

A GOOD COUGH MIXTURE.

Simple Home-Made Remedy That Is Free from Opiates and Harmful Drugs.

An effective remedy that will usually break up a cold in twenty-four hours, is easily made by mixing together in a large bottle two ounces of Glycerine, a half-ounce of Virgin Oil of Pine compound pure and eight ounces of pure Whisky. This mixture will cure any cough that is curable and is not expensive, as it makes enough to last the average family an entire year. Virgin Oil of Pine compound pure is prepared only in the laboratories of the Leach Chemical Co., Cincinnati, Ohio.

Catarah Cannot Be Cured

With LOCAL APPLICATIONS, as they cannot reach the seat of the disease, catarah is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarah Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarah Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarah. Send for testimonials free.

Caves of Gloom.

"You seem to look with jaundiced eyes on everything," said his physician. "I shall have to prescribe some kind of—"

"No, doctor," interrupted the other. "It isn't the condition of my liver this time. For the last week or so I've been reading those horrible stories of crime published in the monthly magazines."

Dr. Pierce's Pleasant Pellets first put up 40 years ago. They regulate and invigorate, stomach, liver and bowels. Sugar-coated tiny granules.

Explicit Directions.

The Langworths lived in a corner house so easily accessible from the street that they were being continually annoyed by persons ringing to ask where other people lived. At last the son of the house, says a writer in the New York Times, decided to put an end to the nuisance.

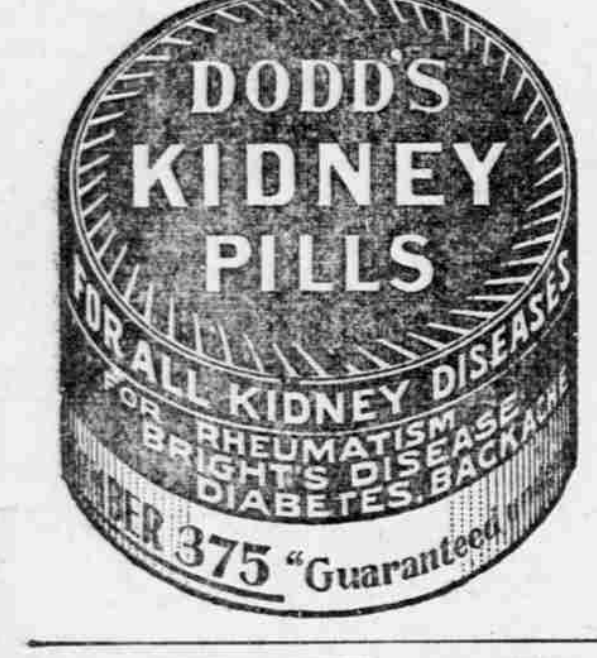

"I guess," he said, complacently, "there won't be any more folks asking if the Browns, the Biddles or the Hansons live in this house. I've fixed 'em."

"What have you done?" queried Mrs. Langworth.

"Hung out a sign."

"And what did you print on it?"

"Just five words," replied Harold, proudly. "'Nobody lives here but us.'"

DODD'S KIDNEY PILLS

FOR ALL KIDNEY DISEASES

BRONCHITIS, GRAVEL, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, BACKACHE

375 "Guaranteed"

Best for Baby and Best for Mother

PISO'S CURE

THE BEST MEDICINE FOR COUGHS and COLDS

Is fine for children and adults, very pleasant to take and free from opiates. It soothes and heals the aching throat and assures restful nights to both mother and child.

All Druggists, 25 cents.

As one grows old the bowels grow less active. Some then take harsh cathartics, and their bowels harden. Then they multiply the dose. Some take candy Cascarets. They act in natural ways, and one tablet a day is sufficient.

Vest-pocket box, 10 cents—at drug-stores. People now use a million boxes monthly.

The Fountain Head of Life Is The Stomach

A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improperly and insufficiently nourished.

