

No Object.
"How," wrote the editor, "do you distinguish the mushroom from the poisonous toadstool?"
"Here," wrote the farmer, "is the editor of the agricultural paper. In response, 'we have an interesting example of the useless questions that come to this office every day of the week. Our answer to this query is that we don't. All we ever do along that line is to distinguish the poisonous toadstool from the mushroom.'"

Syrup of Figs

and
Elixir of Senna

Cleanses the System
Effectually:
Dispels colds and headaches
due to Constipation;
Acts naturally, acts truly as
a Laxative.
Best for Men, Women and Children—
Young and Old.

320
ACRES

of Wheat Land
in Western Canada
WILL MAKE YOU RICH

50 bushels per acre have been grown. General average greater than in any other part of the continent. Under New Regulations it is possible to secure a Homestead of 160 acres free, and additional 160 acres at \$3.00 per acre.

"The development of the country has made marvelous strides. It is a revelation, a record of conquest by settlement, that is remarkable." Extract from correspondence of a National Editor, who visited Canada in August last.

The grain crop of 1908 will be a many farmers' \$20.00 to \$25.00 per acre. Grain-raising, Mixed Farming and Dairying are the principal industries. Climate excellent, Social Conditions the best; Railway Advantages unequalled; Schools, Churches and markets close at hand.

Lands may also be purchased from Railway and Land Companies.

FOR "LAST BEST WEST"
pamphlets, maps and information as to how to secure lowest Railway Rates, apply to
W. D. Scott, Superintendent of Immigration, Ottawa, Canada, or E. T. Holmes, 512 Jackson St., St. Paul, Minn., or W. H. Williams, 115 Waterman, So. Dakota. Authorized Government Agents.

SHOES

The Reason I Make and Sell More Men's \$3.00 & \$5.00 Shoes Than Any Other Manufacturer is because I give the wearers the benefit of the most complete organization of trained experts and skilled workmen in the country.

The selection of the leathers for each part of the shoe, and every detail of the making of every shoe, is looked after by the best shoemakers in the shoe industry. It could show you how carefully W. L. Douglas shoes are made, you would think they were made by hand, and you would not understand why they hold their shape, fit better, and wear longer than any other make.

My Method of Tanning the Soles makes them More Flexible and Longer Wearing than any other.

Shoes for Every Member of the Family,
Men, Boys, Women, Misses and Children.
For more by shoe and shoe repair.

CAUTION! Non-removable without W. L. Douglas name and price stamped on bottom. Rest Co. Eyeglasses Sold Exclusively. Catalog mailed free. W. L. DOUGLAS, 107 Spruce St., Brockton, Mass.

Soils, but it is in a form that is not available to the plants. In sandy, loose soils it is deficient. On clay soil the potassium can be made available faster by the use of lime or land plaster. It is many times a question of whether it is cheaper to use lime or plaster or to buy potash salts. On a farm where live stock is fed the loss from these elements will be slow and when the deep-rooted legumes are grown in the rotations they bring up these elements from the subsoil, a large portion of which eventually goes to promote the growth of succeeding crops in the rotation. If large amounts of purchased grain foods are fed on the farm the amount of potash and phosphoric acid in the soil may be greatly increased. Whether the supply of potassium and phosphorus will be sufficiently maintained in the cultivated soils without feeding purchased grain foods will depend to a certain extent upon the kind of soil and subsoil and the extent to which deep-rooted plants are grown. On many farms where these elements are deficient and incomplete fertilizer is used with success or the manure is balanced by the use of mineral fertilizers, which are termed **floats**.—**Agricultural Epitome.**

Poultry for profit demands good quarters and good feed.

Stagnant water drunk by the cows is apt to cause stinky milk.

Feeding too much corn is the cause of many cases of weakness in the hind legs.

Lambs can be fattened without corn. Feed them barley, alfalfa, turnips and field peas.

Colts from a stallion that is kept in a stable, with little or no exercise, are usually inferior.

Corn put into the silo will produce more feed to the acre than most anything else for dairy cows.

Get the cow's good will and she will not hold up the milk. Kindness will accomplish what abuse never can.

It is by trying that men become expert in anything. If you would understand your farming better keep trying.

Sheep will never drink impure water. In putting your flock into winter quarters see that proper care is taken to provide adequate and clean water supply.

Heavy draft mares will grow a grade draft colt every year that will sell readily at from \$75 to \$200 when 3 years old. These same mares when bred to a light horse will breed colts that will bring from \$75 to \$100.

