

Sugar a Disinfectant.
In many parts of Europe it is customary among the people, especially the poorer classes, to burn sugar in sick rooms as a means of purifying the air. Physicians, however, have held that this was simply an innocent superstition, declaring that it was neither beneficial or harmful.

Prof. Tribert of the Pasteur Institute at Paris, however, has recently demonstrated that burning sugar develops formaldehyde-hydrogen, one of the most powerful antiseptic gases known to medical science. In his experiment seventy-seven grains of sugar were burned under a glass bell of ten quarts capacity. After the vapor had cooled bacilli of typhus, tuberculosis, cholera, smallpox, etc., were placed in the bell in open glass tubes, and within half an hour all the microbes were dead.

If sugar is burned in a closed vessel containing putrid meat, or the contents of rotten eggs, the offensive odor disappears at once.

His Crude Idea.
Foreigner—Why do you call it a "primary" election?
Native—We call it that, mister, 'cause that's the way we get primed for a real election.

WORTH MOUNTAINS OF GOLD

During Change of Life, says Mrs. Chas. Barclay

Graniteville, Vt.—"I was passing through the Change of Life and suffered from nervousness and other annoying symptoms, and I can truly say that Lydia E. Pinkham's Vegetable Compound has proved worth mountains of gold to me, as it restored my health and strength. I never forget to tell my friends what Lydia E. Pinkham's Vegetable Compound has done for me during this trying period. Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my trouble public so you may publish this letter."—Mrs. CHAS. BARCLAY, R.F.D., Graniteville, Vt.

No other medicine for woman's ills has received such wide-spread and unqualified endorsement. No other medicine we know of has such a record of cures of female ills as has Lydia E. Pinkham's Vegetable Compound. For more than 30 years it has been curing female complaints such as inflammation, ulceration, local weaknesses, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration, and it is unequalled for carrying women safely through the period of change of life. It costs but little to try Lydia E. Pinkham's Vegetable Compound, and, as Mrs. Barclay says, it is "worth mountains of gold" to suffering women.

WESTERN CANADA THE PENNANT WINNER

"The Last Best West."

The Government of Canada now gives to every Actual Settler 160 acres of wheat-growing land free and an additional 160 acres at \$3.00 an acre.

The 300,000 contented American Settlers making their homes in Western Canada is the best evidence of the superiority of that country. They are becoming rich, growing from 25 to 50 bushels wheat to the acre; 10 to 15 bushels oats and 45 to 60 bushels barley, besides having splendid herds of cattle raised on the prairie grass. Dairying is an important industry.

The crop of 1908 still keeps Western Canada in the lead. The world will soon look to it as its food-producer.

"The thing which most impressed us was the magnitude of the country that is available for agricultural purposes."

National Editorial Correspondence, 1908. Low Railway Rates, good schools and churches, markets convenient, Prices the Highest, climate perfect.

Lands are for sale by Railway and Land Companies. Descriptive pamphlets and maps sent free. For Railway Rates and other information apply to W. D. Scott, Superintendent of Immigration, Ottawa, Canada, or E. J. Holmes, 35 Jackson St., St. Paul, Minn., and J. M. MacLachlan, Box 110, Watertown, So. Dakota. Authorized Government Agents.

Work While You Sleep

Millions of people have CAS-CARETS do Health work for them. If you have never tried this great health maker—Get a 10c box—and you will never use any other bowel medicine.

CAS-CARETS are a box for a week's treatment, all druggists. Biggest seller in the world. Million boxes a month.

S. C. N. U. - No. 15—1909.

Give the breeding mare exercise every day.

Alfalfa or clover hay is good for the brood sow. Give her all she will eat up clean.

Hens do not like to scratch in wet litter. See that everything is dry as a bone and snug as you can make it.

Fairly good work may be done with poor tools, but how much easier and better work could be done with good tools. The best are none too good for the farm.

Many a horse has been permanently injured by slipping on the frozen road because smooth shod. See that his shoes are changed to correspond with the season.

Mea will have to do some thinking on the quack-grass problem this coming season in some parts of the country. With strong measures it can be eliminated from the soil. Quack methods are useless.

