

Buried Treasure in Morocco.
In Morocco it is customary for a man to bury most of his riches in a place known only to himself. This custom is practiced by all Moors, for they cannot trust their directly it was known where the money was.
At the death of the head of a family in Morocco, digging operations commence at once, but seldom is the money discovered. There must be many fortunes buried away in odd corners of the country. An instance came under the writer's notice at one of the coast towns. During the demolition of a house a considerable sum of money was found built into the wall.

DISCOURAGED WOMEN.

A Word of Hope for Despairing Ones.

Kidney trouble makes weak, weary, worn women. Backache, hip pains, dizziness, headaches, nervousness, languor, urinary troubles make women suffer untold misery. Ailing kidneys are the cause. Cure them. Mrs. Irene Tudor, 118 N. Clagg St., Bellefontaine, Ohio, says: "I thought my trouble incurable, as I suffered so long with kidney complaint. I had sharp, agonizing pains and serious urinary trouble. I was tired and depressed and nothing seemed to help me. Finally Doan's Kidney Pills brought relief and soon effected a complete cure."

Remember the name—Doan's. Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

A Well-Known Type of Oratory.

At a luncheon in Boston, Leonora O'Reilly, who is perhaps the most powerful orator among the American suffragists, was complimented on her eloquence.

"It is my splendid subject," said Miss O'Reilly, modestly, "that makes me seem to speak well. My subject affords me many telling things to say, and I say them simply. That is all."

She smiled. "I try to avoid," she resumed, "the sort of oratory that marks the average political campaign. That is frightful. One night on the East Side I saw a workman I knew lounging in the doorway of a public hall, and from inside came a continuous and earnest bellowing."

"Do you know who's speaking?" I asked my friend. "Or haven't you been in?"

"Oh, yes, I've been in," said he. "Assemblyman Blagg is speaking."

"What about?" I inquired.

"My friend sighed and shook his head."

"He didn't say," he answered.

A Nasty Dig.

Madge (proudly)—Did you see that handsome man I just danced with?

Kate—Yes; he has a jealous wife who will allow him to dance only with the plainest girls in the room.—Boston Transcript.

SICK HEADACHE

CARTER'S LITTLE LIVER PILLS.
Positively cured by these Little Pills. They also relieve Distress from Indigestion, Inflammation and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Headache, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable.

SMALL PILL. SMALL DOSE. SMALL PRICE.

CARTER'S LITTLE LIVER PILLS.
Genuine Must Bear Fac-Simile Signature. *Wm. Wood*
REFUSE SUBSTITUTES.

DYSPEPSIA

"Having taken your wonderful 'Cascarets' for three months and being entirely cured of stomach catarrh and dyspepsia, I think a word of praise is due to 'Cascarets' for their wonderful composition. I have taken numerous other so-called remedies but without avail, and I find that Cascarets relieve more in a day than all the others I have taken in a year."

James McGurne, 108 Mercer St., Jersey City, N. J.
Pleasant, Palatable, Foetus, Taste Good, Do Good, Never Sickens, Weakens or Grips. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C.C.C. Guaranteed to cure or your money back. \$19

DAISY FLY KILLER

placed anywhere, it kills all flies, mosquitos, etc. It is safe for all animals, and does not injure anything. Guaranteed effective. Of all dealers. Each box priced for 30c. **HAROLD BOWEN, 150 Duane St., New York, N. Y.**

S. C. N. U. - No. 34-1909.

If afflicted with sore eyes, use **THOMPSON'S EYE WATER**

Sanitary Milk Pails.

Much the larger proportion of milk is carried in wide-topped, uncovered pails from the cow to the strainer, a distance of 25 to 100 feet, across a cowyard, under a hay loft, or past a manure pile, thus exposing a large surface of warm milk, which absorbs all kinds of undesirable odors and collects dirt and dust.

Galvanized iron is something used for milk pails, but it is not best, for the rough surfaces afford hiding places for bacteria. Wooden vessels should not be used for holding milk, for it is almost impossible to keep them clean. Besides imparting a metallic flavor to milk, rusty tinware is objectionable because it is impossible to keep it clean. Good tin is the only practicable material for milk vessels, and it must be kept shiny and bright.