The horny gluten in a grain of corn contains the protein. The amount of protein a corn contains can be determined by cutting the grain in two crosswise with a pocket knife. The white meal substance of the kernel is the starch.

Authorities on forestry say that seventy-five years are required for the oak to reach maturity; and about the same length of time for the ash and elm; and for the spruce and fir about eighty years. After this time their growth remains stationary for some years, and then they begin to decay. There are, however, exceptions, for oaks are still living which are known to be over 1,000 years old.

A small flock of sheep can be kept with but little expense, and, whether wool is high or low, the check their wool brings in the spring is about clear profit, to say nothing of the feasts of roast lamb and mutton chops the table has held during the year. Then the increase sold, whether as dressed meat on the local market or as live sheep to be shipped, will bring in quite a snug sum. It is hard for us to conceive of a farm upon which a small flock of sheep will not pay.

When no water has been added to buttermilk it has been found to have a great feeding value as skim milk. Its composition is practically the same as the skim milk, although it varies somewhat in composition. While it has been used for calf feeding this must be done by skillful feeders. It has its greatest use as a pig feed. In some cases it is worth more for pig feed than the skim milk. Several of the stations have obtained excellent results in feeding it to pigs.

To Increase Dairy Profits. The dairyman is entitled to liberal compensation, as he represents the most strenuous branch of husbandry. The dairyman is confined to his work every day in the year and follows a branch of live stock industry that needs methodical, systematic management. The dairyman is compelled to place business before pleasure or suffer serious losses. Regularity in feeding and milking is one of the great secrets of success in the dairy industry. Any branch of agriculture that involves such strenuous effort as dairy husbandry should receive reasonable profits.

There is no class of farming more under the control of the proprietor than dairymaking. It is a branch of husbandry that calls for the exercise of intelligence and judgment. The merchant and the manufacturer keep a record of their transactions and can tell whether their business is operated at a profit or loss. The milk producer can keep a record of his cows and weed out the unprofitable members and replace them with better performers. To keep a record of the individual production of the different members of the herd will add interest to dairy husbandry and show the proprietor how to increase his profits.

Potash and Phosphoric Acid. While we can get all the nitrogen required in general farming from the air and the stable manure, we can not get all of the phosphorus and potassium, and when they are deficient they must be restored to the soil in some way. The element most generally deficient in most of our old cultivated soils is phosphorus; it is taken from the soil to form the bones of every animal and is used largely by grain crops. Potassium is abundant in most clay

soils, but it is in a form that is not available to the plants. In sandy, loose soils it is deficient. On clay soil the potassium can be made available faster by the use of lime or land plaster. It is many times a question of whether it is cheaper to use lime or plaster or to buy potash salts. On a farm where live stock is fed the loss from these elements will be slow and when the deep-rooted legumes are grown in the rotations they bring up these elements from the subsoil, a large portion of which eventually goes to promote the growth of succeeding crops in the rotation. If large amounts of purchased grain foods are fed on the farm the amount of potash and phosphoric acid in the soil may be greatly increased. Whether the supply of potassium and phosphorus will be sufficiently maintained in the cultivated soils without feeding purchased grain foods will depend to a certain extent upon the kind of soil and subsoil and the extent to which deep-rooted plants are grown. On many farms where these elements are deficient and incomplete fertilizer is used with success or the manure is balanced by the use of mineral fertilizers, which are termed **floats**.—**Agricultural Epitome.**

To Cure Canker in Pigs. Canker sore mouth always appears in young pigs under six weeks old and frequently with fatal results. The symptoms are as follows: Large water blisters appear about the lips and snout, rapidly succeeded by much heat and swelling of the parts, and later thick brown scabs appear, which open into deep cracks. These scabs extend over the face, head and even to the body and limbs, the joints of the latter becoming much swollen and inflamed. Ulcers frequently form about the snout and jaws, eating the flesh from the bones. The pigs show dullness, a disinclination to move, often refuse to suckle, or to do so in a very half-hearted manner.

To be effective the treatment should be prompt and thorough. Prepare a solution of permanganate of potash, which can be had at any drug store, using one ounce of the crystals dissolved in one gallon of water in a common pail. The young pigs should be dipped head foremost into the solution and kept there for a brief time. Repeat this two or three times giving the pig time to catch its breath in the intermission. This treatment given every day for three or four days will usually effect a cure. If the trouble is not of long standing. In extreme cases where ulcers and heavy scabs have formed use two ounces of the permanganate to one gallon of water and before dipping remove all the dead and loose tissues that have been eaten away. The sow's udder should be bathed freely with the solution each day.

