and Neck Covered with In-Samed Skin-Doctors No Avail-Cured by Cuticura Remedies.

"My baby's face and neck were covered with itching skin similar to eczema, and she suffered terribly for over a year. I took her to a number of docters, and also to different colleges, to no avail. Then Cuticura Remedies were recommended to me by Miss G-. I did not use it at first, as I had tried so many other remedies without any favorable results. At last I tried Cuticura Soap, Cutleura Ointment and Cuticura Resolvent Pills, and to my surprise noticed an improvement. After using three boxes of the Cuticura Ointment, together with Cuticura Soap and Pills, I am pleased to say she is altogether a different child and the picture of health. Mrs. A. C. Brestlin, 171 N. Lincoln St., Chicago, Ill., Oct. 20 and 30, 1906."

Classed as an Antique Also.

A charming hostess of one of the "big houses," as they are called by those who are welcomed into them, has the added beauty of prematurely white hair, says the Washington Star. That which seems to her contemporaries an added charm may appear to the crudely young a mark of decline, at least so it appears in one instance of which the hostess herself tells with enjoyment.

The lady is a connoisseur of antiques. At one of her teas a debutante rich with the glow of youth, but sadly constrained with her sense of her own novelty, was handed a cup of tea. The cup was beautifully blue and wonderfully old. The hostess, desiring to lighten the strain of her youthful guest by a pleasing diverting remark, said, "That little cup is 150 years old."

"Oh," came the debutante's high, strained tones, "how careful you must be to have kept it so long."

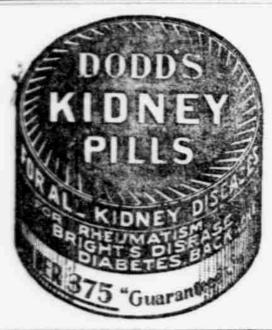

## Beware of Ointments for Catarri that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do derive from them. Hall's Catarrh Cure, manufactured by F. J. Chener & Co., To ledo, O., contains no mercury, and is taken internally, acting directly upon the blood and n ucous surfaces of the system. In buy ing Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Test)monials free

Sold by Druggists. Price, 75c per bottle. Take Hall's Family Pills for constipation

## In a Mexican Hat Store.

Haif a million straw hats is no uncommon sight to be met with at one time in the hat stores of Mexico. The hats are made of a long pampas grass which grows nowhere else in the world. It is specially cultivated for the hat industry. So rapidly are the hats made that some skilled workmen can turn out ten or a dozen a day, and they are then sent to all parts of the world. They cost about fourpence each to make, are retailed at from 1 shilling sixpence to 4 shillings and are so durable that it not infrequently happensy 1860-Major Robert Anderson of Kenthat those of an economical turn of mind make a single hat last ten years -London Queen.

lew and Liberal Homestead Regulations

Western Canada **NEW DISTRICTS** 

## Now Open for Settlement

Some of the choicest lands in the grain growing beins of Saskatchewan and Alberta have recently been spened for settlement under the Revised Homestead Regulations of Canada. Thousands of homesteads of 160 acres each are now available. The new regulations make it possible for entry to be made by proxy. the opportunity that many in the United States have been waiting for. Any member of a family may make entry for any other member of the family who may be entitled to make entry for himself or herself. Entry may now be made before the Agent or Sub-Agent of the District by proxy (on certain conditions), by the father, mother, son, daughter, brother or sisof an Intending homesteader.

"Any even numbered section of Dominion Lands in Manitoba or the North-West Provinces, excepting 8 and 26, not reserved, may be homesteaded by any person the sole head of a family. or male over 18 years of age, to the extent of one quarter section, of 160 acres, more or less."

metie raising principal industries. For further particulars as to Rates, Routes, Best Time to Go and Where to Locate, apply to W. D. Scott, Superintendent of Immigration, Ottawa, Canada, or E. T. Holmes, 315 Jackson St. St. Paul, Minn, and J. M. MacLachlan, Box 816. Watertown, So. Dakota Authorized Govern-

ment Agents. Please any where you saw this advertisement.

New Volcanie Isle Changes. Renders will recall the discovery last

aly of a new and steaming hot volcanic Island to the vicinity of Unalaska by the venue cutter McCulloch, in command of Lieut, B. H. Camden, Lieut, Camden now reports of his second visit to the cene, three months later. The cloud of eam had vanished and one of the two caks, named McCulloch, 395 feet high, and entirely disappeared, leaving the half of the other peak, known as Perry, "with its perpendicular wall standing in grim silence as a headstone at the grave of the departed peak." The rugged outlines of the island had been softened by a padding of lava dust, while the sand spit which connected the two parts of the island had attained the height of from 20 schools and markets convenient. Healthy climate, island had attained the height of from 20 to 100 feet. At intervals while they looked on, masses of lava dust jarred from crevices high up crashed downward to the beach.