Dr. Pierce's Golden Medical Discovery makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgement.

This "Discovery" is a pure, glyceric extract of American medicinal roots, absolutely free from alcohol and all injurious, habit-forming drugs. All its ingredients are printed on its wrappers. It has no relationship with secret nostrums. Its every ingredient is endorsed by the leaders in all the schools of medicine. Don't accept a secret nostrum as a substitute for this time-proven remedy of known composition. Ask your neighbors. They must know of many cures made by it during past 40 years, right in your own neighborhood.

World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N. Y.

No Honey Factory.

"That was an error," said Senator Beveridge, apropos of an opponent's argument, at a dinner in Indianapolis. "Our friend made an embarrassing error. He reminds me of John Winslow. John spent his honeymoon at Niagara. He left the bridal apartment late one night to bathe, and on his return knocked, as he supposed, on his wife's door, calling softly: 'Honey!'"

"There was no answer. Winslow knocked again.

"'Honey!'"

"Still no answer. Winslow thundered on the door.

"'Honey!' he cried, in a voice of agony.

"Then a reply came at last.

"'Sneak, you blooming idiot!'" a male voice growled. 'This is a bedroom, not a blooming beehive!'"

Some people suffer continually with tired, aching and swollen feet. Little do they know how soothing is Hamlin's Wizard Oil. Rub it in at night and have thankful, happy feet in the morning.

A Painless Death.

A teacher in the factory district of a New Jersey town had been giving the children earnest lectures upon the poisonousness of dirt.

One morning a little girl raised her hand excitedly and pointed to a boy who seldom had clean hands.

"Teacher," she said, "look quick! Jimmie's comittin' suicide! He's suckin' his thumb!"—Success Magazine.

IMPOSSIBLE TO FIND ANYTHING better for aches, sore throats or stitches than Perry Davis' Painkiller. Get the large size, it is the cheapest. At all druggists, 25c, 50c and 50¢ bottles.

Our Own Minstrels.

"Mistah Walkah, kin yo' tell me de difference 'tween a lady's gown an' de driver of a public libry delivery wagon?"

"No, George; I give that one up. What is de difference between a lady's gown and de driver of a public libry delivery wagon?"

"De one has books in de back, an' de udder has books in de head."

"Ladies and gentlemen, de gifted tenor, Mr. Stannup N. Howell, will now sing de popular sentimental ballad, 'Baby, Please Don't Scatter Cracker Crumbs in de Fed!'"

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Drug Addictes an Economic Loss.

Morphinists, therefore, and, in fact, all those thoroughly addicted to narcotics, are an economic loss to the community, and soon become an economic burden, says Alexander Lambert, M. D., in Success Magazine. The opium or morphine addictee begins by carelessness in keeping engagements and promises. The memory is one of the faculties first affected, and, like senile dementia, names are the first to go, and as the addictees go on, they will forget events of the past week, but remember and converse about events of their early life. Physicians will forget the names and dosage of the medicines with which they are familiar, and the scientific terms of their profession. Others will make such errors in their daily work that they lose their positions. The will is enfeebled, and while they reason clearly and sanely and appreciate the motive of action in others, all motive and reasoning is sterile in them, as it fails to produce effective volition or action. Their sense of responsibility is wiped out and is replaced by the indifference of perfect egotism. Their characters are modified; they become peevish, discontented grumblers, or obstinately ugly, annoyed at trifles, quarreling without cause. Misanthropic and hypochondriacal, they seek solitude, realizing fully their condition and progressive degeneration, and, filled with remorse, they resent criticism about their habit. In the early stages they will always lie about their vice, because they have enough moral sense left to be ashamed and endeavor to hide it.

Sunken Roman Galleys.