The most important thing in producing milk is to keep the dirt out. This can only be done by carefully grooming the cows and by using a sanitary pail, two of which are shown here. There are several types of these pails, but they all have the same principle. There is a cover with a small opening, under which is fastened a

DOUBLE PROTECTION. NO SPATTERING.

double protection. No spattering. The pail is covered with a small opening, under which is fastened a

SUBSTITUTE FOR GATE.

There are places where a common everyday gate is an utter nuisance and where a turnstile or some other gate substitute or contrivance is particularly convenient and welcome. With the arrangement herewith illustrated the gateway is always closed to animals, but men may pass through it without difficulty. The accompanying drawing will give a clear idea of the plan. The sketch is made to represent a very small gate, but to answer all purposes the wing panels and gate perhaps should be half a rod in length.

cheesecloth strainer. The one with the spout strains the milk as it enters the pail, and also as it is poured out.—Farm and Home.

Thistle as Stock Food.
Stock of all kinds greatly relish the plants of the Russian thistle, which has fairly jumped out of the ground since the rains, and our Eastern plains are veritable with it. Why not make hay of it? So palatable is the hay to cattle that they leave green pasture and break through fences to devour this obnoxious and outlawed weed if it is cut and stacked before the reddish tinge comes on to the plant, which occurs about the middle of July. Many of our Colorado people have used Russian thistle for forage for several years, and some of them say that it is as good as alfalfa. In a recent analysis the Russian thistle as

sawed as follows: Protein, 17.95; ether extract, 3.61; ash, 21.98; crude fiber, 20.14, and carbohydrates, 36.32. All over Eastern Colorado there is a lamentable shortage of protein feed-stuff. Corn, corn stalks, straw, millet, Kaffir and prairie hay are all long on starchy matter, but short on protein. In the thistle we have a crop that grows on the arid reaches which will not only yield a large amount of forage, but a very palatable one at that, and a crop that is rich in the two elements in which others are deficient.—Field and Farm.

Bordeaux Mixture.

The Bordeaux mixture is the proper remedy to use for all fungous troubles, viz., mildew and rust of beans; potato and tomato rot and leaf-blight; melon and cucumber diseases; celery leaf-blight and rust, etc. The half-strength mixture (two pounds copper sulphate, two pounds quicklime, fifty gallons of water) is strong enough to use in the vegetable garden, except for potatoes.

Ventilating Stables.

Horses and cows are in the stable at night for rest. When the weather is warm the atmosphere in close confinement becomes very warm and oppres-

sive, so much so that the animals become very uncomfortable, and hence fail to get proper rest. The horse that does not get proper rest is not in a good condition for heavy work the following day, and the cow that does not sleep in a cool, restful place in hot weather will not give a full flow of milk. The temperature of the working or producing animal must be kept normal to give best results. If there are no windows in your stables, cut out a number now and let light and fresh air come for the health and comfort of the animals. There is nothing like plenty of good fresh air in living and sleeping rooms, whether the rooms be for the occupancy of man or of animals. This holds good for both winter and summer.

Grain Ration for Swine.

It is much the best economy to furnish swine a grain ration when they are on pasture, as it results in better gains and a better product. One man estimates that it takes from one-half to one-third less corn on alfalfa pasture than on a straight grain ration to make a hog ready for market. Many let the hogs run on alfalfa until about five or six months old, by which time they reach a weight of 75 to 125 pounds, feeding just a little grain; then they feed heavily for about two months and sell the hogs at eight months old weighing 200 to 220 pounds. One farmer who raises about a thousand hogs a year and who in one year sold \$11,200 worth, makes a practice of growing his hogs on alfalfa pasture until about eight months old, feeding one ear of corn per head daily. He then feeds heavily on corn for a month or two and sells at an average weight of 200 to 225 pounds. Another man feeds all the corn and slop the pigs will clean up, all the while grazing them on alfalfa pasture, and sells at six to eight months old at weights of 250 to 300 pounds. Another, who raises about a thousand head a year,

Whole Body a Mass of Raw, Bleeding, Torturing Humors—Hair All Fell Out—Hoped Death Would End Fearful Suffering—In Despair—Cured by Cuticura.

