. Please say where you saw this advertisement.

FARMS AND FARMERS

The Manure Heap.

Though by fermentation and by forking over the manure is made fine and soluble, it must not be overlooked that the process is a gradual one, and hence every rain that saturates the heap carries downward the soluble parts as soon as the manure is decomposed. The jet-black liquid that flows off from the heap is the richest of the farm, and as it passes away the ready plant food which is dissolved in it is lost, leaving behind a mass of matter, often supposed to be the most valuable because of its bulk, but which really is not worth the labor of hauling to the field. Unless the manure, therefore, be carefully preserved, it will be valueless. It should be protected from drenching rains and the influence of heat from the direct rays of the sun. Plenty of absorbent material should be added to absorb the volatile matter, and water is also beneficial to the heap, provided that it does not drench or flow off. The manure heap should be worked over occasionally, in order to prevent "fire-fanging." This may require additional labor, but the saving of the essential elements of the manure will be more than a compensation for the time well expended. The principal loss to be observed are to prevent loss by rain, preservation of volatile matter with moisture and absorbents, have the manure fine, and also to endeavor to have it thoroughly decomposed.

Disinfection of Stables.

In discussing the importance of the disinfection of stables and the danger of neglecting it Dr. Haring of California points out that "negligence in properly disinfecting stalls and stables where animals affected with contagious diseases have been is frequently the cause of a reappearance of the disease." The germs of glanders, for example, may remain alive in stables for several months after the diseased animals have been removed, and if thorough disinfection is not resorted to all animals housed in the stable are subject to infection from this source. "Many failures to eradicate tuberculosis from dairy herds by the repeated application of the tuberculosis test and the prompt removal of all reacting animals are due to the fact that the stables were not disinfected." Tuberculosis spreads rapidly among cattle closely herded together. To prevent this stables should be thoroughly disinfected at least once a year.

Simple Test for Small Seeds.

The gravity method of seed separation here illustrated is the old time practice of "brining" wheat, barley, oats, etc., before sowing, but applied to seeds of much smaller size, such as tomato and eggplant seeds. As used at the New Jersey experiment station, the bottle at A in the cut contains pure water, upon which many seeds are seen as floating and a larger number at the bottom. These light, floating seeds are to be rejected. In the bottle at B is a 20 per cent solution of common salt (a very thin sirup would have done as well), in which eggplant seeds

Do Bees Think?

Maurice Materlinck, the Belgian writer, adduces a number of interesting facts, in an article in Harper's Magazine, to show that bees have the power of thinking. Transported to California, he says, our black bee completely alters her habits. After one or two years, finding that summer is perpetual and flowers forever abundant, she will live from day to day, content to gather the honey and pollen indispensable for the day's consumption; and her recent and thoughtful observation triumphing over hereditary experience, she will cease to make provision for her winter. Buchner mentions an analogous fact: In Barbados, the bee whose hives are in the midst of the refineries, where they find sugar during the whole year, entirely abandon their visits to the flowers.

A Fine Shade Tree.

The tulip tree, one of the most ornamental of our shade trees, succeeds well when transplanted, after the leaf buds begin to appear, but it is pretty sure to fall if removed earlier. Such, at least, is the reported experience of one who planted a row of them a mile long, of which hardly one in a hundred was lost. Possibly, however, there was something in the soil or situation which gave him success, and the rule may not work in all cases. The tulip is well worth experimenting with, for when grown it is a handsome, symmetrical tree, with a peculiar leaf and a beautiful blossom.

Soluble Oils to Destroy Scale.

The Ohio station has continued its work with proprietary preparations of soluble oils with the result that these materials appear to compare favorably with lime sulphur wash in effectiveness as remedies for scale insects. In general they may be diluted in water so as to form 5 per cent solutions. It is suggested, however, that the variable results obtained with soluble oils indicate a variation in composition, and when safety, cost and efficiency are considered, the author recommends lime sulphur as the best remedy.

Value of Ensilage.

Ensilage is valuable as a means of dieting stock in winter, affording them green, succulent food at that season, when nothing but the dry material can be had. For that reason, if for no other, it is a valuable adjunct to the crops used for food. The farmer who has no ensilage, but who stores in a crop of sugar beets, mangels, turnips, carrots or potatoes, will find himself fortunate in having a variety. There is no difficulty in feeding roots if they are properly stored. Roots are injured more by heat than by cold. Freezing is not injurious if roots are not thawed out too suddenly. By keeping them at an even temperature they will last until the summer opens.

Care of Bees.

Bees should be kept at a temperature ranging from 42 to 45 degrees above zero during cold weather, and the hives should be dry. The light should be excluded as much as possible, and the hives should not be exposed to sudden changes of temperature. An ample supply of honey should be left at the end of the season for the support of the bees during the winter. It is not necessary to put the hive under shelter until winter approaches, but it should

Manure From the Stalls.

Manure that is allowed to remain in the yard does not give as good results as that taken from the stalls, as this fact has been shown by using both kinds of manure on growing crops. It is not expected that farmers should keep their manure in stalls, but it is now in order to prepare for the storage of manure to prevent leaching by rains. All foods should be fine and also the bedding, which will permit of better absorption of liquids and greater facility of storage under shelter.

Melons in the Corn Shock.

If, when cutting corn, you will place in one of your largest shocks about a dozen of your choicest watermelons, at Christmas, when the snow is on the ground and the frost is on the plane, you can sit by the roaring fire and eat one of your melons, which has kept all that time in the shock of corn.—Farm Journal.

The Melon Aphid.

