

CONSTIPATION RELIEVED

PRICE 25 Cts.
Mailed postpaid on receipt of price

You can't have a beautiful complexion if your blood is impure or if you suffer with indigestion or any stomach or liver ailment.

Munyon's Paw-Paw Pills regulate the bowels, correct indigestion, constipation, biliousness, torpid livers, jaundice, sallow and dull complexions. They purify the blood and clear the skin of pimples, sores and most eruptions.

One pill is a gentle laxative; two pills a thorough physic. They do not gripe, they do not weaken. Price 25c.

MUNYON'S REMEDY CO.,
53rd and Jefferson Sts., Phila., Pa.

You Indoor People

must give the bowels help. Your choice must lie between harsh physic and candy Cascarets. Harshness makes the bowels callous, so you need increasing doses. Cascarets do just as much, but in a gentle way.

Vest-pocket box, 10 cents—at drug-stores. 35¢ Each tablet of the genuine is marked C C C.

What New York Wastes.

New York City wastes officially \$50,000,000 a year—this apart from the amount lost by theft and grafting, says Franklin Clarkin in an article in "Success Magazine."

This equals the losses of the Baltimore fire or the first cost of the Erie canal, or the national expenditures of the Kingdom of Sweden, or those of the Dominion of Canada.

It is more that Great Britain will require this year to pay its old-age pensions.

It is a waste of the energy of every tired straphanger, of the leisure which better transit facilities would yield the every day worker.

It is a waste of the wages of the poor. On these all frauds and extravagances of government finally bear.

It is also a melancholy waste of human life. The income from these wasted millions would stamp out not only tuberculosis, but also typhoid and diphtheria.

Most American cities are equally misgoverned, yet in the same world, with human nature just the same, there are many cities which administer so ably that they collect no taxes—some which actually pay dividends to their citizens.

DON'T DESPAIR.

Read the Experience of a Minnesota Woman and Take Heart.

If your back aches and you feel sick, languid, weak and miserable day after day—don't worry. Doan's Kidney Pills have cured thousands of women in the same condition.

Mrs. A. Heiman of Stillwater, Minn., says: "But for Doan's Kidney Pills I would not be living now. They cured me in 1899 and I've been well since. I used to have such pain in my back and once I fainted. The kidney secretions were much disordered and I was so far gone that I was thought to be at death's door. Since Doan's Kidney Pills cured me I feel as if I had been pulled back from the tomb."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

English Pauper's Ingenuity.

How a pauper obtained wool to knit socks and mittens, which he sold to enable him to buy tobacco, was described to the West Ham magistrates recently, the London Chronicle says. The pauper was Thomas Ledgett, aged 49, an inmate of the Stratford branch of the Poplar Union, and he was charged with damaging a number of blankets, the property of the guardians.

The master of the workhouse found that the wool binding the edges of blankets was being removed, and that in five days no fewer than 345 blankets were so damaged. A search failed to discover who was taking the wool, but when Ledgett was removed to the farm colony at Laindon it came to the knowledge of the master that he had been seen knitting with pink wool. Friday the master went to Laindon, and on searching the prisoner's bed he found a bag filled with balls of pink wool, evidently stripped from the blankets, and three socks knitted with pink wool. Ledgett, who denied that he had stripped 345 blankets, was sentenced to two months' hard labor.

FARMERS' CORNER

Cultivation of Corn.

At the several experiment stations corn has received more than its share of attention, and many experiments have been made in order to learn how to derive the largest yields and to grow the crop most economically. Opinions differ, however, as climate, variety and soil are factors governing every crop. The Indiana station found that the best results were obtained by planting seed in May. It has been shown that the greatest average yield of both ears and stalks have been obtained when the stalks stood about twelve or fourteen inches apart in the rows. Thick planting, however, reduces the size of the ears, and the percentage of grain, but thick planting has, in dry seasons, produced the heaviest yield of stalks and the highest yield of ears. So far as depth of cultivation is concerned, the yields, when corn was cultivated one, two and three inches, have been equal. In continuous corn culture heavy applications of fresh horse manure have not been profitable, but the effect of a very heavy application of manure has been noticed for many years. There does not seem to be much difference in yields due to any particular implement used, while hill and drill plantings of corn have produced the same average yields. The "checking" of corn is still the most popular and profitable mode of growing the corn at the least cost of labor. The results at one station may not correspond with those obtained elsewhere, but where the work has extended over a number of years the results should be accepted as important, if not conclusive.

A Yard Scraper.

