# **MY OWN FAMILY USE** PE-RU-NA.

#### HON. GEORGE W. HONEY.

Hon. George W. Honey, National Chaplain U. V. U., ex-Chaplain Fourth Wisconsin Cavalry, ex-Treasurer State of Wisconsin, and ex-Quartermaster thus have sore shoulders on your work General State of Texas G. A. R., writes from 1700 First St., N. E., Washington, D. C., as follows:

"I cannot too highly recommend your preparation for the relief of catarrhal troubles in their various forms. Some members of my own family have used it with most gratifying results. When other remedies failed. Peruna proved most efficacious and I cheerfully certity to its curative excellence.

Mr. Fred L. Hebard, for nine years a leading photographer of Kansas City. Mo., located at the northeast corner of 12th and Grand Aves, cheerfully gives the following testimony: "It is a proven fact that Peruna will cure catarrh and la grippe, and as a tonic it has no equal. Druggists have tried to make me take something else 'just as good,' but Peruna is good enough for me.

## Pe-ru-na in Tablet Form.

For two years Dr. Hartman and his assistants have incessantly labored to create Peruna in tablet form, and their strenuous labors have just been prowned with success. People who object to liquid medicines can now secure Peru- when the hogs will thrive upon the na tablets, which represent the solid medicinal ingredients of Peruna.

have at seast twelve well developed teats, thus providing proper room and nourishment for large litters of pigs .--Agricultural Epitomist.

## Breaking a Cow to Milk.

If you are going to break a young cow, the first thing you have to do is Never keep a bear pig that is not to keep cool. Many kicking coays are made bad by bad breaking and bad tem-A bog raiser who has a running per. It is a good idea to tie the new cow up the first few days and give her stream and a bluegrass pasture is inthe very best treatment, so she has won your confidence. Before you are going The feeder who fails to study the to milk be sure to have your finger nails effects of roughness is not likely to trimmed as close as possible. Do not

rush milking at once, but start gently. When you are through milking pet her and give her something to cat during the time of milking. I have done milk-

ing for fourteen years at home, on the farm of my parents, and know whereof speak .- Paul Kautz in Agricultural Epitomist

#### British Rival of Burbank.

Some of the achievements of that re-Good feeding is something more than markable horticulturist, Mr. Luther shoveling unhusked corn on the ground Burbank, in Southern California, seem and allowing animals to dig it out of to have been rivaled is England by a Lancashire farmer. It is said that on Alfalfa or clover pasture is the best Garton's seed grown near Warrington for the hog. A good substitute for a single oat plant surpasses by several either of these is rape, field peas or hundred cereals any plant ever grown in the world. It is the product of twenby-seven years' practice of a process Never let the dead wood remain on called "accelerated evolution," and has the frait trees. It not only provides been obtained by crossing a highly dehiding places for insect pests, but it veloped oat with certain varieties of opens the way for extending the dewild oats which have an incalculable capacity for generating seeds.

By these means the Lancashire farm-Rye sown in corn ground in Septemer obtains a yield of 169 bushels an ber makes fine pasture for late fall. If acre, something over twice what is conclover is sown the next spring it will sidered a good yield in other parts of make good pasture until the rye is ripe, the country. So practical has the process been found that in thirty years the vield of some crops has been completely Forty-five thousand dollars is a tidy doubled, and it may reasonably be excommission on a land deal-a sum pected that a similar increase will take which is said to have been paid on the

place within the next thirty years. Pruning Shrubs.

Many people think all shroubs should be pruned annually. This is quite a mistake. Most varieties should be

## PRESCRIBED CUTICURA

After Other Treatment Failed-Raw Eczema on Baby's Face Had Lasted Three Months-At Last **Doctor Found Cure.** "Our baby boy broke out with ec-

zema on his face when one month old. One place on the side of his face the size of a nickel was raw like beefsteak for three months, and he would cry out when I bathed the parts that were sore and broken out. I gave him three months' treatment from a good doctor, but at the end of that time the child was no better. Then my doctor recommended Cuticura. After using a cake of Cuticura Soap, a third of a box of Cuticura Ointment, and half a bottle of Cuticura Resolvent he was then put on the silk again. In Enwell and his face was as smooth as any baby's. He is now two years and a half old and no eczema has reappeared Mrs. M. L. Harris, Alton, Kan., May 14 and June 12, 1907."