The melon aphid (Aphis gossypii) is generally distributed throughout the United States, but is especially injurious in the Southwest, according to a bulletin issued by the United States Department of Agriculture. It attacks a great variety of economic plants belonging to different families. The natural enemies of the pest are ordinarily not sufficient to hold it in control. It may be destroyed by fumigation with carbon bisulphid or by the use of pyrethrum, tobacco fumes, or kerosene emulsion. Treatment with kerosene emulsion has the advantage that it is also destructive to a considerable variety of other insects which attack cultivated plants in conjunction with the melon aphid.

A Barb Wire Reel.

Here is a barb wire reel that one can wind barb wire on instead of an old barrel, which is slow work. We present a little drawing of one that can be easily made by an ingenious farmer. It is mounted on wheels, and can be drawn along by a man, while a boy steadies the handle to keep the

REEL FOR BARB WIRE.

wire from unwinding too rapidly and kinking. For winding up wire that is taken off of a fence, the machine can either be pushed or pulled, going just fast enough to keep up with the wire as it is being wound on the reel. A little rack like this, says The Farmer, would be of considerable value to any one who has any amount of barb wire fencing to wind.

Not the Right Kind.

Professed politicians who have reduced public office to an exact science find the independent voter a sad stumbling-block—a fact which is amusingly disclosed by a story found in the recent life of the late George Monro Grant, the eminent Canadian educator and clergyman.

Toward the end of Sir John Macdonald's life he and Principal Grant, then the head of Queen's College, met at dinner at the house of the premier's brother-in-law, Prof. Williamson.

"How I wish," the premier said to the principal, "that you would be a steady friend of mine."

"My dear Sir John," the principal replied, "I have always supported you when you were right."

The premier's eyes twinkled, and he laid his hand upon the shoulder of the principal.

"My dear man," said he, "I have no use for that species of friendship!"

"THE MARRYING SQUIRE."

Justice Geo. E. Law, of Brazil, Ind., Has Married 1400 Couples.

Justice Geo. E. Law, of Brazil, Ind., has fairly earned the title "The Marrying Squire," by which he is known far and wide, having already married some 1400 couples. Ten years ago he was deputy County Treasurer.

"At that time," said Justice Law, "I was suffering from an annoying kidney trouble. My back ached, my rest was broken at night, and the passages of the kidney secretions were too frequent and contained sediment. Three boxes of Doan's Kidney Pills cured me in 1897, and for the past nine years I have been free from kidney complaint and backache."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Left-Handed Compliment.

Miss Hoamley—Miss Rakely had the audacity to say I was "as ugly as sin."

Miss Goodart—Coming from him, my dear, that's a compliment. Mr. Rakely proves by his conduct that he considers sin anything but ugly.—Philadelphia Press.

State of Ohio, City of Toledo, Lucas County.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

FRANK J. CHENEY. Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886. A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

The first steam warship was the Fulton.

built in Brooklyn navy yard in 1815. She was 2,000 tons and carried thirty guns.

BABY IN TERRIBLE STATE.

Awful Humor Eating Away Face—Body a Mass of Sores—Cuticura Cures in Two Weeks.

"My little daughter broke out all over her body with a humor, and we used everything recommended, but without results. I called in three doctors, but she continued to grow worse. Her body was a mass of sores, and her little face was being eaten away. Her ears looked as if they would drop off. Neighbors advised me to get Cuticura Soap and Cuticura Ointment, and before I had used half of the cake of Cuticura Soap and box of Cuticura Ointment the sores had all healed, and my little one's face and body were as clear as a new-born babe's. I would not be without it again if it cost five dollars, instead of seventy-five cents. Mrs. George J. Steese, 701 Coburn street, Akron, Ohio, Aug. 30, 1905."

Bacteria as Engineers.

Improbable as it may seem, states a scientist in the government employ, it appears to be a fact that bacteria are able to cause the breaking down of stone walls.

Recent investigations have shown that nitrifying bacteria swarm in the mud forced by the disintegration of cement in reservoirs, and it is believed that the decay of the cement results from the action of nitrous acid produced by the bacteria. Yet these same microscopic engineers, whose myriads undermine solid walls of masonry, are nevertheless of immense use to man, because they are chief agents in the purification of water.—Philadelphia Record.

Peter I. of Servia is credited with being the most intellectual monarch that country ever had.

MRS. C. E. FINK

Lydia E. Pinkham's Vegetable Compound

is an honest, tried and true remedy of unquestionable therapeutic value. This medicine made from native roots and herbs contains no narcotics or other harmful drugs and today holds the record for the largest number of actual cures of female diseases of any medicine the world has ever known, and thousands of voluntary testimonials are on file in the laboratory at Lynn, Mass., which testify to its wonderful value.

Mrs. C. E. Fink, of Carnegie, Pa., writes:—Dear Mrs. Pinkham:—"I wish every suffering woman would take Lydia E. Pinkham's Vegetable Compound and write to you for advice. It has done me a world of good and what it has accomplished for me I know it will do for others."

When women are troubled with Irregularities, Displacements, Ulceration, Inflammation, Backache, Nervous Prostration, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Out of her vast volume of experience she probably has the very knowledge that will help your case.

A Wonderful Oil Stove

Entirely different from all others. Embodies new ideas, new principles. Easily managed. Reduces fuel expense. Ready for business at moment of lighting. For your summer cooking get a

NEW PERFECTION

Wick Blue Flame Oil Cook-Stove

Its heat is highly concentrated. Does not overheat the kitchen. Oil always at a maintained level. Three sizes. Fully warranted. If not at your dealer's, write our nearest agency for descriptive circular.