Vaudeville Deal Denied.

A. L. Erlanger, head of the theatrical trust, has denied most emphatically the report that his vaudeville campaign had been abandoned and a deal made with the Keith people, although he admitted that the latter had tried to buy him out.

New York Skyscraper Limit.

Drastic regulations adopted unanimousby the Building Code Revision Commission of New York City to be in effect after Jan, I provide that no new building shall be over 250 feet in height. This is expected to end the mad race of builders or garlic is a noticeable instance. for the prize of "the highest building," if the regulations are approved by the Board | periment Station gives some interesting | keeping it at a temperature of between of Aldermen. Already more than twenty buildings in New York have exceeded this limit. This action is in response to the warning recently sounded by the fire un-

Spinach for Market.

Early sown spinach should be ready to cut in October. Watch the market and rush it in. A heavy freeze will ruin the growth already made.

The Collard.

The southern collard is the surest and safest vegetable product known to the gardener, and there is a market for collards in every town containing business men who were country boys .-Texas Farn and Ranch.

Tickle Grass.

The stand of wild barley, or tickle grass, as it is sometimes called, is fully up to if not better than the stand last season, says a farmer in Iowa Homestead. The acreage has increased, and no doubt there will be many tickled people when the crop is harvested.

Women and Dairy Work.

The lady manager of a dairy makes a point of getting her milk only from farms that are under medical supervision, and carried on exactly as they would be were they directly supervised by her. Then the vital part of preparing the milk for delivery to the pub-He she is able to give her undivided attention. And one can be quite sure that instead of the pernicious system of adding drugs to it to make it keep in hot weather, she will use the infinitely more hygienic, if more troublesome, method of pasteurizing it.-Woman's Life.

## Two Fine Strawberries.

Oue of the best of the newer strawberries is the Senator Dunlap, says an Ohio man in American Cultivator. It is a very early kind and keeps in bearing long enough to be classed also as a midseason variety. It is as reliable and productive as the Haverland and has a good color and pleasant navor. The Dunlap and a good late kind like the Granville make a fine team for the strawberry grower. An important practical point is to put on straw enough for mulch and winter protectien to last until the bearing season and keep the berries clean.

Success of Kharkof.

About four years ago the Department of Agriculture began a systematic distribution of the Kharkof wheat, and extensive trials of this variety in cooperation with the State experiment stations. It is the hardiest winter wheat yet grown in this country and is now thoroughly established.

By its use the area in which winter wheat can be successfully cultivated has been much extended to the northward and westward, particularly in Nebraska and Iowa, while a considerable amount is now grown in South Dakota and Southern Minnesota. It will be conservative to state that, wherever this wheat has been introduced, the vield per acre is being increased on an average of five bushels.

Horse and Dog Ment.

In 1906 there were slaughtered for food in the Kingdom of Saxony 12.922 horses and 3,736 dogs. This was an increase of 224 horses and 133 dogs over the year 1905.

In the whole empire in 1906, according to the Southern Farm Magazine, there were slaughtered for food 182,-000 horses, and it is estimated that about 7,000 dogs go into food in the empire annually,

"Horseflesh is very generally adver- a low price. tised in the German newspapers, especially in those of the large industrial centers," says United States Consul Ifft, "and most German cities have at least one market which makes it a specialty, claiming for it a higher percentage of nourishment than that of either beef, veal, mutton or pork.

"Neither is it unusua! to find advertisements of dog meat or for the purchase of dogs for slaughter. Nor is it possible to read the German newspapers for any length of time without coming to the conclusion that a great many dogs are killed and eaten that do not give up their lives under official inspection.

"News items detailing the arrest, are not infrequent."

Bitter Milk.

causes, as it is well known that certain weeds eaten by cows impart a characteristic flavor to the milk. Wild onion

by bacteria. Numerous cheese facto- flavor ruinous to butter quality .ries in Ontario were annoyed by the George E. Newell.

development of a bitter flavor in milk and curd. From a sample of such curd a veast-like micro-organism designated Torula amara, or bitter torula, was isolated. This yeast, when separated from all other micro-organisms and added to milk which had been rendered sterile by heat, produced the characteristic bitter flavor. Cultures of the toruia were added to milk, and the cheese and butter manufactured from it also possessed the bitter taste.

