

KIDNEY TROUBLE

Suffered Two Years—Relieved In Three Months.

MR. C. B. FIZER, Mt. Sterling, Ky., writes: "I have suffered with kidney and other trouble for ten years past. Last March I commenced using Peruna and continued for three months. I have not used it since, nor have I felt a pain. I believe that I am well and I therefore give my highest commendation to the curative qualities of Peruna."

Pe-ru-na For Kidney Trouble.

Mrs. Geo. H. Simer, Grant, Ontario, Can., writes: "I had not been well for about four years. I had kidney trouble, and, in fact, felt badly nearly all the time. This summer I got so very bad I thought I would try Peruna, so I wrote to you and began at once to take Peruna and Manalin. I took only two bottles of Peruna and one of Manalin, and now I feel better than I have for some time. I feel that Peruna and Manalin cured me and made a different woman of me altogether. I bless the day I picked up the little book and read of your Peruna. It is the business of the kidneys to remove from the blood all poisonous materials. They must be active all the time, else the system suffers. There are times when they need a little assistance. Peruna is exactly this sort of a remedy. It has saved many people from disaster by rendering the kidneys service at a time when they were not able to bear their own burdens."

Precautionary Ventilation.

The man who entered the smoking car of the elevated train at Forty-third street strode to the rear end and opened the doors. Then he went half way back, sat down and lighted a cigar. An icy gale blew through the car, and two or three men started for the rear doors for the purpose of closing them. "Wait a few moments, gentlemen," said the passenger sitting next to the newcomer. "This man knew what kind of a cigar he was going to smoke a great deal better than we did."—Chicago Tribune.

There are 252,436 miles of ocean cable in use.

DYSPEPSIA

"Having taken your wonderful 'Cascarets' for three months and being cured of my chronic catarrh and dyspepsia, I think a word of praise is due to 'Cascarets' for their wonderful composition. I have taken numerous other so-called remedies but without avail and I find that Cascarets relieve more in a day than any other medicine I have used in a year."—James McGinnis, 108 Mercer St., Jersey City, N. J.

Best For The Bowels. Candy Cathartic. THEY WORK WHILE YOU SLEEP.

Annual Sale, Ten Million Boxes.

NEW DISTRICTS. Some of the choicest lands in the grain growing belt of Saskatchewan have recently been opened for settlement under the Revised Homestead Regulations of Canada. Thousands of homesteads of 160 acres each are now available. The new regulations make it possible for entry to be made by proxy, the opportunity that many in the United States have been waiting for. Any member of a family may make entry for any other member of the family who may be entitled to make entry for himself or herself. Entry may now be made before the Agent or Sub-Agent of the District by proxy (on certain conditions) by the father, mother, son, daughter, brother or sister of an intending homesteader.

Now Open for Settlement

The fee in each case will be \$10.00. Churches, schools and markets convenient. Healthy climate, splendid crops and good laws. Grain growing and cattle raising principal industries. For further particulars as to Rates, Routes, Best Time to Go and Where to Locate, apply to W. D. Scott, Superintendent of Immigration, Ottawa, Canada; or E. T. Holmes, 315 Jackson St., St. Paul, Minn.; or J. M. MacLachlan, Box 110, Watertown, So. Dakota. Authorized Government Agent.

FREE PAXTINE advertisement. To convince any woman that Paxtine Antiseptic will improve her health and do all we claim for it. We will send her absolutely free a large trial box of Paxtine with book of instructions and genuine testimonials. Send your name and address on a postal card to THE M. PAXTINE CO., Boston, Mass.

GOOD Short Stories

The pompous judge glared sternly over his spectacles at the tattered prisoner, who had been dragged before the bar of justice on a charge of vagrancy. "Have you ever earned a dollar in your life?" he asked, in fine scorn. "Yes, your honor," was the response; "I voted for you at the last election."

Not long ago a young Irishman was seeking work in southern Illinois, and among those to whom he applied was a farmer near Cairo. The farmer was attracted by the Celt's frank, cheery manner, and, while he was not in need of help, he asked, after a pause: "Can you cradle?" "Cradle!" repeated the Irishman. "Sure, I can! But, sir," he added, persuasively, "couldn't ye give me a job out of dures?"

