How she Prepared.

A French gentleman anxious to find a wife for a nephew went to a matrimonial agent, who handed him his list of lady clients. Running through this he came to his wife's name, entered as desirous of obtaining a husband between the ages of 28 and 35-a blonde preferred.

Forgetting his nephew, he hurried home to announce the discovery to his wife. The lady was not at all disturbed. "Oh, yes," she said, "that is my mame. I put it down when you were so ill in the winter and the doctors sold we must prepare for the

Brazilian raniromis in operation at the beginning of last year had a total length of 10,775 miles. In addition there were 1,902 miles under construction and 4,177 miles being surveyed or already approved. making the total mileage about 16,855

Excursion to Milwaukee.

Reduced rates of fare and one-half for the round trip are offered to merchants in the West and Northwest by the Milwaukee Association of Jobbers and Manufacturers. The dates of sale at all stations distant 100 miles or more from Milwaukee are August 29th to September 6th inclusive, tickets good returning until September 16. To obtain these rates merchants must get from their local agent receipt for one full paid fare to Milwaukee which, when countersigned by any Milwaukee jobber or manufacturer and by the secretary of the Milwaukee Association of Job bers and Manufacturers will entitle holder to return ticket for one-half fare. Bring your family with you. Office of the Miiwaukee Association of Jobbers and Manufacturers, 45-49 University Building, corner Mason and Broadway.

A Rabbit and a Whistle.

Did you know that a short, sharp whistle from the mouth would stop a rabbit? It surely does. Next time you see little Molly Cottontail leap from her burrow and make off don't shoot; just whistle. Whether from fear or curiosity I cannot tell, but she will stop still in her tracks. An antelope has been known to do likewise. An African hunter once said that the elephant is the most timid of all animals and can be frightened into a cold sweat by a mysterious noise.—New York Press.

A Delicious Custard.

The recipe for this delicate dessert has been handed down in my family for many generations: Into each individual custard cup put the yolk of one egg, add one heaping teaspoonful of sugar, two gratings of nutmeg and five tablespoonfuls of sweet milk. Incorporate thoroughly and set the cups in a pan of hot water. Bake in a moderate oven until firm. When cool, cover with a meringue, using the whites of the eggs for this purpose, and allow one tablespoonful of powdered sugar to the white of each egg. Through the very tiptop of each snowy mound drop a teaspoonful of orange marmalade.-De-

The

General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial in effect, acceptable to the system and gentle, yet prompt, in action.

In supplying that demand with its ex-Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine-manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

Sheep as Beasts of Burden.

In the northern part of India sheep are put to a use unthought of in European or American countries. They are made to serve as beasts of burden, belar times if you would obtain the best cause they are more sure-footed than larger beasts, and the mountain paths along the foothills of the Himalayas are steep and difficult. The load for each sheep is from 16 to 20 pounds. The sheep are driven from village to viilage, with the wool still growing, and in each town the farmer shears as much wool as he can sell there and loads the shoop with the grain which he receives in exchange. After his flock has been sheared he turns it homeward, each The furnishing of fancy farm-made sheep having on its back a small bag containing the purchased grain.

Wasted Products.

At this time a tourist through Texas Starved land cannot grow good sees one peach orchard after another crops. Provide the elements which the overloaded with fruit. It is not possiand by an enthusiastic, non-partisan crop needs and harvest day will be a ble to either consume it or to sell it all fresh. In places the ground is alg ready covered with peaches. Now, the committee appointed at the Chicago Alfalfa takes a transendous amount only means of saving such precious surplus is to either dry the fruit or preserve it. The people of the South, largely because of the great abunhance of it, have always suffered serious waste at this point. It is the same of the potato crop, peanut crop and other crops. Everything of value should be saved in some way. It should be preserved for future use or for a future demand of the market that may be overcrowded during the rush of the different products to the consumers. It should be the desire and the constant study of every Texan to save the waste here or there .- Dal-

Beware of the Big Egg.

It is common every now and then to read an account in some newspaper of one of the subscribers bringing in an extraordinary large egg into the office of the editor, and the aforesaid editor at once heralds the news as though it If you are raising ducks without a was of great public importance. Such eggs are important to the poultryman, inasmuch as they are danger signals. the hen that laid them. No strong, healthy hen will lay either a double-The feeding of dairy eattle affords yolked egg, a round egg, a badly statement of principles and to all that the dairyman an opportunity to save all shaped egg or a soft-shelled egg. Someof the manure made by feeding out his thing is wrong with the hen that lays anything different than a regular shaped egg. Instead of rejoicing at these extra large eggs, there should be cause of regret. At once the matter should be investigated and the gent eral condition of the flock should be looked into. If it is found that they all or the majority of them, are heavy, it is well to cut down the quantity of the carbonaceous or starchy foods and increase the nitrogen material.

> Orange Culture in the North. Botanists in the employ of the United States Department of Agriculture hope

to bring into being an orange tree which will be as sturdy as the apple tree; an orange tree that will not perish in the chill of northern winter, which in December will bear its wreath of snow and in May its garlands of bloom, and when summer comes will yield fruit as good as that sweetened in the south

This may seem to be an unnatural preposition, says the Technical World, but it only seems so. No violence upon Artichokes are in some little demand the laws of nature has been or will be bears the bitter, unedible orange. By crossing a citrus tree which grows in the north and which bears an unedible fruit with the citrus tree of the south it is sought to beget a plant in which will be combined the good traits of each.

List of Microbes Grows. The list of microbes continues to

grow steadily. That of whooping cough must now be added to the list Dr. H. Albrecht of the Wilhelm Hospital the other night spoke on the subject before the Vicana Modical Society, declaring that he had discovered the specific agent that caused the complaint. There had for some time been a suspicion that a kind of bacillus was at the bottem, but Dr. Albrecht felt himself able to assert that the whooping cough backlus was identical with that of influenza. The doctor was able also to give a number of interesting details of his experiments and their resuits, which seem to be on parallel lines with work done by Drs. Bordet and Gengon of the Brussels Pasteur Institute.

THE DARY

it's going to."

A Matter of Profitable Interest to the Farmer and Dairyman.

The problem of keeping sweet all the utensils used in connection with mills and cream selling, and butter making, has been a serious one with the farmer

He has come to realize fully that the slightest taint or hint of staleness left in a can, tin or churn may ruin a whole output; that the taint which is left is in the form of bacteria which grow and multiply in milk or butter, producing disastrous results.

The farmer has learned that ho water won't rinse away the greasy residue in dairy utensils,

He has learned that soap leaves a residue of its own which is, if anything, worse than the milk or cream residue, and it is little wonder that there has been a constant clamor for : dairy cleanser and sweetener that wil meet modern requirements.

A few of the largest creamery estal lishments have called experts into consultation on this problem and have with this scientific aid hit upon a product of nature which exactly fills the bill-borax.

Scientists have long known borax as a cleanser, a sweetener and an antiseptic destroyer of bacteria and germ growths. Destroys all that is harmful and promotes and preserves freshness sweetness and purity, relieving the dairyman and dairy housewife of drudgery and of needless work and

Its cheapness and value should give it first place in the necessities of every