"Words cannot describe the terrible eczema I suffered with. It broke out on my head and kept spreading until it covered by whole body. I was almost a solid mass of sores from head to foot. I looked more like a piece of raw beef than a human being. The pain and agony I endured seemed more than I could bear. Blood and pus oozed from the great sores on my scalp, from under my finger nails, and nearly all over my body. My ears were so crusted and swollen I was afraid they would break off. Every hair in my head fell out. I could not sit down, for my clothes would stick to the raw and bleeding flesh, making me cry out from the pain. My family doctor did all he could, but I got worse and worse. My condition was awful. I did not think I could live, and wanted death to come and end my frightful sufferings."

"In this condition my mother-in-law begged me to try the Cuticura Remedies. I said I would, but had no hope of recovery. But oh, what blessed relief I experienced after applying Cuticura Ointment. It cooled the bleeding and itching flesh and brought me the first real sleep I had had in weeks. It was as grateful as ice to a burning tongue. I would bathe with warm water and Cuticura Soap, then apply the Ointment freely. I also took Cuticura Resolvent for the blood. In a short time the sores stopped running, the flesh began to heal, and I knew I was to get well again. Then the hair on my head began to grow, and in a short time I was completely cured. I wish I could tell everybody who has eczema to use Cuticura. Mrs. Wm. Hunt, 135 Thomas St., Newark, N. J., Sept. 28, 1908."

Potter Drug & Chem. Corp. Sole Props. of Cuticura Remedies, Boston.

Making History.