Two Marseillaises were discussing the best method of eating game. "Well," said one, "if it is a woodcock, I hang it up on a nail by the beak and fasten some larks on its claws. After a week I throw away the woodcock and eat the larks, which by that time have absorbed all the flavor of the woodcock." "I do the same," replied the other, not to be outdone, "except that I throw away the larks as well as the woodcock, and eat the nail."

Mr. Smith has very strict ideas of order, and has also a great belief in his personal courage. Passing a club, whence noisy sounds were proceeding, he said to a friend: "This won't do. As usual, there isn't a policeman in sight, so I must go in and turn these roysterers out. You stop outside and count them as I throw them out of the door." In went the valorous Smith, and soon a heavy body came out of the window, with much breaking of glass. "That's one!" shouted the friend, counting. "Don't count any more," said a voice from the gutter, where the figure lay rubbing its bruises. "It's me that came out!"

Down the winding country road walked a strange trio—a comely and perfectly composed looking maiden and two men, on each of whose faces one could perceive the influence of the green-eyed monster. Suddenly a severe thunder storm came on, lightning flashed, and Mr. Brown remarked that he was frightened. Here was Robinson's chance. "What are you afraid of?" he asked, contemptuously. "I am as cool as can be." "Why, of course," answered the astute Brown. "If I were alone I should be the same, but I am afraid for Miss Jones in this lightning. You see she is so attractive." Robinson is still a bachelor, but Brown is not.

The Scare-Head.

When you're tired of verse and fiction And such stuff to win you bread— Also tested jokes and squib-work 'That nobody ever read, Do not falter in your calling, For, when all is done and said, There's success and wealth appalling For the man who writes the "head."

It's so easy: "Stabs His Mother!" Or, "Has Rogers Lost His Voice?" "Fifty Boodlers Caught Red Handed!" "Who Will Be the People's Choice?" "Panama Canal Board Fired!" "Roosevelt Breaks His Arm at Play!" "Strike in Pittsburg—Hard Coal Higher!" That's the sort that goes to-day.

Put it up in big, black letters, Where the people all can see— Here you go: "He Stole a Million!" "Thaw Depends on Sympathy!" "Forty Lives Lost in Collision!" "Teddy Takes a Punch at Graft!" "Suicide!—He Loved Another!" "Hip! Hooray! For Big Bill Taft!"

Then, again: "White Sox Are Slaughtered!" "Guatemala in the Throes!" "War! The Japanese Are Seething!" "Muggsy Trends on Waddell's Toes!" "Unconstitutional, Say Railroads!" "Can You Tell How Old Is Ann?" "Crops Are Ruined—Famine Threatened!" "Never Touched Me!"—Harriman!"

It's a snap to get up scare-heads— Nothing like it anywhere— "Death Discloses Masquerader!" "Actress Steals a Millionaire!" "Big Bank Busts—Cashier Embezzled!" "Fairbanks Nips Another Plum!" "Daring Plot to Rob Chicago!" And—well, that is going some.—Success Magazine.

A Wonderful Hen.

The Wyandotte hen of James Carter of Thoroughfare, N. J., that lays two eggs a day—and eggs at 40 cents a dozen—is amazing the grangers of that section. Hatched in March, 1905, she began laying the following September, and this year, after setting four times and rearing three broods of chicks, started laying two months ago.

Their Solution.

"Tompkins and his wife always get along splendidly. They do just as they please." "How fortunate! How do you account for it?" "They don't live together."—Milwaukee Sentinel.

It sometimes happens that the happy look on the face of a bride is due to the fact that she realizes it was her last chance.

A daid man gets his right here on such.

FARM GARDEN

Have you salted the stock this week? The refuse pea vines make good hog food and better manure.

Break the colts to the halter while very young and they will not become halter pullers.

Why is it that so many farmers locate their feed lots in the lowest ground on the farm?