Foot-rot in cattle should be treated with water three parts and sulphuric acid one part, after the affected part has been thoroughly cleansed, or it should be smeared with pine tar and a bandage tied between the claws and about the pastern to keep out the dust.

Have a manure shed where you can keep the manure spreader standing. Have it handy to the barn so that the manure can be dumped into the spreader when the barn is cleaned each morning. Then when the wagon is full haul to the field and put on the land at once.

The up-to-date man whether farmer or merchant is generally well paid. A case comes to notice where a farmer, by extensively advertising his farm sale, brought out the community far and near, and realized large net returns for his progressiveness. He who can use talk skillfully in his business has a great advantage.

Make the farm and the home something besides just a place for work if you would tie the boys and the girls to it. The farmer who thinks only of the work he is going to get out of his children and who thinks more of the farm and the stock than he does of his boys and girls need not be surprised that they are anxious to break away from the farm when they are old enough to choose for themselves.

Every man ought to be kind to dumb animals without having his attention called to it. A farmer in an adjoining county kicked at a neighbor's dog one morning when the ground was soft and his boots loaded with nice, rich clay. He missed the dog and the great weight on his boot resulted in carrying him over a fence into an old cistern that had been left open. The moral of this tale is to be kind to all animals.

Here's a hard one: An automobile frightened a jack rabbit; the rabbit in getting through a woven wire fence scared a flock of sheep; the sheep took to their heels and caused a team to run away; the team went crashing into a farmyard gate just at milking time; a beautiful girl had just finished milking eight cows; the herd stampeded and all but one pair of milk was upset and old Brindle even stepped in that one, though it wasn't overturned. Now who is to blame for the loss of all that milk?

Carefully conducted experiments show that the manure produced per thousand pounds of live weight of the following classes of farm animals is valued at from \$25 to \$60 per head per year. The valuations given are as follows: For cows, \$29; horses, \$27; sheep, \$26; calves, \$24; pigs, \$30. This valuation takes into consideration only the actual amounts of nitrogen, phosphorus and potassium contained in the manure from these animals, valued in accordance with the present prices of these constituents in the form of commercial manures or fertilizers. It does not take into consideration the value of the manure as a human builder due to its large organic matter content. From this it should be plain to any one that the economical handling of farm manure is one of the very important factors in maintaining the fertility of our soils.

Ingenious Egg Tester.
An ingenious instrument has been invented for testing the relative freshness of eggs, says the London Globe. It is well known that when a fresh egg is placed in water it sinks, while a stale one floats, but the new instrument registers accurately degrees of freshness. By means of it eggs may be classified with precision into new-laid, fresh, cooking, etc. The apparatus consists of an aluminum arc chamber with a graduated stem above. Below are spring wire loops to hold the egg. When the egg is fixed in this and placed in the water its quality can be

read off on the graduated stem. If it sinks down to the Mark XX the egg is new laid; 0 means still quite fresh, while 4 marks the limit of the breakfast egg. The mark 8 means still good for cooking, while 12 is bad. It would be well if dealers in new-laid eggs were required to have this apparatus and to satisfy their customers by ocular demonstration that they are XX.

The Power of Roots.
The tremendous power of a pushing root is a subject for marvel. It will lift tons by the swelling of its slender trunk or read rocks with the power of dynamite, but silently and invisibly. The pertinacity and force of plants is occasionally shown in the great cities in this wise: Some old residences have vines many years old climbing up their weather-beaten brown fronts. Their roots are deep in the tiny front garden plot, and their tendrils were at first trained up slender cords to the iron balconies on the first floor. These slender green things twined in and out of the iron railing of the balcony like little serpents till they reached the vertical wall, which, nothing daunted, they began to climb.

Little by little the tender green stems changed to hard, woody tissues which swelled into flat plaits to accommodate itself to the bars of the iron railing through which it had woven itself. But the accommodation was only formal, for, swelling steadily, the vine trunks appear to-day to have become as large as a man's arm, and the iron rails which were its earliest support have been broken in twain by their ungrateful dependents.