In preventing such troubles as bitter milk, proper care of the milk is sils should be thoroughly washed and sterilized by heat, the milking should be done under the most favorable conditions for lessening contamination, the milk should be cooled promptly, and guarded as carefully as possible from all known sources of infection. A Farmers' bulletin of the Department of Agriculture contains suggestions for the care and handling of milk which, if followed, may be expected to lessen the growth of undesirable forms of micro-organisms in milk. This bulletin may be had free on application to the department at Washington.

The Art of Plowing.

There is an art in plowing. In other words, there is a way to do the work and get the best results, and there is a way that will be guite the opposite.

On the ground that does not need furrows for drainage, plow from the center, and to the center alternately, and in this way keep the field free from furrows and ridges, especially at

S. B. Hartman, an experienced farmer, says he has seen fields having the soil so plowed away along the lines running from center of field to outside corners by continually throwing furrows toward the outside of the field, that crops would hardly grow on a strip 8 or 10 feet wide, while much good soil was piled in a ridge along the fences where little use could be made of !t except to grow briars and weeds. Starting the field in the center a few times will correct this. Some attempt to correct the ridges along the fences by plowing lands along each side. This throws the furrow from the fence, but creates a ridge along the back furrow and does not fill the low places at the

By doing a little measuring before starting to plow, and occasionally while the plowing is in progress to see that all sides and corners are kept equal distances from the fence, almost any shape of lot can be plowed from the center. The furrows left from the last plowing will also help in plowing from the center.

It is better to plow rather shallow in case the soil is dry, in the spring, than to plow deeper, say 7 or 8 inches. But it is best not to turn up too much subsoil excepting where it is intended to fertilize heavily, or where it is intended to get the surface soil deeper than that already on the field.

Plowing is not so simple an operation as it would appear, and it is surprising how few farmers are really good plowmen.

Winter-Made Butter.

You cannot produce first-class winter butter unless you churn often. To churn every other day is better than once in three days, while to put it off to every fourth day is execrable practice. And yet a vast amount of butter manufactured on the latter plan is marketed every winter, much to the disgust of the dairy trade.

It is found primarily in country stores, where it has been exchanged by small dairymen at a second-rate price for groceries.

The tradesmen ship it in lots to the ity market, where all the way through, whether it ends in the larder of a baker or on the table of the poor workingman, it is classed as inferior and sells for

And yet the original material from which this butter was made was as good as that which is employed in turning out the 25 and 30-cent article.

The inferiority of quality and consequent loss to dairymen follows, because they ignore the right principles of butter making. Suppose that a farmer, after raising a fine crop of potatoes and digging them, should allow the tubers to lie a day or two in the sun before storing them in the root cellars. Could he expect to sell the green, bitter vegetables for full market quotations? Certainly not, and even the most obtuse are thoroughly well aware of this

And yet, those who use common sense trial, conviction and punishment by in this respect, with inconceivable folly fine or imprisonment of men charged will spoil good cream and butter by with killing and eating dogs that be- wanton neglect, as outlined above. It longed to others, sometimes valuable is pretty costly neglect, too, as it foranimals or cherished household pets, felts from 8 to 10 cents on every pound of inferior butter.

This could all be obviated by churning cream when it is fresh and pure, Abnormal flavors in milk and milk i. e, slightly matured, but not bitter, products may be due to a number of and manufacturing it into butter according to modern principles.

Cream should all be secured from the milk in at least twenty-four hours, and churned within the next twenty-A recent bulletin of the Ontario Ex- four. This can be done usually by observations on bitter milk. In this 60 and 70 degrees. It is where cream case, however, the bitter flavor was is kept at near 40 degrees, and for sevcaused by a form of yeast rather than eral days, that it develops that bitter

Familiarity in Dusiness.

"Familiarity, in business or out, breeds contempt between men and women," says Anna Steese Richardson in a remarkable article on "The Influence of Women on Business," in the Woman's Home Companion. "It is all very well to say that the modern girl is happies in the end for losing some of her iliusions regarding men. Perhaps. But i she gains along this line she loses by having no more illusions about womanhood, wifehood and motherhood. Only the woman who can hold these sacred for herself and the man she loves en riches the home life in America and leaves to her country the heritage of well-balanced sons and daughters.

"The woman embittered by the con ten pt which follows familiarity with me in business sees in matrimony only relief from irksome toil. For her, marriage does not represent the fulfillment of her highest destiny, the most essential. Milk cans and all other uten- | wonderful opportunities of womanhood. She is not reaching out for the crown-Ing happiness of her life. She is grimly trying to choose the lesser of two