Many families are broken up by the parents regarding the children as mere money-making capital.

Have at least one hive of bees if fruit is a specialty. Bees are valuable assistants in fertilizing the blossoms.

If you keep the cows in the barn at night see that they are well bedded and cleaned in the morning before milking.

Watch open wounds on the stock in hot, showery weather for maggots. A swab and some good dip properly diluted will make 'em crawl.

Tankage is all right for hogs, provided it is fed with corn or other grain. It will not do to feed alone, because it contains too much protein.

It's a big mistake to plow when the ground shows up slick and oozy, as it leaves the moldboard. Too wet, and that means clods and impairs the texture of the soil.

The more men tamper with nature the more they complicate matters often instead of effecting a solution. It has been found out that in spraying fruit trees, birds as well as insects are killed.

Currant bushes should be hoed, which not only cleans out the weeds and grass, but renders the new growth more vigorous. A shovelful of well-rotted manure, worked into the soil, will prove beneficial.

The custom of loading farm wagons so that the heaviest weight is upon the front wheels is all wrong, and adds materially to the draft. The heaviest weight should be carried by the hind wheels. This has been proved by official and careful tests.

In the mountain pastures of Scotland during heavy snowstorms flocks of sheep are frequently buried out of sight. They are discovered by the sagacious collie dogs and the shepherd proceeds to dig a hole through which they can escape.

In selecting cantaloupes do not aim to secure a large size for family use. The best flavored and sweetest varieties are the small kinds, and they are also the earliest. Watermelons, however, should be large, as the larger the melon the less waste, while they are also fully equal in quality to the smaller kind.

The last year's beet production in Kansas aggregated 70,000 tons. This is an increase of 715 per cent over the output of 1905, which was previously the greatest. This is due to the erection at Garden City of one of the largest factories in the world, which contracted for and manufactured virtually the whole of the State crop.

Peach trees will not bear forcing; with stimulating manures, even in sandy soil, as such forcing will cause an overgrowth, and the fruit buds will drop off in the spring when the sap starts and the buds begin to swell. Do not plant on ground rich enough to grow onions, or the trees will make late growth and produce unripe wood that may be winter killed.

An experiment by a professor in dairying at the New York experiment station with a herd of ordinary dairy cows, showed that they had consumed in one year \$28.50 each and produced \$25 of milk. The farmer had lost \$3.50 on each cow in his herd in addition to his labor. A careful weeding out according to the records kept made a difference the next year. Each cow consumed \$28 of feed and produced \$38 of milk.

Muriate of potash is a product of the Stassfurt mines in Germany, and its sale is controlled by a German syndicate. Both acid phosphate and tankage are fine, dry meals, in perfect condition to be used in a fertilizer drill, and mixing them does not alter their condition. Muriate of potash resembles common salt in appearance, except that it is usually somewhat yellowish in color. In its commercial condition it is about half actual potash.

Muskmelons produce their fruit at the axils of the first leaves of the lateral runners and if the leading vines are allowed to run these laterals will not come out until the leaders have grown several feet. The leading vines

should be pinched off at their tips as soon as they have made three or four leaves. And when the bearing vines have made three or four leaves beyond the fruit pinch them off in the same way. In this simple way at least a week may be gained.

Bees Faster Than Pigeons.

It is not generally known that bees are swifter in flight than pigeons—that is, for short distances. Some years ago a pigeon fancier at Hamme, Westphalia, laid a wager that a dozen bees liberated three miles from their hives would reach home in less time than a dozen pigeons. The competitors were given wing at Rybern, a village nearly a league from Hamme, and the first bee reached the hive a quarter of a minute in advance of the first pigeon. The bees were also slightly handicapped, having been rolled in flour before starting for purpose of identification.

Farm Wood Lots.