Beneath the waters of Lake Nemi, in Italy, lie buried two pleasure galleys. They belonged to the Emperors Tiberius and Calligula, and it is said they contain art treasures that have been covered for many centuries. Systematic efforts were made to recover the contents of the old hulks by Signor Borghi in 1895. Divers were engaged, and the two galleys located, measured and carefully examined, and from both bronzes, pieces of wood, anchors and ornaments of all kinds were collected. The larger vessel measures about 230 feet in length and 80 feet in beam, and the smaller 200 feet in length and 65 feet in beam. Some pieces of lead pipe were found in the vessels. They bear the inscription, "Caesaris Aug. Germanice," the official name of Caligula.

Protection from Lightning.

As from 700 to 800 people are killed, twice as many injured and an immense amount of property destroyed by lightning every year, Prof. Henry of the weather bureau thinks more attention should be given to protection from lightning. The professor has recently prepared a paper on this subject, and it has been published as Farmers' Bulletin No. 367 of the United States Department of Agriculture, and will be sent free.

A Warning.

I warn my countrymen that the great recent progress made in city life is not a full measure of our civilization; for our civilization rests at bottom on the wholesomeness, the attractiveness and the completeness, as well as the prosperity, of life in the country. The men and women on the farms stand for what is fundamentally best and most needed in our American life.

Upon the development of country life rests ultimately our ability, by methods of farming requiring the highest intelligence, to continue to feed and clothe the hungry nations; to supply the city with fresh blood, clean bodies and clear brains that can endure the terrific strain of modern life; we need the development of men in the open country, who will be in the future, as in the past, the stay and strength of the nation in time of war and its guiding and controlling spirit in time of peace.—Theodore Roosevelt in Outlook.

Profits in Dairying.

The man who is carrying on diversified farming can not keep one cow for each acre of land he tills, but a dairyman can do so, and many of them do. They do not raise all the grain used, but let their neighbors do it for them. They know that they can purchase grain for 100 cents on the dollar and that their good dairy cows will return \$2 in product for every dollar's worth of feed. They can better afford to spend their time in caring for the cows than in raising the grain. In alfalfa sections the man with forty good dairy cows on forty acres of land can furnish all the roughage required the year around. He can not afford to give his cows pasturage, but this is the most expensive feed anyway unless a fellow has open range close by, and such things have become mighty scarce around where civilization prevails. We will assume that five acres of a good forty are used for the buildings, yards, roads, line fences, etc. This leaves thirty-five acres of land for actual tillage, and by having a silo and soiling in the summer time the question solves itself.—Agricultural Epitomist.

Potatoes Grown in a Barrel.

A sensation in potato growing has been created in the neighborhood of Ridgely, Md., or at Richardson, a suburb, by the discovery that potatoes grown in a barrel yield enormously. The experiment was put to a local test there this year, and during this week the experimenter, Oscar Meeds, invited his friends and neighbors to come in and see what the barrel contained. Meeds, early in the spring, had planted the eyes of one whole potato in a barrel which had contained lime, but in which he threw some fertilized earth. As the vines grew, Meeds added dirt, and occasionally added water when the lack of natural substance of the mother earth caused the dirt to appear dry. Potato bugs could not reach it, and the par's green men, it is said, were gloomy as the experiment progressed. When his neighbors arrived to see what the old barrel contained on "digging day," Meeds carefully removed the earth from the dead vines, and there, sure enough, and all connected to the vines by Dame Nature and not by a truck, were 125 prime potatoes, or enough to fill a peach basket, and leave a half-peck of small unmarketable potatoes in the barrel. Now it is claimed at Ridgely that one man has given an order for 5,000 barrels to be made for him next season.—The Delawarean.

Barred Plymouth Rocks.

The breed of chickens one keeps is a matter of personal choice, for any of the standard breeds well cared for will return good profits. Among the American breeds, usually termed general purpose fowls, the barred Plymouth rocks are very popular.