Besides its use in the barnyard, this is handy for covering potatoes, leveling rough ground, filling ditches, etc. It should be made of 2-inch lumber, and hard wood if possible; the scraper should be 6 to 8 feet long, and 2 feet high; its life will be prolonged if

HANDY BARNYARD SCRAPER.

shod with a piece of iron or steel, as shown; moreover, it will do good work without the iron. The evener must be at least 4 feet from scraper, to allow for load, and to keep same from under the horses' feet. A very large barnyard may be cleaned in a short time, and several loads of manure saved. Simply drive the load where wanted, lift scraper up by the handles, leaving load, and repeat the operation.

Cooling Cream.

Different conditions on the farm will govern arrangements for the cooling of cream. Where windmills are used, many farms have cheaply constructed milk-houses in which can be placed a tank or half barrel, through which all water is led from the windmill to the stock-watering tanks. With the cream cooled and held in these tanks the arrangement is everything required.

Where windmills and milkhouses are not used, a half barrel can be set near the pump and a cheap shade constructed. The water can be pumped by hand with small expenditure of time and labor. The cooling of the cream will heat the water. Run out the warm water and pump a fresh supply in which the cream can set over night or through the day before being added to the supply can. When another lot of warm cream is to be cooled, the operation can be repeated. A large box can be set over the barrel to protect the cream from the sun. The farmer's ingenuity may suggest some other protection equally as good.

There are a dozen or more arrangements, inexpensively and easily made, which can be devised on every farm for the proper care of cream. These remarks suggest only the principle of keeping the cream in good condition.

Growing Bush Beans.

Bush or dwarf beans are easy to grow and are one of the best and most popular of garden vegetables. A succession of them should be planted and be coming on from the very earliest summer till after the first frosts of autumn. Beans of all kinds are somewhat tender and are easily killed by late spring frosts, yet they are easily and cheaply planted and risk should be taken in planting extra early. If the first crop happens to be caught by frost, it is a very easy matter to plant the same space over again and little will be lost by the trial, as one preparation of the soil will serve for a succession of crops.

For bush beans prepare the ground early in a dry condition, working it down to a very fine and even seed bed. Make the surface soil especially fine and loose, since the bean sometimes has difficulty in coming up in three or four days. Give the young plants clean and light surface cultiva-

tion to conserve soil moisture. A three or four-shovel horse cultivator may be used, but never in them while the vines are in the least wet or moist, as this will bring on disease. Plant a succession, about three weeks apart, up to the last of August in central latitudes. Pick the beans clean while they are green regularly and the vines will ripen longer. If beans are allowed to ripen on the vines the vines will soon die.

Treating Horse Corns.

Dr. A. A. Holcombe, inspector of the United States bureau of animal husbandry, says of treating horse corns: "As in all other troubles, the cause must be discovered if possible and removed. In a great majority of cases the shoeing will be at fault. For a sound foot, perfectly formed, a flat shoe with heels less thick than the toe and which rests evenly on the wall proper is the best. In flat feet it is often necessary to concave the feet as much as possible on the upper surface so that the sole may not be pressed upon. If the heels are very low the heels of the shoe may be made much thicker. If the foot is very broad and the wall light toward the heels a far shoe, resting upon the walls, may aid to prevent excessive tension upon the soft tissues when the foot receives the weight of the body. A piece of leather placed between the foot and shoe serves largely to destroy concussion, and its use is absolutely necessary on some animals to enable them to work. Among the preventive measures may be mentioned those which serve to maintain the suppleness of the hoof. The dead horn upon the surface of the sole not only retains moisture for a long time, but protects the living horn beneath from the effects of evaporation. For this reason the sole should be pared as little as possible.

HORSE CORNS.

There are a hundred and one places where milk can be contaminated from the time it is drawn from the udder till it reaches the table in the form of sweet milk, cream or butter. First, a great deal of bacteria, impurities and disease germs get into the milk at the barn or lot in which the cows are kept. Second, a great many more of these owe their existence in milk to the attendant and the place in which the milk is kept. The moment the cow shows signs of being ill, or when even a slight eruption is noticeable, a person may contract disease by partaking of her milk. Impure water is another way in which milk is contaminated. If the cow is compelled to drink out of a mud hole, filled with disease germs, she cannot help but drink a large number of those germs into her system, some of them being sure to reach her milk. Milking the cow into an open pan when the barn is filled with dust, and from which there hangs an untold number of dirty cobwebs, or milking her in an offensively smelling lot, where the filth is ankle deep, or milking a cow whose udder, flanks and legs are covered with dirt and filth—in such cases it is impossible to avoid contamination of the milk. It is believed that more disease germs are given the human family through milk than are given in any other agency; and we also believe that less attention is paid to the care of milk than to any other food consumed upon the table.

Milk Contamination.