Right Way to Use Silage. Silos have been abandoned in many cases because the milk became so badly tainted as to become unsalable. If the creameries and cheese factories were as particular as they should be they would condemn a great deal of the milk that is now accepted from silage-fed herds. This is not the fault of the silage; it is the fault of the man who handles it. Silage has a very penetrative odor, which is taken up very quickly by milk. If silage is fed before milking the milk is quite certain to become tainted. If the milk is allowed to stand a few minutes in the barn after milking and silage is fed while the cans are standing around the milk will be tainted. If the stable is not ventilated or is poorly ventilated the silage odors will linger in the stable and taint the milk. In an unventilated stable the stable itself will in time become saturated or permeated with the silage odor and will taint the milk, no matter how the silage is handled. The corn is frequently cut into the silo too green, which makes very sour silage, with a strong odor. The silage is frequently carelessly handled in the stable; it is scattered through the alleys and allowed to remain on the floors. In such instances the stable will be scented with the silage and the milk will be tainted.

If good results are expected from silage it must be properly handled in the stable. First, silage must be fed only after milking. Second, the floors must be kept clean and no silage allowed to accumulate in the alleys. Third, there should not be more silage fed than the stock will clean up at once. Fourth, the stable must be well ventilated. Fifth, corn should not be cut in too green. Sixth, don't feed moldy silage.

From the foregoing it will be seen that silage must be more carefully handled than ordinary roughage. One cannot throw silage around as he might straw or hay and get satisfactory results. To get best results from silage a little extra care must be exercised all along the line, more care in filling silo, care in taking silage out, care in handling silage in barn, care in ventilating stable and, withal, cleanliness. If one is not willing to give this extra care the silo is best not built, for this is the price of success with silage. Silage properly put up and properly fed is a very cheap and most excellent food; improperly put up and improperly fed it may be an expensive and hazardous experiment.

Football Horror. Coach—I lost that game because my ends were fagged out before they went in to play.

Rooster—I told you a week ago that you hadn't anything but fag ends of players.

PILES CURED IN 6 TO 14 DAYS
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded, 50c.

Correspondingly Costly. "You get twice as much pay as I do," grumbled the elevator boy, "and it ain't fair!"

"There's a difference between us, kid," majestically answered the elevator starter, "you're merely a necessity. I'm a luxury."

WELL-BLINDS AND TRAPS CHEAP
by Furs & Hide. Write for catalog 103 N. W. Hyde & Fur Co., Minneapolis, Minn.

Thought He Understood. "Now, young gentlemen," said the professor of moral philosophy in winding up his little talk to the class, "you understand, do you not, what I mean when I use the term 'ethical and intellectual aristocracy'?"

"Yes, sir," answered the young man with the bad eye; "it means being great and good, in your mind."

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Sympathy. The 300-pound visitor at the live stock show leaned over the edge of the pen in which lay the 600-pound hog, stretched out at full length on the floor and breathing stertorously.

"It's pretty tough on you and me, old chap, isn't it," wheezed the fat visitor, "to be prize beauties?"—Chicago Tribune.

WHY NOT OWN LAND?
One of the Best Ways to Make Money is to Invest in Western Canada.

"Deep down in the nature of every properly constituted man is the desire to own some land." A writer in the Iowa State Register thus tersely expresses a well-known truth. The question is, Where is the best land to be had at the lowest price? and this the same writer points out in the same article. The fact is not disguised that the writer has a personal interest in the statement of his case, and there is no hidden meaning when he refers to Western Canada as presenting greater possibilities than any other part of the American continent to the man who is inclined to till the soil for a livelihood and possible competence. What interests one are the arguments advanced by this writer, and when fairly analyzed the conclusion is reached that no matter what personal interest the writer may have had his reasons appear to have the quality of great soundness. The climatic conditions of Western Canada are fully as good as those of Minnesota, the Dakotas or Iowa, the productiveness of the soil is as great, the social conditions are on a parity, the laws are as well established and as carefully observed. In addition to these the price of land is much less, easier to secure. So, with these advantages, why shouldn't this—the offer of Western Canada—be embraced? The hundreds of thousands of settlers now there, whose homes were originally in the United States, appear to be—are satisfied. Once in a while complaints are heard, but the Canadians have never spoken of the country as an Eldorado, no matter what they may have thought. The writer happened to have at hand a few letters, written by former residents of the United States, from which one or two extracts are submitted. These go to prove that the writer in the Register has a good basis of fact in support of his statements regarding the excellency of the grain growing area of Manitoba, Saskatchewan and Alberta. On the 29th of April of this year W. R. Conley, of Lougheed, Alberta, wrote to a friend in Detroit. He says: "The weather has been just fine ever since I came here in March, and I believe I can now find, if he wanted to, some small bunches of snow around the edge of the lake. There is a frost nearly every morning; at sunrise it begins to fade away, then those blue flowers open and look as fresh as if there had been no frost for a week."