The barred Plymouth rock chicken has many good qualities for making it an ideal farm fowl. It is a fairly good layer and the eggs are large and of a beautiful light brown color. Individual members of this breed, under expert care at the Maine experiment station, have beat the world's record for egg laying. The hens are excellent setters and good mothers. Young barred Plymouth rock chicks develop rapidly, mature early, are of beautiful appearance; their meat is of the finest texture and flavor and they command the highest price on the market for broilers and roasters. Capons of the breed are unexcelled and are preferred

on some markets to all other breeds. Cockerels from 10 to 12 months old are of the fine flavor and make excellent roasters. Both sexes weigh heavy for their size, hence the breed is one of the best market fowls. The breed is popular among fanciers and eggs and stock of high scoring birds bring high prices for breeding purposes.

All of the rocks take on fat readily when given fat forming feeds, which makes them ideal for market purposes, but hens for laying should be given plenty of range and their grain feed should be scattered in litter to induce them to exercise for the promotion of egg laying.

Lifting Grapevines.

The best time to lift old grapevines for transplanting is in the late fall or early winter, while the vines are in dormant condition. The work must not be delayed till late winter or early spring, as the necessary cutting back of the branches is very likely to cause the plant to bleed or lose sap at the fresh cuts.

In lifting and transplanting old grapevines dig up the plant with a ball of earth holding the roots together two or three feet in diameter. Start to dig well out from the base of the vine and pry the root mass up in one solid piece. If the ball of earth holding the roots together has a tendency to fall apart it may be bound together with canvas or old grain bags. The more fine roots that can be taken up and preserved from exposure the better chances there will be for the vine living. If the work of lifting can be done when the soil is frozen from six inches to a foot deep nearly all of the small roots can be secured unharmed.

Have the new hole for the reception of the vine prepared beforehand and fertilized at the bottom with well decomposed stable manure. Old shoes or old leather makes a good fertilizer for grapevines. Place the roots of the vine with the adhering soil mass in the new hole and fill about with as fine soil as can be secured, pressing down firmly as in the planting of ordinary vines for the first time. When old grapevines are lifted and moved they should be trimmed back severely, and no fruit need be expected the following season, owing to the shock of transplanting, but after the vine begins new growth and becomes re-established good results will follow.

Feeding Rations.

There are five classes of material in feeding stuffs, viz., protein, carbohydrates, oil or fat, minerals, and water. The mission of protein is to produce lean meats in the body, make blood, build up new tissues, etc. By carbohydrates we mean the starchy materials, which give heat, fat and energy. They represent simply that part of hay, corn, potatoes and bread that go to keep the body warm, produce energy for work and fat where the animal enlarges.

Cotton seed has a good deal of fat, or oil, while corn has a moderate amount. The latter constituent, like starch, will also furnish heat, energy and fat, and, being more concentrated than the starchy materials, will afford more than twice as much heat, fat or energy as will an equal amount of starch or sugar.

