Last week Father Blaere called us up to his place to show what fine apples could be raised in Cherry county. There were about 200 apples on a small tree that could not have held many more without breaking the limbs to the ground. The name of the variety was "Wealthy" and the apples were large, round, red, juicy and sweet. One of the best eating apples we have eaten and they will do well here in this climate. We used to hear people say that apples could not be grown here. They said the same thing about Riley county, Kansas years ago that apples wouldn't do well in so dry a climate where there were hot winds in summer and extreme cold in winter but it has been demonstrated that apples and other kinds of fruit thrive here. John Ferstel raised good fruit; John Borman raises good fruit; C. M. VanMeter on north table has fine fruit every year. Cherry county will raise as good apples as you find in the state.