Another singular example of the pertinacity of the roots is the following: A drain pipe seemed to be choked. Investigation showed that a thread-like shoot of a tree had penetrated one of the minute pores of the city pipe; once inside the drain the tendril found such luxurious nourishment that it grew and divided into branches, which wound themselves in coil on coil, until finally passage in the drain was completely choked up. It is said that bucketsful of tangled filaments were taken out of this pipe, which measured only eight inches in diameter, while the skeins originated in a single threadlike filament, back through which coursed the abundant nourishment to push on the growth of the maple tree above ground.

Draft Horses.
The draft horse is getting bigger and bigger. In the late '80's if one weighed over 1,600 pounds and came from France, it was an event and the horse papers talked about him, with pictures. To-day the draft importer will touch nothing under 1,800 pounds and 3-year-old colts often run up to a ton.

The favorite draft breed in America—six to one—is the Percheron of France. It comes from Le Perche, southwest of Paris, and nowhere else. The horse breeders in that district have banded themselves into a guild or union, and decreed that no horse from outside the borders of their district can ever be recorded as a Percheron in the studbook of the breed. A colt foaled just across the line out of a mare and by a sire correctly registered cannot himself be registered.

The foundation blood of the Percheron is, or is said to be, Arab. The Frenchman will tell you that a Percheron is an Arab made heavy by the climate. But whether Arabian extraction or not, it is sure that the breed has been made heavy by the climate or human selection during the past half century.

When George Sand was writing the Percheron was famous as a road horse—a traveler, a ground coverer. Her heroes used to drive hither and thither behind four splendid distance eating Percherons. No modern Frenchman would dream of driving up to his Ninette's door behind four Percherons.

The Perche peasants, within the limitations of their material, most wonderfully fashion into being their equine imaginings. It is much easier and simpler to carve a horse of the shape you want on the Parthenon frieze than out in a Lucerne pasture in the Eure-et-Doir district. Dazed by their artistry, the French minister of agriculture gravely reports, "These men of Le Perche are incredible. Command from them a horse, they will build you one to your specifications."

From the current report of the French horse breeding bureau is learned that during the fiscal year 1914, 144 mares were bred to stallions belonging to the state, 1,207 to approved stallions, 9,467 to authorized stallions. This is bureaucratic, isn't it, that a country should be able to report a thing like that? And in the archives of the French government is the name and description of each mare in France, together with date about the horse with which she was bred.

The French never dream of breeding to stallions of mixed or unknown blood. But the American farmer who bred his mare to a Percheron for a heavy colt usually changes his mind a couple of years later, puts what he got from the first cross to a coach horse for style, this product to a trotter for speed, and the grand result to a jack or mule. As a horse breeder he looks only at the outside of the sire (and apparently not so careful at that), and cares little what kind of blood is running inside.

THE CRACKING OF PAINT.

Property Owners Can Save Money by Learning the Cause.

Do you know what is wrong when paint peels, or cracks, or otherwise necessitates re-painting?

Well, sometimes it hasn't been properly applied—the surface being damp or there being too much turpentine or too much drier.

But, nine times out of ten, the trouble is caused by adulterated white lead. To avoid all such trouble, every houseowner should know in a general way, when a surface is in proper condition to receive paint, what kind of primer and finishing coats different surfaces require, and how to avoid adulteration in materials.

A complete painting guide, including a book of color schemes, specifications for all kinds of painting work, and an instrument for detecting adulteration in painting materials, with directions for using it, can be had free by writing National Lead Company, 1902 Trinity Bldg., New York, and asking for Houseowner's Painting Outfit No. 49.

This company, the largest makers of pure white lead, invite tests, by means of the blowpipe (included in outfit), or in any other way, of the purity of the white lead sold under their famous "Dutch Boy Painter" trademark. That trademark on a keg of white lead is in itself an absolute guarantee of purity and quality.

What Could She Do?

The Young Man—I wish to thank you, sir, for giving me your assistance in persuading my daughter to marry me.

The Old Man—Sir, I was violently opposed to the match.

The Young Man—I know it.—Cleveland Leader.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation.

The Hard Part.

The Sporting Reporter—I suppose it's hard to get the descriptions of the women's gowns correct?

The Society Reporter—No; the hardest thing is to write the description so that every person will consider her self the best dressed woman present.