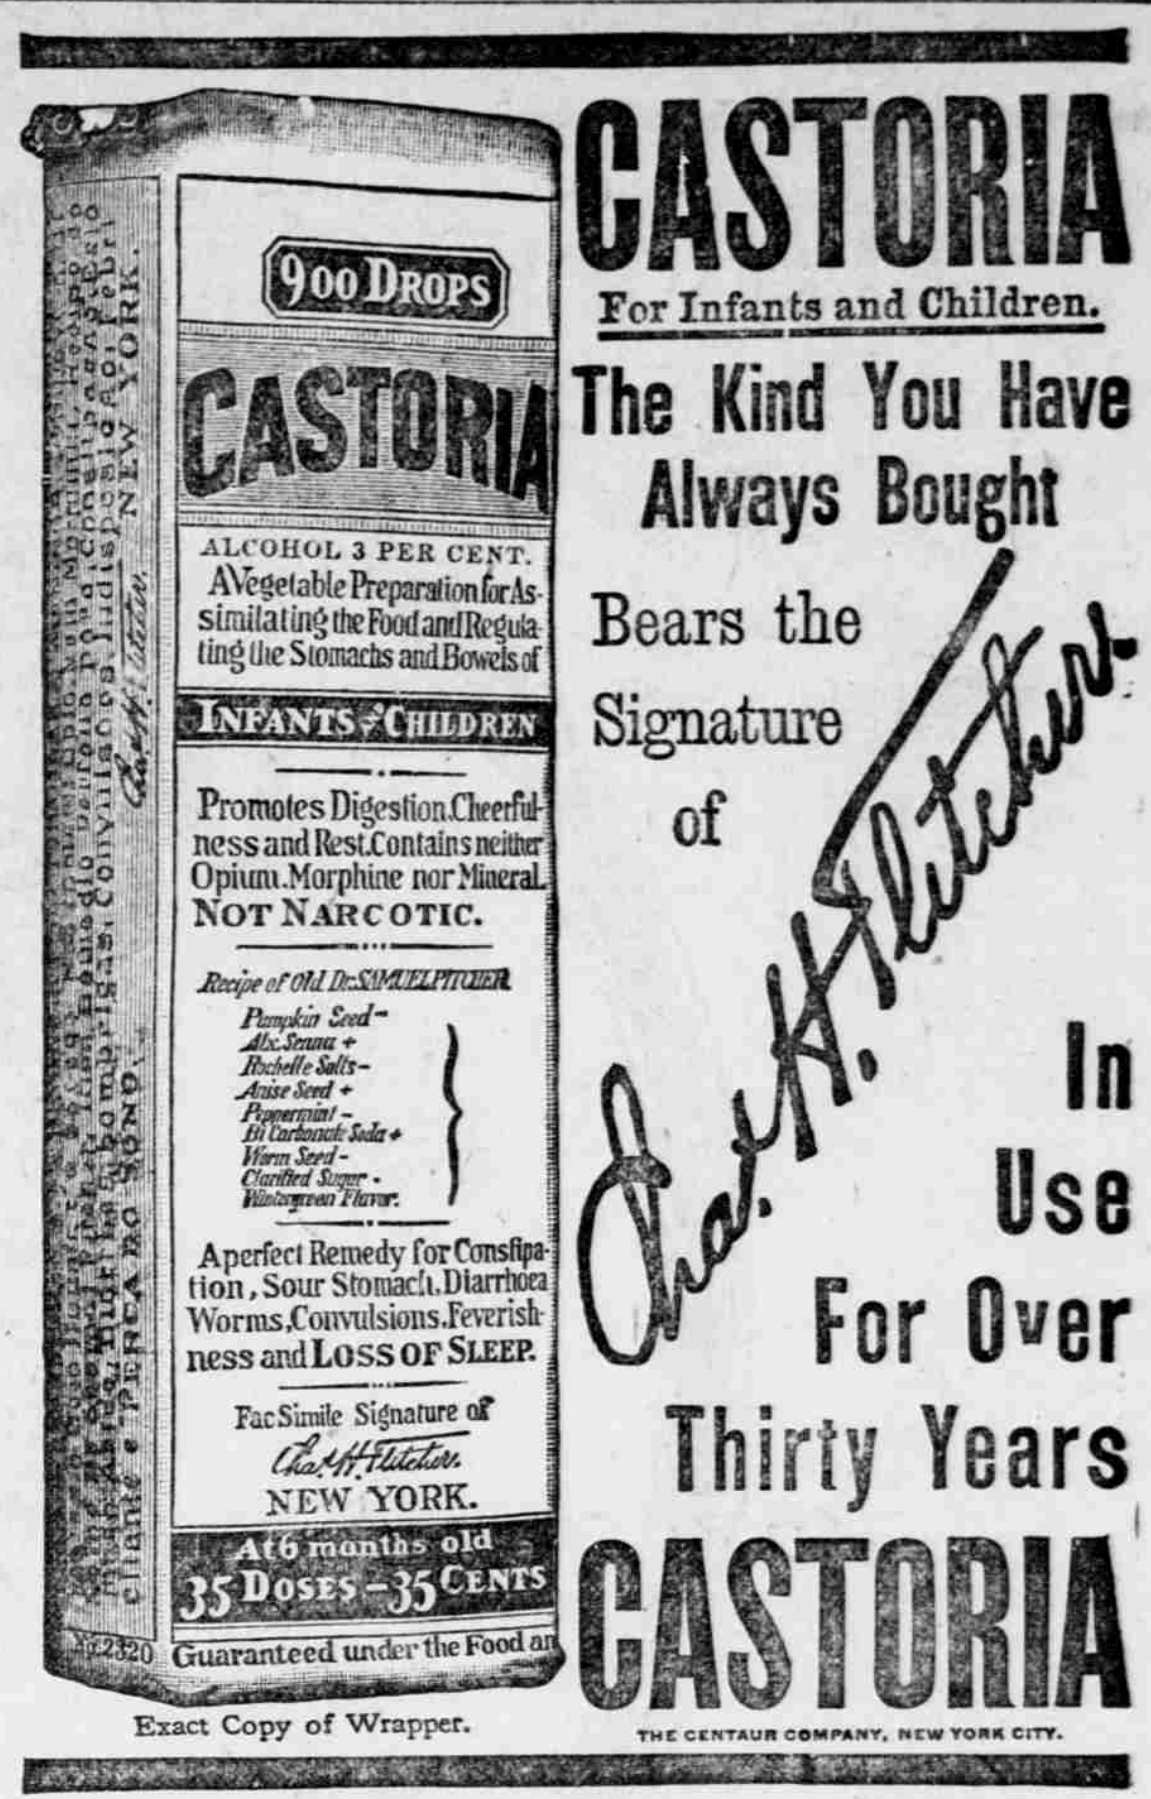

Mineral substances make teeth and bones, and to a certain extent contribute to muscle and flesh. Prof. Burket of the Kansas experiment station says we take the bran from the wheat and give it to our cattle and pigs, giving only the soft, white part of the wheat to our children, which is lacking in mineral materials. This is often the way with a good deal of our food. That explains why our children often have poor teeth and weak bones.

Plain, common water is an important ingredient in our foodstuffs. We must have protein for bone, muscle and blood; we must have the starchy materials and fat to keep the body warm, to create energy and to make fat.

In corn alone there would not be sufficient protein to supply the wants of the body. To add timothy hay, for instance, to corn, as is so often done in feeding work horses, there would still be a lack of protein, as there is very little protein in timothy. But if, instead of feeding all corn, a few pounds of bran, or cotton-seed meal, or linseed-oil meal would be added, then we would more correctly balance the ration, supplying the protein needed.