There is a hundred and one places where milk can be contaminated from the time it is drawn from the udder till it reaches the table in the form of sweet milk, cream or butter. First, a great deal of bacteria, impurities and disease germs get into the milk at the barn or lot in which the cows are kept. Second, a great many more of these owe their existence in milk to the attendant and the place in which the milk is kept. The moment the cow shows signs of being ill, or when even a slight eruption is noticeable, a person may contract disease by partaking of her milk. Impure water is another way in which milk is contaminated. If the cow is compelled to drink out of a mud hole, filled with disease germs, she cannot help but drink a large number of those germs into her system, some of them being sure to reach her milk. Milking the cow into an open pan when the barn is filled with dust, and from which there hangs an untold number of dirty cobwebs, or milking her in an offensively smelling lot, where the filth is ankle deep, or milking a cow whose udder, flanks and legs are covered with dirt and filth—in such cases it is impossible to avoid contamination of the milk. It is believed that more disease germs are given the human family through milk than are given in any other agency; and we also believe that less attention is paid to the care of milk than to any other food consumed upon the table.

When Haying Is Done.

There's a smile of relief and a spirit of fun Comes over the farmer when haying is done; With his haylofts all swelling with sweet-scented hay His smile is as cheery as sunshine in May. The summer's half over, and out in the field He sees the approach of a bountiful yield; As tall as his hat is the golden-topped corn, Which waves its long arms in the breeze of the morn. As fair and as fragrant as gardens of old Are his fields with their stubble as yellow as gold.

With his barn full of hay and his bedding stacked high, A smile on his face and a gleam in his eye; The cattle provided with winter rations, While apples and pumpkins are ripening fast. There's a smile of relief and a spirit of fun Comes over the farmer when haying is done; The turnips are growing, the melons are prime, The harvest approaching, his bounteous time. Ah! Lucky the farmer who wanders afield And sees the approach of a beautiful yield! —Boston Herald.

Electric Agriculture.

William Low of Scotland will experiment on a large scale with the application of electricity to agriculture. About twenty-three acres, divided in a number of fields, will be utilized for this purpose, each field including a non-electrified or controlled plot for the purpose of comparison. A network of wires will be run over the fields at a height of about 16 feet from the ground. The poles will be put 200 feet apart one way and 300 feet another way. By means of transformers the voltage for the network will be raised to 100,000.

Value Painted On.

Well painted is value added whether the house be built for one thousand dollars or ten thousand. Well painted means higher selling value, and higher occupying value—for there's an additional pleasure in living in the house that is well dressed.

National Lead Company have made it possible for every building owner to be absolutely sure of pure white lead paint before applying. They do this by putting upon every package of their white lead their Dutch Boy Painter Trademark. That trademark is a complete guarantee.

National Lead Company assist in making the right use of the right paint by sending free upon request to all who ask for it, their "Houseowners' Painting Outfit No. 49." This outfit includes a book of color schemes for either exterior or interior painting, a book of specifications and an instrument for detecting adulteration in paint materials. Address National Lead Company, 1902 Trinity Building, New York City, and the outfit will be promptly sent to you.

The use of wind motors as generators of electric power is greatly on the increase in Denmark.

BABY HORRIBLY BURNED

By Boiling Grease—Skin All Came Off One Side of Face and Head—Thought Her Disfigured for Life—Used Cuticura—No Scar Left.

"My baby was sitting beside the fender and we were preparing the breakfast when the frying-pan full of boiling grease was upset and it went all over one side of her face and head. Some one wiped the scald with a towel, pulling the entire skin off. We took her to a doctor. He tendered her a week and gave me some stuff to put on. But it all festered and I thought the baby was disfigured for life. I used about three boxes of Cuticura Ointment and it was wonderful how it healed. In about five weeks it was better and there wasn't a mark to tell where the scald had been. Her skin is just like velvet. Mrs. Hare, 1, Henry St., South Shields, Durham, Eng., March 22, 1908." Potter Drug & Chem. Corp., Sole Props. of Cuticura Remedies, Boston.

In Paris there are thirty-two miles of underground railways, which carry 35,000 passengers a day. Twenty-five miles more road are under consideration.

English Difficult to Pronounce.

The difficulty of English for strangers does not lie in its orthography, but in its pronunciation. Abroad, people will constantly say that they can read and write English readily while unable to utter a word or to understand a word of the spoken language; as, of course, vice versa, a great many English and Americans can read and write French long before they can understand, or make themselves understood; the other languages are just as difficult for them to pronounce as English is for others. The only difference is that English stands alone with its system or lack of system, of pronunciation. When a Frenchman knows how to write German, he is at the same time able to speak the language, if not beautifully, at least so as to be understood; the same holds for a German speaking French.—Prof. Albert Schinz, in the North American Review.

Ask Your Druggist For Allen's Foot-Ease.