Don't Be Misled.

Many a life has been cut short by a cough that was not believed to be serious. Many a backache and sideache follows a coughing spell. Many a night is passed in restlessness caused by coughing. Many a cough "cure" that never cures is tried. Do not be misled. If you cough, take the old reliable Kemp's Balsam, the best cough cure. At druggists' and dealers', 25c.

In the Cave of Gloom.

Correspondent—Do you know, Senator, that the crack in the liberty bell has extended several inches lately?
Pessimistic Statesman—No, I hadn't heard that. But I know there's a hole in the constitution big enough to drive an elephant through.—Chicago Tribune.

In a Pinch, Use Allen's Foot-Ease.

A powder to shake into your shoes. It rests the feet. Cures Corns, Bunions, Swollen, Sore, Hot, Callous, Aching, Sweating feet and Ingrowing Nails. Allen's Foot-Ease makes new or tight shoes easy. Sold by all Druggists and Shoe Stores, 25c. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Practical.

Walking leisurely around the Egyptian Sphinx, the traveler from America inspected it from all points of view.
"It's a shame," he exclaimed, "to leave the thing in that shape. If I had it out in Chicago I could clap a good cement nose of that face so quick it would make its head swim!"

Pettit's Eye Salve First Sold in 1807 over 100 years ago, sales increase yearly, wonderful remedy; cured millions weak eyes. All druggists or Howard Bros., Buffalo, N. Y.

Disappointment.

Happy Bride (on wedding tour)—You say we are coming to a tunnel, Harry? Is it a long one?

Bridegroom (momentarily depressed)—Yes; entirely too long. The conductor tells me they light up the cars before entering it.

Only One "BROMO QUININE" That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the World over to Cure a Cold in One Day. 25c.

Decided Improvement.

Scribbles—I understand young Rhymey is doing much better than formerly in the poetry line.

Dribbles—Why, he told me he hadn't written a line for six months.

Scribbles—Yes, he told me the same thing.

For Colds and Grip.

Lane's Pleasant Tablets (laxative) cure colds in an hour and are the best treatment for grip. Do not wait a minute when you feel a cold coming on, but get a box of these tablets and save suffering and expense. They are sold by druggists and dealers at 25 cents a box. Orator F. Woodward, Le Roy, N. Y. Sample free.

Crushing Sarcasm.

Mr. Hewligus—Fourteen dollars, madam, is an outrageous price to pay for a hat!

Mrs. Hewligus—If I should buy the planet Saturn for a hat you'd think I oughtn't to pay more than 30 cents for it.

Try Murine Eye Remedy For Red, Weak, Watery Eyes. Compounded by Experienced Physicians. Conforms to the Pure Food and Drugs Law. Murine Doesn't Smart. Soothes Eye Pain. Try Murine for Your Eyes. You Will Like It.

Power of Plants.

Farmers are well acquainted with the fact that the roots of trees will disrupt and sometimes overturn a stone wall, but the lifting power of tender vegetables is equally surprising.

The one result which has perhaps attracted the greatest attention is the discovery that a weight of two and a half tons can be lifted by the common pumpkin in the course of its development.

Dr. Carpenter relates the story of a paving stone weighing eighty-three pounds that was raised from its bed (when joined by others on all four sides) by such a soft piece of fungi as the common mushroom. And still another and more remarkable story is added to the above.

A man had a cask of sweet wine any placed it in an empty cellar to mature. When examined several years later it had risen from the floor of the cellar to the ceiling, having been borne upward upon the tender shoots of a vine fungus with which the cellar was filled.

COLDS

CURED IN ONE DAY

Munyon's Cold Remedy Relieves the head, throat and lungs almost immediately. Checks Fevers, stops Discharges of the nose, takes away all aches and pains caused by colds. It cures Grip and obnoxious Coughs and prevents Pneumonia. Price 25c.
Have you stiff or swollen joints, no matter how chronic? Ask your druggist for Munyon's Rheumatism Remedy and see how quickly you will be cured.
If you have any kidney or bladder trouble get Munyon's Kidney Remedy. Munyon's Vitalizer makes weak men strong and restores lost powers.