The above ration is merely given to explain the point—that it can be improved upon there is no question. The secret in feeding, therefore, is to furnish the necessary ingredients in the proper proportion. When we feed corn, cotton-seed meal, alfalfa and clover hay, or the "mixed ration," we are supplying the necessary materials for growth, maintenance and fat production.

If the farmer will keep himself booked upon the analysis of the various feed stuffs (and this information can be secured in bulletin form, free of charge, by writing to the state experiment station) he will know exactly what articles are best suited for his purpose, and be more successful in the growth and production of his farm animals.

CASTORIA

For Infants and Children.

The Kind You Have Always Bought Bears the Signature of **Dr. J. C. Hathcock** of In Use For Over Thirty Years **CASTORIA**

900 DROPS

ALCOHOL 3 PER CENT. A Vegetable Preparation for Assimilating the Food and Regulating the Stomach and Bowels of INFANTS AND CHILDREN.

W. L. DOUGLAS

\$3.00 \$3.50 & \$4.00 SHOES

THE LARGEST MANUFACTURER OF MEN'S FINE SHOES IN THE WORLD

Wear W. L. Douglas comfortable, easy-walking shoes. They are made upon honor, of the best leathers, by the most skilled workmen, in all the latest fashions. Shoes in every style and shape to suit men in all walks of life.