There is no reason why this country should not become a garden of Eden; the wealth is in the ground and only needs a little encouragement from the government to induce capital in here. There is everything here to build with—good clay for brick, coal underneath, plenty of water in the spring lakes, and good springs coming out of the banks."

SPHON'S CURE
For DISTEMPER Pink Eye, Epizootic, Shipping Fever and Calarrhal Fever
Sure cure and positive preventive, no matter how horses at any age are infected or "exposed." Liquid, given on the tongue, acts on the blood and Glands; expels the poisonous germs from the body. Cures Distemper in Dogs and Sheep and Cholera in Poultry. Largest selling live stock remedy. Cures La Grippe among human beings and is a fine Kidney remedy. 50c and \$1 a bottle; \$5 and \$10 a dozen. Cut this out. Show to your druggist, who will get it for you. Free Booklet, "Distemper, Causes and Cures." Special agents wanted. Chemists and Bacteriologists Goshen, Ind., U.S.A.

PUTNAM FADELESS DYES
Color more goods brighter and faster colors than any other dye. One 10c package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors.
MONROE YRUG CO., Quincy, Illinois

Native Power.
"Yes, indeed; I've had many a good time taking my motor boat out for an all day fishing trip."
"About how much fluid do you use in a day?"
"Aw, don't ask a man that! How do you suppose I know—O, you mean how much gasoline? About four gallons or so."

Garfield Tea, the Herb laxative, agreeably stimulates the liver, corrects constipation and relieves a clogged system. Write for samples. Garfield Tea Co., Brooklyn, N. Y.

Answer This Question

When shown positive and reliable proof that a certain remedy had cured numerous cases of female ills, wouldn't any sensible woman conclude that the same remedy would also benefit her if suffering with the same trouble?

Here are two letters which prove the efficiency of Lydia E. Pinkham's Vegetable Compound.

Red Banks, Miss.—"Words are inadequate to express what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered from a female disease and weakness which the doctors said was caused by a fibroid tumor, and I commenced to think there was no help for me. Lydia E. Pinkham's Vegetable Compound made me a well woman after all other means had failed. My friends are all asking what has helped me so much, and I gladly recommend Lydia E. Pinkham's Vegetable Compound."—Mrs. Willie Edwards.

Hampstead, Maryland.—"Before taking Lydia E. Pinkham's Vegetable Compound I was weak and nervous, and could not be on my feet half a day without suffering. The doctors told me I never would be well without an operation, but Lydia E. Pinkham's Vegetable Compound has done more for me than all the doctors, and I hope this valuable medicine may come into the hands of many more suffering women."—Mrs. Joseph H. Dandy.

We will pay a handsome reward to any person who will prove to us that these letters are not genuine and truthful—or that either of these women were paid in any way for their testimonials, or that the letters are published without their permission, or that the original letter from each did not come to us entirely unsolicited.

What more proof can any one ask?

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

For Croup Tonsillitis and Asthma

A quick and powerful remedy is needed to break up an attack of croup. Sloan's Liniment has cured many cases of croup. It acts instantly—when applied both inside and outside of the throat it breaks up the phlegm, reduces the inflammation, and relieves the difficulty of breathing.

Sloan's Liniment

gives quick relief in all cases of asthma, bronchitis, sore throat, tonsillitis, and pains in the chest. Price, 25c, 50c., and \$1.00.
Dr. Earl S. Sloan, Boston, Mass.

Mayer's
Martha Washington Comfort Shoes

You will never know what genuine foot comfort is until you wear Martha Washington Comfort Shoes. They relieve tired and aching feet and make walking a pleasure. They fit like a glove and feel as easy as a stocking. No bother about buttons or laces—they just slip on and off at will. The elastic at the sides "gives" with every movement of the foot, insuring free action and a perfect fit. Absolute comfort guaranteed.

Beware of imitations. Only the genuine have the name Martha Washington and Mayer Trade Mark stamped on the sole. Refuse substitutes. Your dealer will supply you; if not, write to us.

FREE—If you will send us the name of a dealer who does not handle Martha Washington Comfort Shoes, we will send you free, postpaid, a beautiful picture of Martha Washington, size 12x14.

We also make Honorbilt Shoes, Leading Lady Shoes, Yemas Cushion Shoes and Special Merit School Shoes.