## The Wettest Trade.

The lot of the Ceylon pearl diver is not an easy one. Stones are suspended a convenient position as to allow the diver to place one foot within a loop affixed to the stone. The diver, having placed himself with one foot on the stone, with a net around his neck to hold oysters, draws in his breath, closes the nosirils with one hand and raises his body to give force to the descent. The manduck (or diver's at tendant), in charge of the sloue and nets, lets go, and the diver rapidly reaches the bottom, leaves the stone. which the manduck instantly hauls up ture? and refixes, throws himself on the ground, creeping along, and fills his net with oysters. This done, he jettle the rope, which is pulled up by the manduck in charge, and the content.

of the net are discharged into the boat The diver meanwhile rises to the suface.-Ceylon Manuel. Met His Match.

Wigg-The last I saw of you, Youngpop was talkin you to death about his paby. How did you get rid of him? Wagg-Oh, some fellow came along whe had just bought an automobile, so 1 introduced them and made my escape,-Philadelphia Record.

"Guaral

## Hats that Improve with Age. "A silk hat, like wine, improves with

age," said a clubman. "The oftener you have it irough the slecker and more brilliant it becomes. It costs a good deal at the outset, but in the end it is the cheapest hat to wear. It lasts, you see, so long, and to iron it costs so little. Some folks think the topper very perishable. If it gets soaked with rain, if some one sits on it and crushes it into an accordion, they think it must be thrown away the same as if it were a derby. But not at all, A silk hat can be taken apart and put together again like a watch, and if it gets crushed nothing is easier than to melt off the silk, straighten out the frame and gland, the home of this hat. I have known men to wear the same topper for ten or twelve years. And the oftener the old hat is ironed the brighter and finer it shines. Its luster increases with time and friction like the luster of good antique furniture."-Los Angeles Times.

Daniel Freeman, of Brownville, Neb., filed on the first free homestead provided by the government on January buds will be cut off. 1st. 1863. He is still in possession of this old patent, which is numbered 1, and lives on his homestcad.

It is essential that we attend to the comfort and bodily case of our cows. It would be well if some of us would ask ourselves how certain lines of treatment would suit us. All animals, man included, have much in common.

The fenced farm is the only one of which live stock can be kept and the rotation of crops followed, and as this method of farming is the only profitable one in the long run, it follows that the farm must be fenced to be handled properly.

a bunch of artichokes planted in each of snowball,

of his poultry yards. These make a dense shade during the summer, and spring up vigorously year after year. They require no cultivation and frost does not injure them,

There is an objection to alsike by some farmers, it is claimed, for the reason that its foliage has a slightly bitter taste, and stock do not take to it as readily as they do to red clover, but they will learn to eat it in a short time if they are allowed no other grass.

While attempting to relieve a cow which had swallowed a turnip, a Minnesota farmer pushed a broom handle down her throat and broke off twenty inches of it. Recently the stick was taken out of the cow's back just behind the right shoulder and she is getting well.

In 1840 the first ship load of Peruvian guano was sent to England to be applied as a land fertilizer. This was used for its ammonia. The Southern rock phosphate mines were opened in 1867, the Florida and Tennessee phosphate mines later. The trade in nitrate

forms the more attractive are the

Remember especially that the early flowering shrubs, such as weigela, deutzia, wistaria, snowball, forsythia, flowering almond, lilae, which bloom on the wood, of the season before, should never be pruned in the spring. The best time

to do this is after flowering before the growth is started, otherwise the flower

Avoid heavy cutting back at any time. A little each yea will suffice as a time. A little each year will suffice as a when pruning and cut so as to give easy flowing vines, trying to keep the

branches well down to the ground. Old and twisted stems and stunted growth should be thinned out, but do not cut away many of the healthy shoots. Branches either large or small should be cut back quite close to a joint or stem, while twigs should be cut close

to an eye or joint. Pruning is best done with a stout, sharp pocket knife or with mediumsized pruning shears. Do not use hedge shears on the flowering shrubs, as the

regular lines we admire on the privet Dr. O. P. Bennett, of Macon, Ill., has are anything but beautiful on the lilac

> Trim always to keep the bushes so the lower branches are not bare and the heads are masses of bloom. Should the shrubs grow crowded in the bed, remove some of them to other spots in the garden.

> > Disease in Poultry.

Oregon Agricultural and Experiment Station writes as follows: "The success of poultry raising depends largely upon the ability of those engaged in this industry to keep their fowls free from contagious and infectious diseases.

"More failures are due to these diseases than any other cause.

"It has been said that 'Fowls are machines which consume certain kinds of raw material and produce eggs and meat'; but in order to bring about this transformation with any degree of success they should be kept in a good, healthy condition.

"One of the most fatal diseases in fowls, especially in young chickens, is infectious lukamia. The first symptom of this trouble is a rise in the temperature, which is followed by drowsiness and debility, with paleness of the mucous membranes, also of the comb, wattles and skin about the head; the fever continuous generally resulting in