If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better, wear longer and are of greater value than any other make.

CAUTION.—See that W. L. Douglas name and the retail price is stamped on the bottom. Take No Substitute.

Wherever you live, W. L. Douglas shoes are within your reach. If your dealer cannot fit you, write for Mail Order Catalog. W. L. Douglas, Brockton, Mass.

BOYS' SHOES \$2.00 & \$2.50

When Cold Winds Blow

When cold winds blow, biting frost is in the air, and back-draughts down the chimney deaden the fires, then the **PERFECTION Oil Heater** (Equipped with Smokeless Device) shows its sure heating power by steadily supplying just the heat that is needed for comfort.

The Perfection Oil Heater is unaffected by weather conditions. It never fails. No smoke—no smell—just a genial, satisfying heat. The new **Automatic Smokeless Device** prevents the wick being turned too high. Removed in an instant.

Solid brass font holds 4 quarts of oil—sufficient to give out a glowing heat for 9 hours—solid brass wick carriers—dampier top—cool handle—oil indicator. Heater beautifully finished in nickel or Japan in a variety of styles.

Every Dealer Everywhere. If Not At Yours, Write for Descriptive Circular to the Nearest Agency of the

STANDARD OIL COMPANY (Incorporated)

Accounting for It.

Imogene—Why is it that so many weddings happen on Wednesday?
Esmeralda—Well, on Sunday everybody wants to sleep, you know; Monday is wash day, and Tuesday is ironing day. Wednesday is the first day in the week when there's really any time for marrying.

AGONIZING ITCHING

Eczema for a Year—Got No Relief—Even at Skin Hospital—In Despair Until Cuticura Cured Him.

"I was troubled by a severe itching and dry, scurfy skin on my ankles, feet, arms and scalp. Scratching made it worse. Thousands of small red pimples formed and these caused intense itching. I was advised to go to the hospital for diseases of the skin. I did so, the chief surgeon saying: 'I never saw such a bad case of eczema.' But I got little or no relief. Then I tried many so-called remedies, but I became so bad that I almost gave up in despair. After suffering agonies for twelve months, I was relieved of the almost unbearable itching after two or three applications of Cuticura Ointment. I continued its use, combined with Cuticura Soap and Pills, and I was completely cured. Henry Searle, Little Rock, Ark., Oct. 8 and 10, '07." Potter Drug & Chem. Corp., Sole Props. of Cuticura Remedies, Boston.

WESTERN CANADA

What Governor Deneen, of Illinois, Says About It:

Governor Deneen, of Illinois, owns a section of land in Saskatchewan, Canada. He has said in an interview: "As an American I am delighted to see the remarkable progress of Western Canada. Our population is doubling every year. Our people are flocking across the boundary in thousands, and I have not yet met one who admitted he had made a mistake. They are all doing well. There is scarcely a community in the Middle or West—no State that has not a representative in Manitoba, Saskatchewan or Alberta."

125 Million Bushels of Wheat in 1909

Western Canada field crops for 1909 will easily yield to the farmer \$170,000,000.00 in cash. Free Homesteads of 160 acres, and pre-emption of 160 acres at \$3.00 an acre. Railway and Land Companies have land for sale at reasonable prices. Many farmers have paid for their land out of the proceeds of one crop. Splendid climate, good schools, excellent railway facilities, low freight rates, wood, water and lumber easily obtained.

For pamphlet "East West" particulars as to suitable location and low settlers' rates, apply to the **Sup't of Immigration, Ottawa, Can.** or to the following Canadian Gov't Agents: E. T. Holmes, 215 Jackson St., St. Paul, Minn.; J. M. MacLellan, Box 116, Watertown, South Dakota. (Use address nearest you.)
