> Mrs. Ruth Shore has been seriously ill the past week but seems to be recovering. She had never fully recovered from illness of seven weeks ago.

Mrs. J. E. Thackrey had another spell of illness the first of last week but has recovered and was able to go fishing and caught a fine black bass Monday evening.

L. H. Smith had an operation performed at the Swedish hospital in Omaha last Thursday for a fractured limb. Will Clarkson went to see him while in Omaha last week.

At a meeting of the stock-holders of the V. B. & A. Tuesday night the same members were elected with the exception that Geo. Elliott was elected in place of W. S. Barker.

H. H. Wakefield of Crookston wants 150 acres prairie broke. Will pay \$2.50 per acre for all breaking done in May, \$2.00 per acre for first half of June. Good smooth land, half mile furrows. Cash every Saturday night.

D. W. Parmaler, Jas. H. Quigley and R. M. Fad lis have gone to Texas and Old Mexico via Denver to receive some cattle they purchased last winter and which they expect to run on the reservation the coming season.

Jas. Galloway was called up by phone this morning stating that his half-brother, Dave Hendershot, died this morning at McCann. No particulars were given. Mr. Hendershot was formerly postmaster at McCann. Mr. Galloway and wife have gone out there.

M. C. Carroll of our city is enjoying a visit from his son and daughter, Frank and Miss Catherine, of Keokuk, Iowa. J. M. is also down from the reservation visiting with them. Frank is employed with the C. B. & Q. R. R., and is off on a 30 days leave of

The Rev. Wells confirmed a class of eleven members last Thursday evening at the Episcopal church, at which time special services were held. Those uniting with the church were Prof. Watson, Mr. and Mrs. Olson and son, Mrs. Mabel Caton and children, Mrs. Garrett and children, Paul Cole, Helen Sparks and a lady from Cody.

Our local base ball team returned from their western trip Wednesday morning, and on the high school grounds at 3:30 p. m. outplayed the Kewanee team and won by a score of 24 to 10 in seven innings. At Crawford the Valentine team was defeated by a score of 6 to 5; at Chadron they were out-battled 12 to 3, and at Gordon the game resulted 12 to 9 favor of

Gordon. A pleasant surprise party was tion without the initiation work. guests present were J. T. Keeley reports the wheat crop out-look E Tracewell and wife, Mrs. Jefvery bad and needing rais. He freys, Frank Randal and wife, says the wheat is very short but Mrs. Brosius, Mrs. Ida King, beginning to stalk and the ground Miss Katie King and Miss Gail too. Early corn is just coming were much appreciated. Refresha pleasant evening.

AILMENTS OF COWS.

Fever, Garget, Etc.

Of the different diseases to which a cow is liable, none is dreaded much attacks the best milkers and often leaves a permanent injury to their productive capacity, writes C. S. Cornman in the American Farm World. If a record is kept of the date of breeding each cow, as it should be, it will be an easy mater to regulate the diet so as to prevent milk fever, garget and

As soon as the cow is allowed to go dry, she should be fed on a generous ration of forage and grain, which will give her strength and furnish suitable nutrition for the coming calf. We are speaking now of the cow coming fresh when not on grass. The week before she is one to calve it is well to feed a little more sparingly of the foods which stimulate milk production and keep close watch of the udder, and if toward the last there seems to be an overfuliness, or if the udder feels more than ordinarily warm, do not hesitate to draw out some of the milk.

Preventing Milk Fever. We have often found it necessary to do this and by doing so saved much subsequent trouble with fine milkers which, before coming into our posses-

sion, had lost a teat by neglect. These cows seemed with each new calf to be predisposed to a fresh attack and we were obliged to be on guard early in the day. When the calf came, it was allowed to suck enough to satisfy its hunger, then some milk was drawn from the quarters of the udder which the calf left untouched that relief might be experienced by the cow, but under no circumstances was she

millied clean. Plenty of warm water was given her to satisfy her thirst, and if she liked it a little bran was added to the water. All the forage she wanted was given her and her diet was about the same for three or four days as the last few days before coming fresh. From that time on the grain ration was gradually increased until at the end of two weeks, and sometimes less, she was on

At no time before the milk was fit to use was she milked dry. This time with us was the ninth milking. After that perfectly clean milking was the rule until we began to dry her up.

The "Cowy Odor" In Milk. If the cow be kept clean and the milk be drawn in a cleanly manner into a clean pail by a clean person and be removed from the barn shortly after and immediately strained there is no reason why winter milk should have a "cowy odor." This "cowy odor" is usually caused by filth which drops into the milk during the milking or is absorbed by the milk from the foul air in the stable. Milk should be removed from the stable before it cools to the temperature of the stable air; otherwise it will absorb taints rapidly. If sent to a winter creamery, it should be delivered at least three times a week. If manufactured on the farm the evening, then a guessing it should be made into butter as soon as possible after it is drawn from the cow. The longer that milk is kept be- prizes were contested for by sevfore being made into butter the poorer will be the product.—Professor J. B.

DAIRY POINTERS.

The cows should be well bedded both for comfort and cleanliness.

A bran mash now and then a shor time before calving is most beneficial. If the udder is excessively caked and hard, it is well to draw a little milk from it. This will help to ward off inflammation and garget,

It's poor policy to use anything but Watson and J. T. Keeley, who the best bull. A grade has no place at the head of your herd.

Do not move cows faster than comfortable walk while on the way to place of milking or feeding.

The breeder who has a definite idea in view can improve his animals. The splendid music. The quartette, one who goes at it blindly never can. Too many dairymen do not know whether their cows are paying or not. They do not know which are the good

and which the poor ones. Make a ady of the herd of cows, select the best ones, sell the poor ones and make the cows keep you instead Pettijohn recited a thrilling horse of you keeping the cows.

In all well regulated libraries ther are signs posted in conspicuous places bearing the one word "Silence." Sim- thrilled them with the vivid acflar signs should be posted in every milking shed.

or dips in it, and let no man tell you would rather have four ventilators

Smallight is the great natural disintwo great essentials to the health of man and beant. Dark, poorly ventilated and filthy stables are disease breeding grounds. Keep the stables clean and let the sunlight and fresh air peaetrate every nook and corner therein. Provide pleaty of windows in the stables and fix them so they can be opened and close! with ease and

A good hardworking cow should the fresh period, says the Farmers Advocate. Many cows will keep up a good flow until a very few days before calving, but it is a poor plan to let them do this. The ones who do this are the most persistent milkers, the ones that most need a good long rest. They will , they freshen again.

EXPOSITIONS BLUE RIBBON

won the highest honors obtainable. At the Trans-Mississippi, Omaha, 1898, it was granted the Highest Award and Gold Medal. At the Lewis & Clark Centennial, Portland, Oregon, 1905, the Highest Award and Gold Medal. Other famous beers were entered in competition, but STORZ BEER was adjudged the best by experts. These facts mean much to you if quality and superiority is what you desire in your beer.

The strict provisions of the National Pure Food Law do not require us to change our method of manufacture one iota. STORZ BEER is absolutely pure and has always been so.