Throughout a very large portion of the United States nearly every farm has a certain part of its area under wood, either planted, as in regions otherwise treeless, or of natural growth. The value of this wooded portion, besides affording protection from the wind, is chiefly for fuel, fencing and railroad ties, with some building material and the wood needed for special uses about the farm. Without the wood lot the farm very often would be an unprofitable investment, because the farmer could not afford to buy the wood which now costs him very little except the labor of cutting and moving it, but in the majority of cases this part of the farm is far less useful than it might easily be. This is true because the farmer does not study its productive capacity as he does that of his fields and pastures, and hence does not make it yield as fully as he might, with little or no additional labor, if he went about it in the right way.—Gifford Pinchot.

Composition of Wheat Bran.

In a Massachusetts State report notes are given on the composition, digestibility and fertilizing ingredients of wheat bran, as compared with other concentrated feeding stuffs, and two feeding experiments with cows are reported in a Massachusetts State report by J. B. Lindsey.

The roughage in the two rations compared consisted of hay and silage, and the grain feed of cotton-seed meal and flour middlings. To this was added either bran or silage with corn meal or corn-and-cob meal. In one of the experiments the results were slightly in favor of the bran ration, while in the other the so-called silage ration gave the best results.

The author concludes that for small herds the quantity of purchased grain may be reduced to three or four pounds in place of wheat bran. It is suggested that the grain mixture may consist of one and one-half pounds of cotton-seed meal, two pounds of flour middling and two and one-half to three pounds corn meal or corn-and-cob meal. Malt sprouts may be substituted for the wheat, oats or rye middlings.

Where the feeding cannot be closely supervised and where it is desired to feed more than five to seven pounds of grain daily, it is considered advisable that the grain mixtures should consist of one-third to one-half of wheat bran.

Feeding Ground Grain.

The Wisconsin Experiment Station made an exhaustive test of feeding grain whole and ground. The following are the conclusions reached during the test:

| When Corn Is Worth | There Is Saved by Grinding |
|--------------------|----------------------------|
| 25 cents pr bushel | 1.5 cents pr bushel |
| 30 cents pr bushel | 1.8 cents pr bushel |
| 35 cents pr bushel | 2.1 cents pr bushel |
| 40 cents pr bushel | 2.4 cents pr bushel |
| 45 cents pr bushel | 2.7 cents pr bushel |
| 50 cents pr bushel | 3.0 cents pr bushel |
| 55 cents pr bushel | 3.3 cents pr bushel |

The above table based upon ten years' experimenting shows that when corn is worth 20 cents per bushel grinding effects a saving of 15 cents per bushel; that when it is worth 30 cents per bushel grinding effects a saving of 1.8 cent per bushel and so on. In order to determine whether it will be profitable to grind or not to grind all our readers have to do is to ascertain whether a bushel of corn can be ground for the price mentioned in the second column showing the amount saved by grinding. If, for instance, a bushel of corn can be ground for 1.5 cent, and corn is worth 35 cents per bushel, a saving of .5 cent per bushel will be effected by grinding, while if corn is worth 40 cents per bushel a saving of 1.9 cent per bushel will be effected by grinding.

There are other conditions that may enter into the question of grinding. Cows will eat more ground corn than shelled corn and consequently can be finished for the market in shorter time when ground corn is fed than when whole grain is used.

There are times when it is very desirable to get hogs ready for the market as soon as possible on account of danger from disease, or because of desiring to get them out of the way at a certain time. Due consideration should also be given to factors of that kind in determining the question of grinding.

TUMORS CONQUERED

Overwhelming Proof that Lydia E. Pinkham's Vegetable Compound Succeeds.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, Tumor.

The growth of a tumor is so insidious that frequently its presence is wholly unsuspected until it is well advanced.

So called "wandering pains" may come from its early stages or the presence of danger may be made manifest by excessive monthly periods accompanied by unusual pain, from the abdomen through the groin and thigh.

If you have mysterious pains, if there are indications of inflammation or displacements, secure a bottle of Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, right away and begin its use.

The following letters should convince every suffering woman of its virtue, and that it actually does conquer tumors.