"I tried ALLEN'S FOOT-EASE recently, and have just bought another supply. It has cured my corns, and the hot, burning and itching sensation in my feet which was almost unbearable, and I would not be without it now.—Mrs. W. J. Walker, Camden, N. J." Sold by all Druggists, 25c.

IN THE SUMMER SEASON children overindulge in eating fruit with stomach pains as a consequence, mothers should have on hand Ferry's Fruit Syrup, 25c, 50c and 100c bottles.

With a New Twist.

"Give me the core of yer apple." "There ain't goin' to be no core." Thus far the story is familiar. But it is incomplete. The rest of the conversation was as follows: "Why ain't there goin' to be no core?" "Cause this is one o' them Burbank seedless apples." It is wrong to mislead the public by publishing a garbled version of an incident.

Choose Your Words.

A lady who was very plain-looking called on a friend. "This friend's little girl came into the room and her mother introduced her.

"But, mamma, isn't she awfully homely," said the "young hopeful." "Why, Laura, you mustn't say such things; it isn't polite."

"I meant it only as a joke." "But, dear, how much more of a joke it would have been if you had said 'how pretty she is.'"—Success Magazine.

Making Americans.

Outside the big public school 147, on Henry and Gouverneur streets, the other day, several thousand alien mothers stormed the gates and scolded the police and shrieked for their children. It was an hour of hysteria.

Inside the building the children were marshaled to their classrooms, where the habit of order asserted itself. Sixty boys, constituting the police force of No. 147, took the situation in hand, some of them guarding the yard from intrusion, while others sallied through the gates to reassure the hysterical women. Within ten minutes the disorder was over. Eventually such mothers as insisted after the others had gone away were taken to various rooms to see their children at work.

Nowhere else in the United States is an event possible just like this at No. 147. The shrieking mothers outside the school, the quiet children in the classrooms, the steady-voiced monitors at their appointed work of restoring peace and order—these went in their several ways to form the most striking spectacle possible in these days of a new American in the making.—New York World.

OPENING OF THE STANDING ROCK AND CHEYENNE RIVER INDIAN RESERVATIONS.

The opening of the Standing Rock and Cheyenne River Indian Reservations in South Dakota and North Dakota in October will give thousands of people 160 acres of fertile farming lands for a small sum per acre.

Aberdeen, South Dakota, on the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY, and Mobridge and Lemmon, South Dakota, on the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY, are points of registration. You can register any day from Oct. 4 to 23. The drawing will take place at Aberdeen on October 26.

This land opening will also give you a splendid opportunity to see the country via the new line to the Pacific Coast.

Bad Enough Now.

Real Estate Agent (rattling off description of house to Mrs. Pradley, a prospective tenant)—Here's the kitchen—splendid room—all modern conveniences—hardwood floor—

Mrs. Pradley (interrupting)—O, it won't do at all. My present kitchen has a softwood floor, and the breakage of dishes, even on that, is something frightful.—Brooklyn Life.

No Man is Stronger Than His Stomach

A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable feeling in the stomach after eating, is languid, nervous, irritable and despondent, he is losing the nutrition needed to make strength.

Such a man should use Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood, invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit. Ingredients printed on wrapper.

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Women's Ailments.

I am a woman. I know women's sufferings. I have found the cure. I will mail, free of any charge, my home treatment with full instructions, to any woman about her ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is a safe and sure cure for Leucorrhoea or Whitish Discharges, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors or Growths; also pains in the head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney and bladder troubles, where caused by weakness peculiar to our sex. I want to send you a complete ten days' treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that it will cost you nothing to give the week, or less than 2 cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer if you wish, and I will send you the treatment for you, free of cost. I will also send you, free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all, old or young. To Mothers of Daughters I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Sickness and Painful or Irregular Menstruation in Young Ladies. Plumpness and health always results from its use. Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell you sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and rosy. Just send me your address, and the free ten days' treatment is yours, also the book. Write today, as you may not see this offer again. Address MRS. M. SUMMERS, Box 1, Notre Dame, Ind., U. S. A.

SPHON'S EYE CURE

For DISTEMPER, Pink Eye, Epizootic, Shipping Sur-cure and positive preventive, no matter how horses at any age are infected or "exposed." Liquid, given on the tongue, acts on the Blood and Glands; expels the poisonous germs from the body. Cures Distemper in Dogs and Sheep and Cholera in Poultry. Largest selling liquid remedy. Cures La Grippe among human beings and is a fine Kidney remedy. 50c and \$1 a bottle; \$5 and \$10 a dozen. Cut this out. Keep it. Show to your druggist, who will get it for you. Free Booklet, "Distemper, Causes and Cures." Special agents wanted.