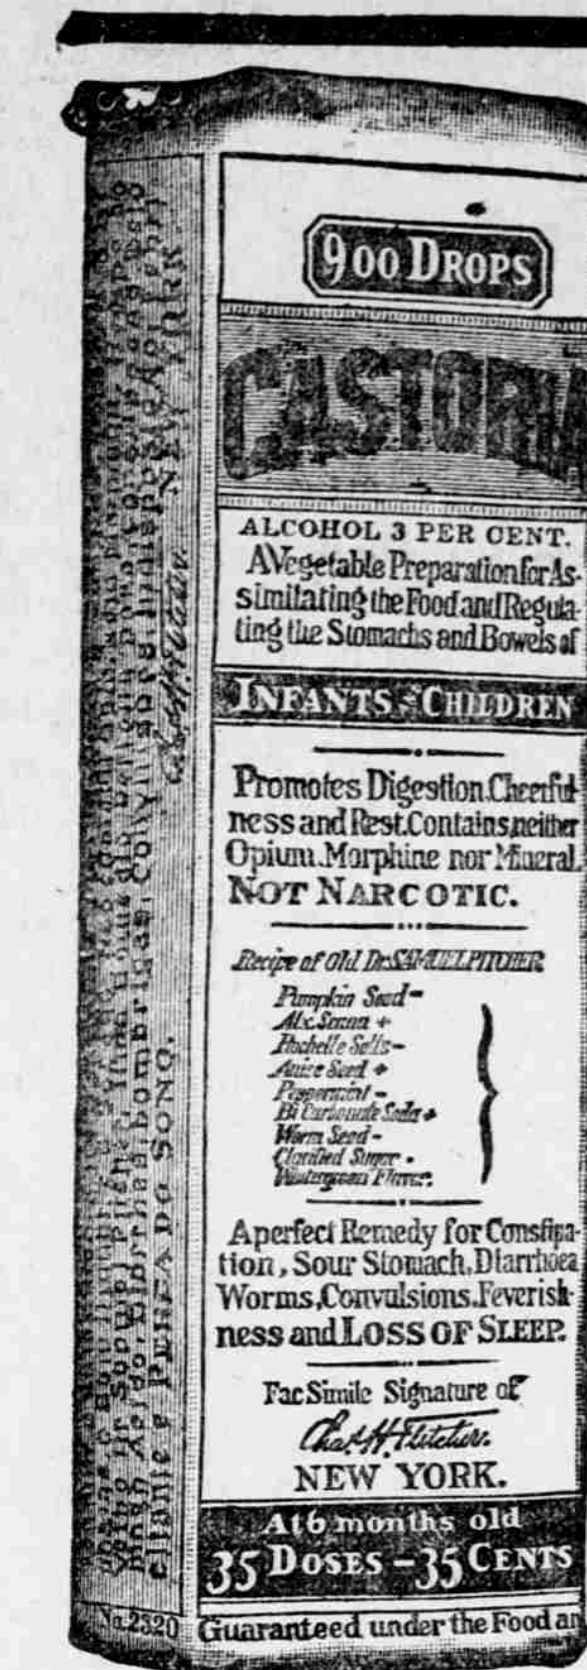

When Kinglake was writing his history of the Crimean war he received letters from all sorts of people concerned in the war. One day a letter with a deep black border came from two people in the colonies, husband and wife, describing their grief. Their only child had been killed in the Crimea. They wanted to have him mentioned in the "History of the Crimean War." Kinglake was touched and replied by post that he would do his best if they would send him the necessary particulars. Again a letter, also black bordered, full of thanks, but with the following conclusion: "We have no particulars whatever to give you. He was killed on the spot, like many others, but anything you may kindly invent will be welcome. We leave it entirely to your imagination."—London Chronicle.

Curious Mourning Custom.

A curious mourning custom obtains among Central Australians, who, although representing perhaps the lowest and most degraded type of human beings, have managed to evolve a most complex system of rites and ceremonies, which govern almost every action of their lives. When a husband dies the widow paints herself all over with white pigment, and for the space of a year must not exhibit herself to a male member of the tribe on pain of death. For the rest of her life, unless she marries again, which is sometimes allowed, she must not speak, but communicates with the other women by means of a sign language, consisting of movements of the hands and fingers, which has been developed by these savages to a marvelous extent, and by which their limited stock of ideas can be fully expressed.—Dundee Advertiser.

Kerosene Emulsion.

Here is a recipe for kerosene emulsion: Hard soap, half pound; boiling water, 1 gallon; coal oil, 2 gallons. Dissolve the soap in the water, pour in the coal oil and churn or beat together briskly with a paddle for at least ten minutes. Dilute from ten to twenty-five times before applying. Use it strong for scale insects. Kerosene emulsion destroys insects which suck, such as plant lice, red spiders, etc. It will also kill cabbage worms, caterpillars, and all insects with soft bodies.

THE CASTORIA COMPANY, 77 BURLING STREET, NEW YORK CITY.

Autos Might Be Cheaper.

A suit that may result in sensational disclosures has been brought against three members of the Association of Licensed Automobile Manufacturers. The defendants are the Locomobile Company of America, the George N. Pierce Company, of Buffalo, and the H. H. Franklin Manufacturing Company, of Syracuse. They are accused by the Flint Automobile Company of Flint, Mich., of compelling the latter to go out of business by threatening suits against its customers for alleged infringement of a patent. This action is brought under the Sherman anti-trust law, and it is charged that the auto companies formed an association in 1903 including 70 per cent of the persons or firms in the automobile trade "to raise and maintain artificially the price of gasoline automobiles, and to regulate and restrict artificially the output of such automobiles and the trade and commerce therein." The Flint company declares that it was not infringing on any patent, and that the threats against it were made solely to drive it out of business. The outcome of the case is being watched with great interest. Leslie's Weekly asserts, and it is said that if the alleged combination is broken up the prices of automobiles will be reduced.

The Adventurous Fellow.
"Hello, is this the electric-light company? Do you take cats down?—yes, cats!—She is on a pole, and crying just terribly. She must have been up there a week, for she's just as thin!—What?—Oh, this is Fifty-ninth avenue. A big dog is barking at her, too, and she—what street? Why, I don't know; I don't live on this street, do I?—Oh, yes, of course!—Bristol street, the druggist says.—Oh, will you?—You are so good! And a man just said she is playing with the transformer and might short-circuit herself, or something. Well, thank you very much. I am so glad.—Good-by!"—Success Magazine.

The Danes seem most addicted to suicide. Their average is 250 self-murderers a million persons a year.

Intellect Ruled by Superstition.

A man more absolutely governed by pure reason than Lord Macaulay could not well be found, but in his diary he refers to an after-dinner talk about the feeling which Johnson had of thinking one's self bound to touch a particular rail or post and to tread in its middle of a paving stone, and he adds: "I certainly have this very strongly."

And This, from a Wife.

Husband (explaining his late home coming)—My dear, I couldn't help it. I just missed the last car and had to wait forty minutes.
Wife—Now don't blame it on the street car company. They've troubles enough without you.—Detroit Free Press.

A government fuel testing plant has been established in Canada, with the idea of developing the use of peat as fuel. There are great quantities of this material in Canada.

Ready Cooked.