Mrs. May Fry, of 836 W. Colfax Ave., South Bend, Ind., writes:

Dear Mrs. Pinkham:— "I take great pleasure in writing to thank you for what Lydia E. Pinkham's Vegetable Compound has done for me. I also took the Blood Purifier in alternate doses with the Compound. Your medicine removed a cyst tumor of four years' growth, which three of the best physicians declared I had. They had said that only an operation could help me. I am very thankful that I followed a friend's advice and took your medicine. It has made me a strong and well woman and I shall recommend it as long as I live."

Mrs. E. F. Hayes, of 26 Ruggles St., Boston, Mass., writes:

Dear Mrs. Pinkham:— "I have been under different doctors' treatment for a long time without relief. They told me I had a fibroid tumor, my abdomen was swollen and I suffered with great pain. I wrote to you for advice, you replied and I followed your directions carefully and today I am a well woman. Lydia E. Pinkham's Vegetable Compound expelled the tumor and strengthened my whole system."

Mrs. Perry Byers, of Mt. Pleasant, Iowa, writes:

Dear Mrs. Pinkham:— "I was told by my physician that I had a fibroid tumor and that I would have to be operated as usual. I wrote to you for advice, which I followed carefully and took Lydia E. Pinkham's Vegetable Compound. I am not only cured of the tumor but other female troubles and can do all my own work after eight years of suffering."

Dear Mrs. Pinkham:— "I was told by my physician that I had a fibroid tumor and that I would have to be operated as usual. I wrote to you for advice, which I followed carefully and took Lydia E. Pinkham's Vegetable Compound. I am not only cured of the tumor but other female troubles and can do all my own work after eight years of suffering."

Mrs. S. J. Barber, of Scott, N. Y., writes:

Dear Mrs. Pinkham:— "Sometime ago I wrote you for advice about a tumor which the doctors thought would have to be removed. Instead I took Lydia E. Pinkham's Vegetable Compound and to-day am a well woman."

Mrs. M. M. Funk, Vandergrift, Pa., writes:

Dear Mrs. Pinkham:— "I had a tumor and Lydia E. Pinkham's Vegetable Compound removed it for me after two doctors had given me up. I was sick four years before I began to take the Compound. I now recommend Lydia E. Pinkham's Vegetable Compound far and near."

Such testimony as above is convincing evidence that Lydia E. Pinkham's Vegetable Compound stands without a peer as a remedy for Tumor Growths as well as other distressing ills of women, and such symptoms as Bearing-down Sensations, Displacements, Irregularities and Backache, etc. Women should remember that it is Lydia E. Pinkham's Vegetable Compound that is curing so many women. Don't forget to insist upon it when some druggist asks you to accept something else which he calls "just as good."

Mrs. Pinkham's Invitation to Women.

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn, Mass., for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law, Lydia E. Pinkham, in advising. Thus she is especially well qualified to guide sick women back to health.

W. L. DOUGLAS \$3.00 & \$3.50 SHOES BEST IN THE WORLD. \$25,000 Reward. THE REASON W. L. Douglas shoes are worn by more people in all walks of life than any other make, is because of their excellent style, easy-fitting, and superior wearing qualities.

Marshall Wilder tells of an elderly lady in Cohoes, who, besides her deafness, experienced much trouble with false teeth. Consequently she was disposed to regard this world as a vale of tears. A neighbor, passing her house one day, beheld the lady sitting at the window, wearing an expression of more than usual gloom. Thinking to cheer the unfortunate one, the good-hearted neighbor screamed at the top of her voice: "Good morning, Mrs. Blank. Fine weather we're having." "Yes," replied the elderly lady, "but I can't eat with 'em yit."

Made Discovery whereby can grow full head hair on any bald head. Stop falling hair for good. Eradicate any dandruff or scalp trouble. Reproduce the color in the follicle of grey or faded hair. Will send you 2 months' treatment of this \$10 remedy if you send me a \$2 money order. I simply do this to advertise and show you. Want partner with \$1,000 cash to open office in Minneapolis. The only man, G. W. SCHONERT, Sioux City, Iowa.

CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of J. C. Fitch. In Use For Over Thirty Years CASTORIA. 900 DROPS. ALCOHOL 3 PER CENT.
